### Wartime Bread **Of Whole Wheat** In France Again

PARIS, Sept. 1 .-- (Canadian Press Cable.)-Beginning to-day whole wheat bread will replace throughout France the pure white loaves and rolls that since the war have received such a warm welcome back to the French dinner table. This is due directly to the fact that this year's wheat harvest in France is estimated much below the yield of last year, when there was a

bumper crop of \$8,000,000 quintals. It is feared that before the 1923 wheat crop can be reaped the country will have to buy some 20,000,000 quintals of foreign grown wheat to meet the requirements of the population.
