A HAPPY MAN Mr. Weir Says He Has Won Out, Be-

cause He Has Brought the Corbin

Children To School. "I am a happy man," said Truant

Officer Weir, to The Advertiser, this afternoon, "for I have succeeded in getting the Corbin children to school without the necessity of bringing them into court. I still insist that I am right, in spite of all that has been said to the contrary. I can prove it. Here is a statement of the attendance of those children in the Empress avenue school: "Violet, aged 13, in junior second

class, attended 16 days out of 64 since "Lester and Chester, aged 8 years,

in kindergarten, attended 17 out of 64 "Gladys, aged 7, was at school 15 out of 64 days.

"These figures were taken from the register of the Empress avenue school. "The children were present yesterday for the first time since early in February. "It will soon be that a man cannot

believe his own eyes. "I have done what I considered my duty, and I think I am right."

A NEW LINE TO SARNIA

Three Different Routes Surveyed by the St. Marys and W. O. R. Company.

Sarnia, April 2. - Mr. G. E. Hyde, engineer in charge of the St. Marys and Western Ontario Railway Company's survey from St. Marys to Sarnia, says that the surveys have been completed so far as the field work is concerned. Three lines were run to Sarnia, the first one by the way of Kirkton, Elmville, Exeter, Crediton, Thedford and Forest, to Sarnia. The second line passes through practically the same municipalities, only a little to the south of the first one, and the third line was what is known as the south line, passing through or near Granton, Lucan, Ailsa Craig, Parkhill and Arkona, to Sarnia. Mr. Hyde would not say which of the three lines he considered the best, but did admit that the south line was

No Action Taken Re Garbage Plant Cost to City Would Be Very High

Board of Health and No. 3 Com- The individual method, by which the swift and refuse is removed by a man paid to do the work. This was the sys-Explained.

The board of health and No. 3 committee yesterday afternoon listened to Mr. W. F. Morse, of New York, president of the Universal Destructor Company, explain his system of garbage destruction. A plant suitable for London's needs could be erected at a cost of \$65,000. The charge for destroying the garbage

would amount to about 25 cents a ton. No action was taken in the matter. Mr. Morse explained his system carefully. He was of the opinion that no definite scheme had been obtained for tankage also had a revenue value. there was no man in the city who knew how much garbage there was to be de-the plant, made \$7,000 out of the garbage

tons of matter daily to be removed. In addition there was a great amount of bage output daily very great. No house could be built upon a lot which had been filld with garbage, as the health authorities point out that a great deal of the disease in a city comes from such lots. Three Systems.

tem at presest in vogue here, and so far as he could learn, it was not satisfactory. If the city took this matter in charge, every lot and household could be kept The contract system was another system

tem used quite frequently in some American cities. By this, one man or firm removed the garbage, and the city was taxed to pay for the removal. The third system was that of a municioal system, whereby the city collects and destroys or disposes of the garbage. When the city does it, the man responsible can be located, and the work carried

out more satisfactorily. There were three ways of disposing of garbage. One was a dump, as at present. The other was to reduce-removing the grease, which could be sold. Then the system was in vogue in Brooklyn, Cleve-

tons of matter daily to be removed. In addition there was a great amount of ashes, paper and such, making the garbage output daily very great. No house of the refuse.

NORTH SIDE the cost of light a very great dael, and also derived a revenue of \$3,000. Last year the profit was \$4,600, in addition to

the cost of the garbage removal. Situation in London. The city of London is in need of taking care of itself and keeping itself clean. The present system is not satisfactory

to any householder. "The garbage systems eventually come back to the cremation system," said Mr. Morse. "I am convinced that the gar-bage in London would develop 500-horsepower. This could be used in civic light- ery. ing and for other purposes."

One hundred tons of garbage would produce about 23 tons of coal, said Mr. Morse. This would be about the daily output of garbage in London.

The installation of the destructor plant, together with the contract of the destructor plant, together with the contract of the destructor plant, together with the contract of the destructor plant,
