

Through the kindness of Mr. C. B. Chappell, we are enabled to present a sketch showing the proposed extension of Victoria Park, of which mention was made in our last number. Mr. Chappell has indulged in artists' license in so far as laying out drives, etc., but his sketch shows what might be done in this direction. In introducing the Bill for "extending North River Road and adding to Victoria Park," Hon. G. E. Hughes explained that it would not only be of great advantage to the city but also to the Province. Charlottetown is the capital city, and the more attractive it is made to tourists and others the more it enhances the value of the Province in general as a summer resort for the better class of visitors. What benefits the city benefits the country.
