

Interesting to all seafaring People.

.....
DOCTOR LEE'S

PATENT NEW-LONDON BILIOUS PILLS;

Prepared (ONLY) by SAMUEL H. P. LEE, Member Medical Society,
Practitioner of Physic and Surgery, and Apothecary,
in New-London, (Conn.)

Patent right secured agreeably to Act of Congress.
.....

IN an advertisement like this, it may be said with truth, that these BILIOUS PILLS are highly esteemed and universally known throughout the United States and West-Indies, for their extraordinary virtues, in preventing and removing all those complaints which arise from bilious redundancies in the stomach and bowels, causing fevers of the bilious, yellow, inflammatory, malignant, remittant, intermittent and epidemic kinds; they cure foul stomachs, where puking is indicated—jaundice—cholera—dysentery, or bloody flux—costiveness—worms—sick head aches—indigestion—dropsy—colds—scurvy—sore throats, &c. &c.—They are effectual to restore the system, after a debauch of excessive eating and drinking—of great fatigue in travelling on land, or exercise at sea—and in hot and sickly countries, when taken once in 5 or 6 days, are the best preservatives against fevers, and when attacked, the best remedy ever yet known to break the disease. They may be used with the greatest safety, and without any interruption in business. Their operation is that of a mild/easy, and effectual purgative, and therefore supersede the necessity of puking, for they clear the stomach as effectually, but without any exertions or pains. These pills have now a reputation far beyond any thing of the kind ever yet offered to the public, having been experienced by seafaring people, as well as others, for a number of years past, and the demand for them increasing beyond the most sanguine expectations—few people do, and none ought ever to go to sea without a supply of them, as they value their lives and healths:—A captain of a merchantman assured the patentee, that he once saved the crews of a number of vessels in the West-Indies, when the yellow fever raged on board the American shipping, with the stock of pills he had on board. For the information of the public, particularly those who travel by sea, they are hereby respectfully informed, that the above, and only

Genuine Patent New-London Bilious Pills

are kept for sale at the following sea-port towns; where they may always be supplied, upon application to the agents, viz.

To prevent any fraud or imposition from dealers in other Pills, of similar titles and names, you must be particular to inquire for Dr. LEE'S Patent NEW-LONDON Bilious Pills, and before you purchase, please to examine the bill of direction, wrapped upon each box, and see if the word "New-London" precede the words Bilious Pills; without which they are not genuine. . . . This caution is necessary to be particularly observed at all times. . . . Direction for using and respectable certificates of their intrinsic virtues, are specified in the bill covering each box.
