a still hunt for a capable man. Possibly there will not be any intermediate ser les in the Inter-Provincial and in that event the intermediates will, if allowed, enter in the senior series of the 0. R. F. The most likely outcome of the diffi-culty will be the forming of a two-team schedule between the Argonauts and Tigers in the I. F. R. U. Parkdale Canoe Club are insisting that the senior teams of the O. R. F U. deposit a guarantee with the Union that they will finish out the schedule

The Tigers will hold another practise this afternoon, and as the weather is much cooler, the seniors will have no ex-cuse for not turning out. Art Turner will likely have on his moleskins and the fans will have a chance to see how the former Queen's star acts.

A Dundas despatch states that Fundas Rugby Club met last night and organized for the coming season, but as to which arrive the termine season but as which series the team will play it was left over till the executive commit tee could ascertain whether the senior O. R. F. U. series would be a fixture or not. The sentiment of the meeting was entirely in favor of playing senior O. R. F. U. Officers elected were as follows: J. B. Bertram; second vice-presi Andrew Clarke; secretary-treasur nt, Andrew Charke: secretary-treasur-Hugh Gray; asisfant secretary-treasur-ter, A. Raynor: executive committee, s. Kervin, E. ### Great Turn Out of Policemen in Chicago Reception.

heago, Sent. 16 .- Chicago started early to-day in its preparations to rereive President Taft. The police, school children and reception committees were abroad almost with the sun. The 150,-000 children who will line the road the president will take in his trip through the south parks started for their posts

The solid parks started for the power shortly after the regular time for the opening of school. The street cars were fairly swamped with them. When the children were all at their posts along the line of march there were fifteen solid miles of them. Each child wore a badge bearing the there were fifteen solid miles of them. COBALT STOCKS. A surprising dulness has come over the Mining Market in Toronto, and brokers are at a loss to find a reason for it. After a remarkable run of business during July and August, it was expected that the fall months would allow a strong market, but so far it has been almost without life. The public appears to be fairly well loaded up with the cheaper stocks especially, and sell-ing orders are more numerous than buy-ing orders just now. Prices have held up well, however, despite this fact, and in the higher-priced issues there is still a fair demand. There was little feature to the mar-ket yeaterday. Tracking Deer.
Tracking Deer.
Considering the individual track, the hoof of the Virginia deer evidently spreads easier than that of any other member of the family, except moose and cribou. It is because of this that, during the season when they are in good condition, and in hunting time, the ridge of dirt or snow that is made between a steamer in the harbor the day before the wohlves of the hoof, and left in the track, is much more conspicuous than that left by any other deer. However, if the conditions are not idealadteres, armed with rifles, occupied positions during the night on walls surrounding the wharves, while armed boats patrolled the water front, aided by searathlights set up at the pier ends. The tigrees was sighted once and a further tigrees was sighted once and a further there thoroughly to-day. The supersion of work on the docks resulting from the tigrees' presence is causing the buck or a doe, as he has none much using heads.

AD TIGER HUNT. gJzf\$,dJ4PSt The hunt along the water front of Marseilles for the royal Bengal tigress that escaped from a steamer in the har-bor the day before yesterday game to a dramatic end this morning when the ani-mal, mortally wounded and with the blood streaming from her flaks, fled from her mob of pursuers, and with enormous bounds gained the water front. Then, as if still determined to foll her enemies, she sprang into the sea and was drowned. During the hunt this mortally

The Navel Orange.

The Navel Orange. The first we know of the navel orange, which is very valuable not only on ac-count of its fine quality and taste, but also because of its being seedless, is of a single tree that was found growing on the northern shore of the Mediterranean Sea. This was about the year 1565, or nearly 350 years ago. A monk in a monastery in that far-away country painted a nieture of the fruit and wrote a description of it, both of which may be seen in the library of the Roman Catholic University at Wash-ington, D. The east has been selected, re-hearsals are in progress and the play will be produced in the auditorium of the Dominican Church in October. There will be several hundred people in the company. The principals have been most carefully selected, not only their his-trionic ability being taken into consider-ation, but their moral fitness to depict the Saviour and his followers, so that the play may be presented with the rever-ential spirit in which it was written. Four nights with three hours at each performance will be required to produce the piece in its entirety.
