Of the present condition of the Canada barley trade it is extremely difficult to speak. Every day advices from the American barley markets show decreased inclination to leave barley alone and see what will come of it. Local dealers generally incline to the same opinion and are not bandling much, although one or two dealers are anxious to see all this year's Canadian crop put on the market in the hope of future business in the Canadian article being maintained.

this remarkable effort we find that he made in one minute 1068 movements or 17.8 movements in a second. Mr. Charles Stanbury read an interesting paper on "Amended Spelling." The paper was read with the object of including amended spelling in the somety's atms, which are now directed towards the dissemination only of shorthand and type-writing. At the conclusion of the essay a new invention, the Barker word counter, was exhibited. This is an ingenieus piece of mechanism to be pute on a type-writer for registering the number of words printed in a certain length of time.
