Mr. Jonas said the position of the dominion illingness to deal with the question of ciprocity, and that as yet no such wilgness had been expressed. When the aty of 1872 was made at Washington cans were willing to give us the privilege of taking into their country free umber and fish, and after a year or unless the grain of Ontario was also ncluded. The next day America with drew this offer, and would never renew it. Sir John had sacrificed the interests of the me provinces to western interests ficed again. But years ago, Mr. Jonas carefully avoids saying anything about what was done only six years ago, when the national policy act (1879) was passed. Section 6 of that act

Sunday Street Cars.

Editor World: I read with pleasure A number of years ago Toronto had a etters that are appearing in your issues favoring the running of cars on Sunday. I think it would be a good thing. Now the summer weather has arrived many a man would be glad to take his wife and children for a few hours? ride on Sunday if his means would allow him. He could do that were the cars running. I don't see why Toronto should be so far behind other civilized cities in this respect. I cannot conceive of any harm arising from running a few cars, but I know the good it would do. Some people kick against anything in the shape of progress, and would close the parks if possible. I think it would be much better for the working portion of Toronto if they would avail themselves of the present fine weather than to listen to the ravings of some clergymen that Toronto is blessed with. Yours respectfully,

Our local custom house authorities have now been a long while on the war path, drawing down on themselves execrations loud and deep. Their efforts were not at first sustained and encouraged by the force of public opinion, for these officers wer ping supposed to be working only for their share of forfeitures and not for the general much because of their numbers as because interests at all. Thus those whom then really had the weight of public opinion sagacity marked out as prey were long looked upon as suffering under a with them, but they held and used means of terror, by which people were so "cowed" and terror struck that they dare not speak shameful persecution. decision of the matter rests with the general conference, which does not meet till October, 1886. Meanwhile the question will be thoroughly ventilated, and it may safely be predicted that when the methodist body decides to go into federation, or decides to maintain a separate tion, or decides to maintain a separate tion, or decides to maintain a separate in miversity, the decision will for all practical purposes be unanimous. Dr. Nelles, the eminent president of Victoria college, is personally in favor; of federation, as is his able colleague, Dr. Burwash, but denominational and university esprit du corps is strong and it may prevail. The final result is therefore at this writing very uncertain.

Catarrh-A New Treatment. Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh attained by the Dixon treatment for catarrh.
Out of 2000 patients theated during the past
ix months, fully ninety per cent, have been
cured of this stubborn malady. This is none
the less startling when it is remembered that
not five per cent. of the patients presenting
themselves to the regular practitioner are
benefitted, while the patient medicines and
other advertised cures never record a cure at
all. Starting with the claim now generally
believed by the most scientific men that the
disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted
his cure to their extermination; this accomplished, the catarrh is practically cured, and
the permanency is unquestioned, as cures
effected by him four years ago are cures still.
No one eise has ever attempted to cure catarrh in this manner, and no other treatment effected by him.

No one clee has ever attempted that in this manner, and no other trarrh in this manner, and no other trarrh in this manner. The application is the remedy is simple and car be done the remedy is simple and car be done to the remedy in the remediate of the remed
