

II.—*Bibliography of Canadian Zoology for 1907.*

(Exclusive of Entomology)¹

By LAWRENCE M. LAMBE, F.G.S.

(Read May 26, 1908.)

INVERTEBRATA.

CELEENTERATA.

BROWNE, EDWARD T.

The Medusæ belonging to the family Laomedusæ.
Journal of the Canadian Journal of Zoology and Magazine of Natural History, December, 1907, vol.
 1907, pp. 457-480. (Reference is here made to certain Canadian
 Atlantic and Pacific species.)

PRINCE, E. E.

Professor Macallum on the Chemistry of Medusæ. A condensed résumé of
 results.
 Further Contributions to Canadian Biology, being studies from the
 Marine Biological Station of Canada
 39th Annual Report of the Department of Marine and Fisheries,
 Fisheries Branch, 1907, pp. 121-128.

ECHINODERMATA.

CLARK, AUSTIN H.

A new species of Crinoid (*Prilocrinus pinnatus*) from the Pacific Coast, with
 a note on *Bathycrinus*.
Proceedings of the United States National Museum, 1907, vol. xxxii,
 pp. 551-551, pl. lili, and three text-figures.
 The species of *Prilocrinus* was obtained by the United States Fisheries
 steamer "Albatross" off the coast of Moesby Island, Queen Charlotte
 Islands, B.C., in 1890.

CLARK, HUBERT LYMAN

The Apodous Holothurians: A monograph of the Synaptidae and Mol-
 poliidae.
Smithsonian Contributions to Knowledge, 1907, part of vol. xxxv,
 pp. 1-231, pls. 1-13.
 (A number of species known from Canadian waters are included in
 this memoir.)
