

Lesson XII. June 17, 1917. The Risen Lord .- John 20: 1-18.

Commentary .-- I. Mary at the Sepulchre (vs. 1, 2). 1. The first day of the week—It was very early on Sunday morning. The body of Jesus was week-it was morning. The body of Jesus was placed in the tomb before sunset on Friday and lay there until Sunday morning. A part of Friday, the whole together, according to Jewish usage, called three days. The early Christians desired to celebrate the day or which our Lord arose from the dead hence Sunday was observed as the Sabbath, rather than the day during which his body lay in the tomb. Mary Magdalene—She was most earnestly devoted to the Master, and it appears that her zeal led her to reach the tomb in advance of the other women. Their misson was to embalm the body of Jesus. Yet dark-Before daylight The sepulchre-It was the new tomb of Joseph of Arimathaea, who had requested the Roman officer to permit him to provide for the burlal of the of our Lord. The tomb was in a garden near Golgotha, or Cavalry, the place of crucifixion. It was probclose to the hill resembling a skull, which is situated a short distance north of the north wall of Jerusalem. The sepulchre was a chamber made in the solid rock. The stone taken away-The women had inquired as they were on the way to the sepul-chre, who should roll away the stone (Mark 16: 3). The opening into the tomb was like a door in a wall of rock, and was covered by a large stone, like a mill stone. 2. Runneth-In her disappointment is not finding the body Jesus she hastened to inform the disciples of its unexplained disappear-ance. The other disciple, whom Jesus ance loved—From this and other passages it is clear that it was John himself.

II. Peter and John at the sepulchre (vs. 3-10). 3. ('ame to the sepulchres two disciples hastened to the tomb with the hope of finding some clue that would lead to the recovery of the 4. Did outrua Peter-This verse shows the anxiety of the disciples in this matter. 5. Yet went he not in-John was able to see the interior of the tomb without entering, and he saw the grave clothes, but not the body of Jesus. Reverence of his Lord may have too impetuous to stop outside. This was in keeping with his disposition from the time he first became a dis-ciple of Jesus, 7. The napkin in a place by itself—The linen clothes with which the body was dressed for burial lay in one place and the napkin that was about his head in another. There was no indication of violence or 8. He saw, and believed-As haste reverence at first kept John at a respectrul distance from where the body of Jesus had lain, so faith, upon a more complete understanding of con-ditions within the tomb, led him to enter and to believe that the body of spectful distance from where the body Jesus had not been taken from the tomb, but that he had risen from the . They knew not the scripture dead. We can but admire the faith of John in the resurrection of Christ, in the absence of an understanding of the scripture which foretold that, resur-Our Lord had told them that rection. would suffer death and rise again on the third day, but the disciples had failed to comprehend his meaning.

failed to comprehend his meaning. John's faith was sublime. 101. Jesus appears to Mary (vs. 11-18). 11. Mary stood without at the sepulchre weeping. Her devotion to the Master prompted her to linger at-the disciples had gone away. It was the same devotion that had brought her very early to the tomb. Her sorrow at the disappearance of her Lord's body found expression in her Lord's body found expression in tears. Her devotion to Jesus was deep, but her faith was not ac active and strong as was John's, who "saw and believed." 12. Seeth two angels— Her love led her to look at the place where Jesus had Lain. Matthew and Matthew and Mark mention but one angel, probably that one only that spoke."--Clark. --One at the head, etc.--In the most holy place the cherubim were placed at each end of the mercy-seat. See Exod. 25; 18, 19. Jesus was crucified between two this way but two at each end of the mercy-seat. See Exod. 25; 18, 19. Jesus was crucified between two thieves, but two angels guarded his body in the tomb. 13. Woman—A respectful manner of ad-dress. Why weepest thou—Had she understood that Christ had risen, there would have been no tears of sor-COW 14. Turned and saw Jesus standing. 14. Turned and saw Jesus standing. Something a tracted her attention and the support has k from the abode of something a start with the life," her Lord, autough she did not at first recognize something was bedding for the body of her blasser, when, she balieved to be dead, and not for her risen Lord. It seems that the thought of his resurrection had not entered her mind. She did not gay particular attention to the personage who was there, because of personage who was there, because of the intense giver of her soul, 15, Woman, why weepost thou-The first words of our Lord after his resurrec-Woman, why weepest thou—The first words of our Lord after his resurrec-tion were addressed to one of his most devoted followers and brought confort to her sorrowing heart. The gar-dener—Mary had not yet carefully ob-served Jesus, and thought he was the man who had charge of the grounds containing the tomb 16. Jesus saith unto her, Mery—Her acts and words of devotion had won their way, and Jesus spoke her name, and spoke it with such tenderness that she at once recognized him. Turned— She had not been Jooking toward him whom she supposed was the gardener, but upon heatlag the voice of Jesus she at once turned to see him. Rab-bonl—This was a title expressive of the highest honor, equivalent to "n ost honorable master" 17. Touch me not—The verb means to cling to. The relation between the glorified Chil st on between the glorified Chils relation between the glorified Chilst and His followers was somewhat dif-ferent from what it was between them before the cruciflyion. Jesus had an errand for Mary to do, and that was more important then than to cling to his feet. For 1 am not yet ascended to my Father-This seems "to imply that, since he had not yet withdrawn himself from earth, there would be time enough for expressions of effortime enough for expressions of affec-

tion, and she we portunity by going brethren, the disciple news." Go—She was

news." Go-She was forth as a witness, To -Bishop Hall remarks the optimal at first servants, then discipates, then friends, and after the resurrection, brethren. I ascend—He had his re-surrection body, but was still on earth. He would soon ascend to glory, to my God, and your God—"A tandar intimation that area on bish tender intimation that even on high he is their divine brother." 18. Told the disciples—She instantly obeyed her Lord's command. The gladness of her own heart prompted her to producers of beef cattle, with the re-sult that large numbers of them have gone out of the business. Since the war, however, prices for meat, as well as for all kinds of food products, make the good news known to the others. Questions.—For what reasons is the

doctrine of the resurrection an im portant one? Who went early to the tomb of our Lord? How long had the body of Jesus lain in the tomb? What did Mary say to Peter and John as she met them? When Mary looked into the sepulchre, what did she see? Describe the appearing of Christ to her Unor whet over the total the second to May 6-12, the top price for choice steers on the Toronto market was \$7.15, in 1914 \$8.45, in 1915 \$8.60, in 1916 \$9.40, and at the present time choice heavy steers are selling for about \$12.65. Receipts of catile dur-ing 1916 were particularly heavy, due chiefly to the high price of feed. In 1916 and during the first four months of the present year, receipts of young calves have exceeded those for the year 1915 as well as for the year 1914. her. Upon what errand did Christ send Mary? How did the disciples receive her message?

PRACTICAL SURVEY.

Topic.-- A Glorious Revelation. I. Of Christ's resurrection.

II. Of Christian brotherhood

I. of Christ's resurrection. For three years Jesus had declared among his followers that his Messiahship would be proved conclusively in his resurrection from the dead, and yet his dis-ciples and his closely associated apostles had never taken in his meaning. When they were forced to give up their hopes of an earthly kingdom and see him submit to crucifixion, they forgot for the time all his assurances that he would rise again. They con-tinued to conclude things according to their own reasoning. Mary's discovery of the empty tomb was the first indi cation of the fact of his resurrection. The two apostles, John and Peter, left the tomb convinced that Jesus had risen, but were unable to fathom the mystery of the resurrection. Mary stood resolute. She resolved to ques-tion until she learned the whole truth tions the sooner animals, generally speaking, are marketed, the better. When we say this, of course, we do not mean to market young stock be-fore they are properly finished, but we mean that it is more profitable about her Lord. Her devotion to Jesus was seen in her persistent lingering, in her increased courage and in her intense feeling. She did the only thing which love prompted under the circumstances. She trusted the angels circumstances. She trusted the angels with the secret of ner sorrow, then turned away to weep alone uninter-ruptedly. She did not consider that her Lord might be preserved to her under new conditions. A deep feeling of bereavement excluded from Mary's mind for the time accur other thought year-old whether it will pay better to buy and feed stockers or raise and finish the animals oneself will depend chief. on one's skill in buying and sell-ing. For the average man who only mind, for the time, every other thought and perception. In her ignorance and deep grief she had turned her back upon her Lord. Jesas interpreted and accepted her love regardless of her errors. His question, "Why weepest thou?" aroused the spirit of search and expectation anew in Mary's heart. cattle requires considerable skill and judgment. In the first place a good She was ready to undertake the care ese for cattle is required. One must of his body if it could be restored to That was sorrow in its resolute and hopeful aspect. In a tone of faith-fui remonstrance Jesus said, "Mary." Tenderness and revelation came in thin animals of strong constitution that will make use of all the feed that will make use of all the feed that is given it from the animal that is thin because it is a "bad doer." Many experienced cattle feeders claim that if there is a difference of that one word. When Mary's eyes were opened and her ears caught the sound of his voice, there was no longer any doubt or hesitation. Mary recog- 1_{2}^{1} to 2 cents between the buying price and the selling price they can make money. One experienced feeder nized not only her own name, but the voice that uttered it. She compre-hended the situation without further that we are acquainted with reckons that on the average each animal costs remark and turned directl to him. \$25 was not merely an old-time greeting winter and early spring. He figures on making a profit of from \$25 to which Mary received. It was a new and measureless benediction \$30 per steer. salutation made real to her all she had ever dared to hope. From the sense of absolute loss she passed to the sense of full possession. That was a the animals quickly is that less food the animals quickly is that less food is required to produce a given amount of meat, and profits are correspond-ingly greater. Whether an animal is at hard work or is simply kept quictmoment of reaction from blank despair

HE ATHENS REPORTER, JUNE 13 1917.

Up until the last year or two prices have been distinctly discouraging to producers of beef cattle, with the re-

have shot upwards, with the result that the average price for cattle on

the Toronto market during the last

winter are higher than ever they've been before. Cattle prices have been rising steadily since the year 1913. In 1913, during the week corresponding to May 6-12, the top price for choice steers on the Torenti

EEDING BEEF CATTLE GRAIN ON PASTURE Before Grain Can be Profitably Fed to Cattle On Pasture This Summer They Would Have to Sell for \$15 to \$20 Per Cwt.-6 to 8 Lbs. of Grain is Required to Produce 1 lb. of Fattening Increase.

supplied to furnish the energy ne-cessary to carry on the vital bodily functions can an animal increase in weight. To keep a 1,000 pound steer at rest without losing weight, 20 pounds of hay is required per day. The longer an animal is kept the more food is wasted in supplying this food required for maintenance. If an animal is kent a year flonger than is animal is kept a year longer than is necessary to get it into market con-dition, it means that the food requir-ed to maintain that animal during the year (20 punds of how the set of the year) the year (20 pounds of hay per day in the case of a 1,000 pound steer), is wasted. The modern tendency is therefore to market beef animals as soon as is consistent with finitu. The heavy steer still commands a good price provided he is of good beef conormation and well tattened, but fin ish is what is looked for on the mar ket, and an animal that is properly finished when it is 1,100 pounds finished when it is 1,100 pounds will command a higher price per hundred weight than an older animal weigh-ing 1,500 pounds. At the Central Ex-perimental Farm, Ottawa, it was found that three-year-olds made a daily gain of 1.65 pounds at a cost of \$6.52 per cwt.; two-year-olds, 2.16 pounds per day at a cost of \$5.99 per, cwt.; and yearlings, 2 pounds per day at a cost of 4.30 per cwt. The young er the animal is when finished the less outlay there is per pound of gain er the animal is when finished the less outlay there is per pound of gain for food consumed. The production of baby beef, although profitable if one can keep the animal from going off its feed while it is being heavily fed for rapid gains, requires skilful feed-ing and prohabity the cafeet place for ing, and probably the safest plan for the average man is to aim to have the cattle finished weighing from 1200 to 1,400 pounds at from 20 to 24 months old. to 1,400

The cheapest gains are made, of course, when the animals are on pas-ture. If animals are to be sold less than two months after they are furned out to pasture to is better to turned out to pasture, it is better to keep on feeding them in the stable until they are sold. The reason for this is that no matter how carefully the change from winter to summer feeding may be made, it is practically impossible to prevent the outwork leaves impossible to prevent the animal los ing weight for the time being. Two weeks after animals are turned to pasture it is not unusual for them to weigh 120 pounds or more less than when they were turned out. The gains made on pasture will, of course, depend on the quality of the pasture. Animals should gain from 1_{2}^{*} to 2 pounds per day. When pastures dry up and afford but little sustances there are the set of t tenance, then supplementary feeding should be resorted to. With the shortage of labor this year this will be expensive, quite apart from the cost of the feed. A good plan, therefore, is to seed down a certain acreage with the annual pasture mixture that has given such good results at the Ontario Agricultural College. The mixture consists of one bushel each of wheat, oats and barley, and from 5 to 7 nounds of ord states. or wheat, oats and barley, and from 5 to 7 pounds of red clover, seed per acre. About one month after sowing the mixture, when 6 or 7 inches of growth has taken place, the cattle growth has taken place, the cattle may be turned into it. This pasture will carry about one steer per acre. Last year, which was exceptionally hot and dry, 77 head of cattle were pastured on 34 acres of this annual pasture and 36 acres of permanent pasture from the last of May to Aug-nest 2th, without feeding one pound of pasture from the last of last to sug ust 2th, without feeding one pound of silage or other coarse feed, and growth of beef cattle and young stock were kept at normal during the entire On August 25th one-half the period. cattle were removed to other pasture, but the annual and permanent pas-

ture was sufficient for the remaining cattle during the balance of the season

Whether it pays to feed grain to cattle on pasture is an oft debated question at farmers' meetings. Cattle given grain or meal certainly have more finish, but it is doubtful whether the slightly extra price obtained for the extra finish more than pays for the cost of the grain.

Foods are valued chiefly for the protein and starch or its equivalent they contain. The protein forms flesh or muscle and the starch forms fat and gives the animal energy to do work. A good pasture usually pro-vides enough protein, so that when vides enough protein, so that when supplementary feeds are given fatten-ing foods (that is, foods that are rich in starch or its equivalent) should be given rather than foods that are very rich in protein. Protein-rich foods may be given as protein can also be converted into fat as well as into flesh, but as a rule foods that are rich in protein are more expensive than those that are more expensive than those that are rich in starch, that is, protein normally is dearer than starch. At present prices, how-ever, as will be seen from our market pages, feeds such as cotton seed meal and oil cake that are very rich in protein are cheaper reckoned both as a source of protein and of starch equivalent than corn and other foods that are rich rich in starch or carbohydrates

As has been said, starch or its equivalent is the chief food constitu-ent that nuts fat on the animal body, so that this fat on the animal body, so that a fair way to compare foods for fattening purposes is on the basis of the amount of starch or its equiv-alentalent they contain. When ani-mals are fed a ~~operly balanced ra-tion, it has been found that three pounds of starch or its equivalent add pounds of starch or its equivalent added to a maintenance ration will pro-duce one pound of fattening increase. Expressing this in terms of corn we find that 3.6 pounds of corn if added to a maintenance ratio manufattenance. to a maintenance ration would pro-duce one pound of fattening increase. From this we might expect 3.6 pounds of corn when fed to cattle on pasture to produce one pound of grain, but practical experience has shown that in some cases it will take from 6 to 8 pounds of corn or more to produce one pound of fattening increase

reason for this apparent discrepancy? The reason, no doubt, is that a steer fed a grain ration on pasture will not graze so closely and will not nake such good use of the pasture If no grain is fed the steer will fill himself up with grass and eat more than enough for maintenance, but when fed grain he eats less grass and

these circumstances.

unde

What is the

some of the grain has to furnish the for maintenance. Under average conditions we may reckon on froin to 8 pounds of grain producing 1 pound of increase when fed on pasture. W ithgrain selling for 2 1-2 cents per pound, this means that it W ithgrain selling for 2 1-2 will take from 15 to 20 cents worth of grain to produce 1 pound of grain. This meant that cattle must be sell-ing at \$15 to \$20 per hundredweight to return a profit on the grain fed. Frices for cattle are usually highest. in the month of July, but even though they are at the present time about \$3 per hundredweight more than last year, we do not expect choice steers to be selling for as high as \$20 this coming July. Grain feeding may be coming July. Grain feeding may profitable in some cases where pric profitable in some cases where prices for feeding stuffs are not exorbitant, but with present prices grain can-not be profitably fed to steers on pas-ture.—The Canadian Countryman.

11. Of Christian brotherhood. Mary, lean woman who had c rich experience of Christ's power, and who had ministered to lies temporal needs, and who had wintess-ed H's crucifixion, was the first to bear witness of His resurrection. She was first to see her Lord and to hear His voice. "Rabboni" was the word in which Mary's soul expressed its love and wonder and concentration of feeling. The spirit of loving discip-leship was crystalized in that on word. With all the interaction of the spirit spirit spirit spirits and the spirit spirits and the s With all the intensity of her affec-tion and the greatness of her courage there was imperfection in her faith. there was imperfection in her faith. The words of Jesus. "Touch Me not," were designed to discipline and raise her faith and to break to her the truth that He was no longer to be associated with His disciples in the f.esh. After His accension to His Fa-ther the new life would be complete, when in her heart and spirit she could cling to Him forever. Mary needed to when in her neart and spirit she could cling to Him forever. Mary needed to be taught that the fellowship of the future would be very different from that of the past. Her dependence upon that of the past. future would be very different from that of the past. Her dependence upon Christ must be changed into a holier relation. All this Mary had to learn amid her joy that her joy might not be taken from her when he should as-cend. To Mary it was the historic and physical revelation of the risen Sav-lour and the spiritual establishment of all her hope sin life and in eternity. The laws of the new life and relation-ships were revealed to Mary first. She was made an apostle to the apostles by the Master's own direction and commission. Her dNect errand was to bear gracious words of cheer and en-couragement to these who had been enduring suspense, sorrow and depre-sion Mary her the source of the so couragement to these who had been enduring suspense, sorrow and depre-sion. Mary hestened to tell the whole story and to declare the whole mes-sage. T. R. A. Cheering Him Up.

He (anxiously, after popping the question)-Why do you cry, my love? Did I offend you by my proposal? She (quietly sobbing)-Oh, no, dear. Mamma always said to me, "Lil, you are such an idiot that you will not even i get a donkey for a lover," and now I have got one after all .-- l'hiladelphia Bulletin.

'What is life?" I asked a child, Care-free, happy all the day. 'What is life?'' the child re,lied, ''Lady, life is play.''

Next I turned to maiden fair, Sweet and lovely beyond measure, "What is life?" I questioned her; "Life," she murmured, "Life is pleas-ure."

What is Life?

urning to a soldier brave, Like to those off sung in story; Just a moment's time I crave. What is life?" "Why, life is glory."

Mother, toiling all the day For the child whose radiant beauty For the child whose rathant beaus Brightens all the weary way-"What is life?" "Ah, life is duty."

Father, sailing o'er the sea, Where the angry waters foam, "What is life?" I asked, and he Quickly answered, "Life is home."

Then I whispered to my heart. "What is life where'er we rove?" Soft and sweet my heart replied: "Life? Ah, life is only love." -May E. McMillan, in Golden Age.

THE HOLLYHOCK.

A Flower That is Interwined With Colonial History.

The hollyhock gets its name from two words that indicate its origin in the Holy Land and its membership in the mallow family. But apparently it was known in India before it flung its cheerful banners to the air in Palestine

Wherever the first home was, it has become thoroughly acclimated in New England. We think of it as a characteristic New England flower. It decorates our colonial history almost back to the days of Covernor Bradford and Roger Williams. It is forever peering out of the pages of New England fic tion and poetry. There is no flower that more completely embodies the spirit of our eighteeneth century romance.

Some of the old colondial blossome are shy and modest, but the hollyhock has the courage of its convictions. It knows its beauty, as it should, and has no mind to hide it under a bushel or beneath a hedgerow. It's the prov-ince of loveliness to display itself, not vanningly, but with a due sense of its

Think an order of the source, "The structure of split peak," cried the value."
"One structure of split peak," cried the value."
"Couple of sinkiers and a cup of coffee structure of the value."
"Good of the value of the value."
"The source of the value."
"The value of the value."
"The value of the value."
"The value of the value."
"A alt seen of the value."
"An order of ham and eggs." Interrupted a custome.
"Toket two on a slice of squal!" the value of the value."
"Toket two on a slice of squal!" the value. "The seen thinking that Jim raust have the grip or acomething because."
"A dozen raw oysters." said a business man.
"Twelve alive in the shell!" should the value.
"The the biddles on a raft." yelped the value.
"I want a rump steak rare." ordered another man.
Slap of moo-let him chew it!" the walter of the value."

er called. "If you see Jim," he went on, "teli hem I was askm' about him, will you?" I told him I would and slid off my steel

I told him I would and slid off iny stud. "I want a bowl of tomato soup." be-gan the man who grabbed my stool. "a plate of beans, bread and butter, a piece of apple pie, and a glass water." I figured that the translation of this order into funch-lingo would be worth listening to, so I lingered. The valter seemed to be puzzled but for an instant only; then he shouted into the tube as follows: "One splash of red nose, platter of Saturday nights; dough well dena with cow to cover. Eve with the lid en, and a chaser of Adam's ale!"-Literary D-gest.

She-What do you suppose Hard!! Also She—He probably meant to im-ply that you were a dend one.—Jack o'
