In the Black Sea the Russian fleet was very active, especially along the Anatolian coast, doing much damage to Turkisl shipping. A British fleet of light cruisers and destroyers, under the command of Commodore Tyrwhitt, escorted a large number of seaplanes and made an attack on the morning of the 25th on the German airship sheds in Schleswig-Holstein and succeeded in inflicting heavy damage Three of the seaplanes were lost; and th destroyer Medusa was sunk by collision with the destroyer Laverock, all the crew being rescued. In addition to the damage done to the German airship hangars, the British sank two German armed patrol boats. The German submarine campaig was prosecuted with extreme vigor durin the week, and the "News of the Sea gives an account of the victims as well a of the shipping lost through contact with mines. Many farmers are surprised to find Maritime fencing, even when it has been up for a number of years, remarkably free from loose or broken uprights and taterals. Examination shows, however, that the Maritime "bull-dog" lock holds the joints so rigidly that they cannot give or pull out of shape; and because we use nothing but large, strong, "live" wire—No. 9, heavily galvanized—they are able to stand the daily stress of wear and tear without breaking.

Maritime fence is always sightly, always straight, and always efficient. It's bull-strong and hog-tight, because it is made to withstand far greater strains than any it is likely to endure. It gives you all that you can start as a sangable price. Before you buy or even select your fencing, learn first what the Maritime has to offer in the way of REAL fence service.
