what is almost equally as bad, the hands become red and swollen. The chief reason for these annoying but common accompaniments of cold weather is that the skin, losing its elasticity because of a lack of natural

secretion at a time that atmospheric conditions do not induce perspiration, becomes unduly dry and contracted, and so is liable to crack. It is a tender skin that will do this ,because tender skins are thin and delicate and cannot stand what rougher ones will.

Another cause is carelessness in drying the skin after washing it, particularly if it is washed immediately before going out into the open air or directly after coming in.

Very many persons in cold weather dare not wash their hands either before going out or immediately after coming in, for if they do, even though the water they use be warm, their skin will burn so as to be painful, and it will look red besides.

They may avoid such an annoyance if they will rub on the hands a little cold cream or camphor ice, allow it to remain on a moment or so and then remove it with a soft, old handkerchief, either of silk or cambric.

Another delightful emollient for the hands, arms and neck is fine oatmeal. Put it into a flannel bag, boil it and then place it in the water intended for ablutions, or it may be kept dry in a jar on the toilet table and some rubbed on the hands whenever they are washed. Honey rubbed into the are washed. Honey rubbed into the skin still wet, drying it in as the skin is dried, is also a preventive of chapping. If hands were dried more carefully

If hands were dried more carefully there would be less roughness of the skin. A good plan is to dry the hands well, after using the towel, with an old, soft silk handkerchief, which will absorb any moisture left. Glycerine is an old friend, but as

Glycerine is an old friend, but as alone it is irritating to moist skus it should be diluted with rose water or pure water—one part of glycerine to three parts of rose water. If about one dram of acetle acid is used to one ounce of glycerine it helps to remove almost any stains from the hands. If a woman is wise she will take the precaution to wear gloves when dusting a room or doing any kind of work that will soil her hands.
