Waterloo Men Trace Three  
Horses Stolen Two Years  
Ago and Arrest  
Follows.

BERLIN, Sept. 12.—(Special).—The efforts of J. S. McNally and Dr. Henderson, members of the Waterloo County Farmers' Protective Association, have resulted in the recovery of three horses lost by three farmers during the past two years.

After waiting for two years, the county police to do something, they set out themselves on a clue and after a careful search among the farmers around Tavistock, they were successful in locating the missing animals. They quickly returned to Berlin and a further investigation followed, with the result that the horses were recovered and John Hummel of Stratford has been arrested and brought to Berlin for trial.

## FIRELY LORE IN THE MIKADO'S REALM.

Fireflies are more than mere beetles in Japan, according to Mook Jyo, who writes on the subject in The Strand Magazine. They are Cupid's light to guide lovers; souls of ancient soldiers; the devil's snare to tempt wanderers to death. In their light of magic gold with a tint of emerald-green, the Japanese see stars of hope, sorrows of broken hearts, the everlasting spirits of warriors, but most of all the joys of love and lovers.

Whenever they see the glimmering faint green light of fireflies hovering over the stream running into the darkness of night, the Japanese dream of love and loving hearts. The light of fireflies is the guide of lovers going along the narrow paths thru the rice-field on dark nights to meet their sweethearts.

During the daytime fireflies sleep under the shelter of grasses near streams or ponds. In this state they are terribly ugly. But as soon as the evening darkness begins to gather they wake from slumber and light their tiny gleam of greenish-yellow. At first they are timid and will not venture from their hiding-place until it is utterly dark. But some of the more brave and restless before it is quite dark, and show their faint light under the deep shadow of great trees or under the cover of the low stone bridges over the stream.

When the evening mist covers the water and the trees and grasses, dark and cool, a single glimmering firefly
