

THE TARTE COMMITTEE.

SIR HECTOR MAKES A STATEMENT.

Correcting Statements Made by the Contractor, Starrs, in his Evidence before the Committee.

OTTAWA, August 19.—The Privileges and Elections committee met this morning, Mr. Girouard in the chair. The chairman stated as a matter of information that the committee had met 49 days and held 64 sittings since the investigation commenced. The sub-committee met 18 days.

Mr. Edgar moved that the letter book which came in from the Department of Public Works on August 4 be submitted to the committee and printed. He said the books had not been examined by the committee and he had found several letters in them that had an important bearing on the case.

The Chairman considered that this would be practically reopening the case. He put the motion, however, to the committee and it was carried.

SIR HECTOR LANGEVIN SPEAKS.

Sir Hector Langevin then made the following statement:—I see in the papers that Mr. Starrs has been brought as a witness, and has made a statement and been cross-examined upon it, and I thought that under the circumstances the committee would give me leave to say something about that under oath, as I did the other day. Mr. Starrs has stated in his evidence on Friday last that he had interviewed with me about the Esquimault graving dock tenders. I wish to rectify some of his statements in so far as they relate to me. First, about the first set of tenders, which were called for in February, 1884, and opened on the 5th of March, Mr. Starrs seems to have forgotten nearly everything about his tender. He says it was ignored, it was not considered as far as he can remember, he has no recollection of it; there was, he says, a little talk about the first tender but he has no recollection of that particular tender at all. Nevertheless on the 10th of March, 1884, his firm wrote to the secretary of the department of public works a letter (page 34 of blue book) that they had made mistakes, which they detail, and they wish them corrected or desire to withdraw their tender and have their cheque returned to them. On the 14th of April (same page) they wrote another letter in the same sense, and on the 17th of April Mr. Perley reports accordingly (pages 34 and 35) recommending that neither of the two tenders be accepted and that the cheques be returned to the several parties. And on the 19th (page 35) an order-in-council is passed and on that day the cheques were returned.

Q. I see a letter asking to withdraw on the 24th. Is that the day you had the interview? A. I can not say exactly if it is the day. Q. Did you tell Starrs there was no getting out of the payment of the \$50,000? A. No. Q. Did Mr. Starrs say you told him that they need not expect any extras; is that correct? A. I told him they need not expect any extras as they were not getting any in any other case. Q. Will you swear that you used the words "in any other case"? A. I can not remember the exact words used, it is so long ago. Q. What was the request you made to Mr. Starrs? A. I made no request. Q. Are you aware of the fact that the tender they put in was many thousand dollars higher than the work was shown to have been done by Larkin and Connolly? A. I do not know. NEVER SAW THE ADDITIONAL SECURITY. Q. Mr. Starrs swears that he brought the \$9,000 additional security to the department; did you get it? A. No. Q. Mr. Starrs swears that he gave it into your hands? A. I positively deny that he ever gave it to me. Q. Do you remember Mr. Starrs telling you that from the tone of your conversation you didn't want to give him the contract? A. No; I do not recollect. Q. Are you in a position to swear that that letter asking for the withdrawal of the tender was not drawn up in your office at the time of your conversation with Mr. Starrs? A. No. Q. Was it written in the department? A. That I do not know. Cross-examined further by Mr. Davies, Sir Hector said he did not remember having any conversation with any financial man who were willing to back up Starrs and O'Hanley. Mr. Curran—Did Mr. Starrs ever do any work for the department? Sir Hector—I do not remember, but I think he did some in the way of building bridges. This concluded the examination.

THE CONNOLLYS WANT THEIR BOOKS.

A telegram was read from Michael Connolly asking when he could have his private books and the firm's books. He was in urgent need of them. It was decided to retain the firm's books till the report of the committee is ready and to dispose of the private books now.

Mr. Henry, counsel for the Department of Public Works, stated that the department's factum was prepared up to date, but owing to the evidence produced to-day it will not be completed for another couple of days. The committee then adjourned.

AFTER DIPHTHERIA, SCARLET FEVER, PNEUMONIA, OR ANY OTHER SEVERE ILLNESS, THERE IS NO BETTER TONIC THAN HOOD'S SASSAPARILLA.

The Quebec Legislature. It is semi-officially announced that the Mercier Government has decided to call the Legislature for September 28 and that the official summons will appear in the next Gazette. The Government intends to start a little investigation on its own account into the Baie des Chaleurs scandals.

ARRIVAL OF LORD MOUNT-STEPHEN.

Lord and Lady Mount-Stephen arrived in this city last week. They were accompanied by their niece, and Mr. Russell Stephenson and Lord Elphinstone. Mayor McShane and a number of prominent citizens met the party on their arrival and congratulated his lordship on his elevation to the peerage. At ship on the afternoon Lord Mount-Stephen said he regarded the honor of which he was the recipient as being conferred, not on him, but on Canada. He might be, he said, of some

THE ZOUAVE MEDALS.

Count Mercier said to be in a Rather Despondent Condition. The following appeared in Thursday's Empire:—The Empire correspondent has just returned from Ste. Anne de la Perade, where a very successful demonstration in honor of the papal zouaves took place, some \$2,000 having been spent by Premier Mercier to make things look bright and comfortable. It is safe to say, however, that the leader of the Quebec Government is quite unfitted for public business, and that his rule in this province is fast drawing to an end. Defeat seemed to be in the air, and gloom was plainly seen in the faces of the entertainers. The Hon. Mr. Mercier has been in this state for some time past, and his most intimate friends cannot arouse him to a realization of the impending disaster. Mr. Desmarais, M.P.P. for St. Hyacinthe, has been at Tourouvre for some days past, but as yet has been quite unable to make the Premier talk about Picaud or the imperative duty which he owes to the province and to the Dominion. Hon. Peter Mitchell sent a member of the Herald staff to interview the Quebec leader upon the situation, but as soon as the count espied the emissary of the defunct third party he indignantly swung his cane around and bade the journalist begone, as he did not want to have anything to do with newspaper men. It appears to be quite certain that Lieutenant Governor Angers has communicated with St. Anne, and some of the local papers allege that the

wrote an answer (page 95), saying in substance that they did not require to strengthen themselves financially, and that they had the necessary means to perform the contract; they added that they would be ready to sign the contract on Monday 14th, and make the necessary deposit, which evidently they had not then made. On Monday 13th October, I recommended to the council (pages 96 and 97) to accept Messrs. Starrs & O'Hanley's tender, provided they made the necessary deposit of \$9,500, to be added to that of \$7,500 already made, as mentioned in their letter of the 10th. I thus showed my desire that they should have the contract. On the 16th an order-in-council was passed accordingly. On the 21st, Mr. Starrs not having appeared from the day he and his partner had written their letter of the 10th, and as I wished to have the contract signed, the secretary of the department wrote to Mr. Starrs (page 95) asking him to be good enough to call at the department at once re Esquimault graving dock. Mr. Starrs came to the department and if he is not mistaken about the cheque he speaks of he evidently carried it back with him as he did not leave it with me and he was not ready to sign the contract and did not. The fact is, on the 24th a letter was received from Messrs. Starrs & O'Hanley (page 37 of the Blue book) in which they say they find they had made a mistake in some of the items of the tender and find their prices generally too low. They consider it, therefore, not prudent to take the contract, and that it would not be in the public interest if they were to do so. They therefore beg to withdraw their tender and request to have their deposit cheque returned. Their cheque was accordingly returned to them on the 27th. If the contract did not go to Messrs. Starrs & O'Hanley, it is evidently due to their not wishing to have it, they having, as they say, made mistakes in their tender and finding their prices generally too low. Mr. Mulock thought it would be necessary to call the members of the firm of Starrs & O'Hanley, as some of the statements made by Sir Hector were new, and suggested that his cross-examination in this matter should be held over again. Mr. Curran—These are no new statements. They are simply contradictions of Mr. Starrs's statements. Sir Hector was cross-examined by Mr. Davies. Mr. Davies—After you reported to council did you send any letter to Mr. Starrs? A. Yes; on October 21. Q. Mr. Starrs came in pursuance of the letter? A. Yes; the day or the day after. Q. I see a letter asking to withdraw on the 24th. Is that the day you had the interview? A. I can not say exactly if it is the day. Q. Did you tell Starrs there was no getting out of the payment of the \$50,000? A. No. Q. Did Mr. Starrs say you told him that they need not expect any extras; is that correct? A. I told him they need not expect any extras as they were not getting any in any other case. Q. Will you swear that you used the words "in any other case"? A. I can not remember the exact words used, it is so long ago. Q. What was the request you made to Mr. Starrs? A. I made no request. Q. Are you aware of the fact that the tender they put in was many thousand dollars higher than the work was shown to have been done by Larkin and Connolly? A. I do not know. NEVER SAW THE ADDITIONAL SECURITY. Q. Mr. Starrs swears that he brought the \$9,000 additional security to the department; did you get it? A. No. Q. Mr. Starrs swears that he gave it into your hands? A. I positively deny that he ever gave it to me. Q. Do you remember Mr. Starrs telling you that from the tone of your conversation you didn't want to give him the contract? A. No; I do not recollect. Q. Are you in a position to swear that that letter asking for the withdrawal of the tender was not drawn up in your office at the time of your conversation with Mr. Starrs? A. No. Q. Was it written in the department? A. That I do not know. Cross-examined further by Mr. Davies, Sir Hector said he did not remember having any conversation with any financial man who were willing to back up Starrs and O'Hanley. Mr. Curran—Did Mr. Starrs ever do any work for the department? Sir Hector—I do not remember, but I think he did some in the way of building bridges. This concluded the examination.

THE CHURCH AND LEARNING.

A List of Great Ecclesiastical Scholars Who Have Advanced Science.

The Holy Father has graciously received a deputation of the Roman Academy of Archaeology, who waited on him to present him with a volume of their Transactions which, indeed, was luxuriantly prepared at the expense of the Pontiff himself. This, which is the third book of the second series, contains some very learned dissertations illustrated by sumptuous engravings. Leo XIII. entered into a long conversation with his erudite visitors, holding his own with them on technical studies to which they are devoted. Amongst those present on the occasion were Commandants De Rossi, Visconti and Iulio Aldibrandi, and Mgr. Isidoro Carina. While speaking of His Holiness we may advert to the rumour that he has come to the assistance of a Catholic bank at Rome in temporary difficulties. That is quite likely, and is within the functions of a paternal ruler. This is not the only instance of the kind on the part of a Government which has occurred this year. That we may the more fully satisfy the editor of the Echo as to the gross ignorance of the Catholic priesthood, we have compiled at random a list of some of the stupid exploits they have achieved in the walks of intellect and scientific research. Of course, it is unnecessary to remind our contemporary that the first author of musical lines was a Pope, that musical notes were invented by a Brother, and that the discovery of the explosive power of gunpowder, and the application of hydraulic power, are due to men who wore the tonsure. But there are other matters which may be new to him. For instance, Father Clario reformed the calendar, the Abbe Hany invented the metrical system, Archbishop Reptomantano, Cardinal Cusano, and Canon Copernicus enlightened humanity as to the plan on which the world is constructed and arranged. Father Bndos de Celle woke the tone of the first organ, a Catholic priest encouraged Columbus on his voyage to America, Brother Pncifico da Verona invented clocks with wheels, and a certain Pope, by title Silvester II., endowed us with Arabic numerals, gave us the clock with a pendulum, and devised the first organ moved by steam. Candid, a priest had the original idea of moving an organ by electricity, and the Deacon Flavio Gioia invented the compass. The catalogue is by no means exhausted yet, but we cause to take breath and to give our anti-Catholic colleague time for reflection. Here are the names of a few more of these mutton-headed clericals, and a brief record of what they have done to retard civilization. Bishop Vemio discovered the circulation of the blood, Fathers Epee and Suard made us acquainted with some wonderful febrifuges, Father Lami formulated the laws of electricity, and Father Becaria amplified them. The telegraph was invented by Father Schaeiner, the magic lantern by Father Kirker, and the microscope by Father Magnan. The first ceratost was made by Father Desloges in 1772. Two missionary brothers brought silkworms from China to Italy, and aided in establishing one of the foremost industries of the country; the Monk Beral originated glass drinking vessels, and the Abbe l'Epee enriched us with the alphabet for deaf mutes. None of these victories of mind, we submit, are to be despised even in the sublime regions of West Central London, where the Echo is compiled. But hold—there are one or two still to be mentioned. Cardinal Mezzofanti, one of these lazy, wealthy, sensual men in red hats, was the greatest polyglot of his own or any other age. Piazzi was a renowned astronomer, and Secchi the leading searcher of the firmament of his epoch; Ventura was a mighty philosopher and a famous orator; Fontana and Pinciani were two celebrated archeologists and physicists. All these were priests. Who invented the pantelegraph? The Abbe Caselli. Who invented the motor and the moderating brakes of the locomotive? Father Navantini. Who the micrometer and the microscope? Father Braun. Who the hydraulic clock? Father Enbricaco. Who the electric sismometograph? Father Bertelli. We fancy we can hear that echo dying faintly in the dim distance.—Universe.

use in Canada in the House of Lords. Mr. Duncan McIntyre's appointment as a director of the Grand Trunk did not mean that an amalgamation of the C. P. R. and the G. T. R. would take place. It indicated a friendly feeling between the two lines, and had produced a good effect in London.

THE ZOUAVE MEDALS.

Count Mercier said to be in a Rather Despondent Condition. The following appeared in Thursday's Empire:—The Empire correspondent has just returned from Ste. Anne de la Perade, where a very successful demonstration in honor of the papal zouaves took place, some \$2,000 having been spent by Premier Mercier to make things look bright and comfortable. It is safe to say, however, that the leader of the Quebec Government is quite unfitted for public business, and that his rule in this province is fast drawing to an end. Defeat seemed to be in the air, and gloom was plainly seen in the faces of the entertainers. The Hon. Mr. Mercier has been in this state for some time past, and his most intimate friends cannot arouse him to a realization of the impending disaster. Mr. Desmarais, M.P.P. for St. Hyacinthe, has been at Tourouvre for some days past, but as yet has been quite unable to make the Premier talk about Picaud or the imperative duty which he owes to the province and to the Dominion. Hon. Peter Mitchell sent a member of the Herald staff to interview the Quebec leader upon the situation, but as soon as the count espied the emissary of the defunct third party he indignantly swung his cane around and bade the journalist begone, as he did not want to have anything to do with newspaper men. It appears to be quite certain that Lieutenant Governor Angers has communicated with St. Anne, and some of the local papers allege that the

Premier has promised explanations next week, but the Empire did not find anyone to corroborate this report at Tourouvre. The souaves election resulted as follows: Recorder de Montigny, president general; C. Trudelle, vice-general; treasurer, H. A. Plamondon; secretary, O. Martin; board of directors, Chevaliers Fendegast, Hughes and Drolet; and Messrs. Hortebosc, Gervais and Cote.

THE OARSMEN.

Edward Hanlan, the celebrated oarsman, found great efficacy in St. Jacobs Oil, and he says: "It is a reliable remedy for muscular pain in arms and legs and invaluable to oarsmen." All athletes use it.

Boiled.

OTTAWA, August 20.—Early this morning it became known that Colonel Smith, the deputy sergeant-at-arms, had not been successful in his search at Quebec for Thomas McGreevy, and at the opening of the House the Speaker announced the fact to the House. No action was taken upon the communication and it is understood none will be taken now. The Privileges and Elections Committee, which finished the taking of evidence to-day, will go on with its deliberations and take whatever steps it deems necessary to purge Parliament of the contempt in which it has been placed.

Prompt relief in sick headache, dizziness, nausea, constipation, pain in the side guaranteed to those using Carter's Little Liver Pills. One dose. Small price. Small dose. Small pill.

Mr. Robidoux and the Globe.

TORONTO, Aug. 20.—The Globe to-day, referring to the Baie des Chaleurs enquiry, says:—"In this connection we wish to state from information which we have received, it is evident that the Globe was in error in assuming that Mr. Robidoux or Mr. Merrier's cabinet, knew of the arrangement between Picaud and Armstrong. Mr. Robidoux is said to have had nothing to do with any of their transactions, and has the reputation of being a man of strict integrity."

Patience, the second bravery of man, is, perhaps, greater than the first.

EVERY MOTHER Should Have It In The House. Dropped on Sugar, Children Love to take Mother's Anodyne Liniment for Croup, Colds, Sore Throat, Whooping Cough, Cramps and Pains.
