

MORE FANS THAN LONDON GROUNDS CAN ACCOMMODATE

Life in Army Thought to be Cause for Increased Enthusiasm — 140 Firms in Business House Sports Association.

London, June 29.—(Associated Press, by Mail).—Enthusiasm for sport is greater in London this season than ever before, asserts the Evening News in an article which declares that in and about the city today, there are 35,000 tennis players, 6,000 amateur cricket teams and 45,000 regular football players. Rejuvenation by five years of army life is advanced as one of the reasons for the record-breaking keenness for outdoor games.

Every lawn tennis club has a long waiting list, and the newspaper states, grounds for tennis, cricket and football are at a premium, and the space available is hundreds of acres short of what is required. A tour of the playing fields indicates that there are tens of thousands who would join in if room could be found for them.

The London Playing Fields Society has 125 tennis courts which accommodate 2,000 players. The number of courts is five times that maintained by the organization before the war, yet it could have let them three times over for the present season. There are 200 clubs in Greater London affiliated to the Lawn Tennis Association alone, controlling 20,000 players, while 30,000 players are registered at the London County Council courts.

The secretary of the Southern Counties Cricket Conference in which there are 270 clubs from Greater London, estimates that 6,000 acres are needed in this sport. He estimates that the clubs now own their own grounds number 700.

The sports club of one large catering firm has 1,000 members and occupies 700 acres. One of the banks has spent 70,000 pounds on a sports ground in South London. Illustrative of the growth of outdoor activities among commercial companies is the fact that there are now 140 firms in the Business House Sports Association, compared with 50 in 1910. London is encircled by a great belt of playing fields. One of the few pieces of ground still available consists of a 20-acre plot for which a railway company wants 600 pounds an acre.

MODEL TOWN FOR SICK SOLDIERS

Proposed Location is 7,000-Acre Tract Across River at Kamloops.

Ottawa, July 14.—A model town for tubercular returned soldiers may be established on a 7,000-acre tract of land across the North Thompson River, at Kamloops, B. C., as a result of the investigations of the sub-committee of the special Parliamentary committee on soldiers' civil re-establishment. The report of the sub-committee indicates the feasibility of the scheme and the Department of the Interior, and Thomas Adams, town planning adviser of Ottawa, are collaborating in an endeavor to have plans passed on for presentation to the main committee on re-establishment at the next session of Parliament. The forecast of the plan indicates that both industrial and agricultural possibilities will be incorporated in the model town. It is planned to build homes for soldiers who require treatment to make their cities permanent. In these homes the men will be able to live with their families.

The land across the North Thompson River is now an Indian reservation, but it is understood that arrangements are under way whereby the Indians will be accommodated elsewhere, and on terms satisfactory to them. It is proposed that the Government should acquire the ownership of land after the Indians have been removed. The Government will, of course, build the model homes and generally supervise and manage the running of the colony. The climate on this tract, says a report on the subject, is exceptionally dry and suitable for those suffering from pulmonary troubles. The closeness of the tract to Kamloops makes it possible for the residents of the colony to take advantage of the existing social facilities, while two main ways make transportation and communication assured.

The site of the proposed colony has already been inspected by Thomas Adams, the town planning adviser. Mr. Adams suggests that an immediate report should be made as to the water power opportunities on the tract and on the availability of water for irrigation.

Mr. Adams, in his report, expresses himself as being convinced of the curative possibilities of the proposed model town.

The reserve comprise 32,715 acres and is valued in the vicinity of \$1,000,000. The plan is being supported by members of Parliament, by the city of Kamloops, and by the Great War Veterans Association, and by the hundreds of returned men who are suffering from tuberculosis.

It is expected that the Parliamentary committee on soldiers' civil re-establishment will urge action in its report at the coming session, and it is likely that the spring of 1922 will see a start made toward the construction of the town with all the necessary facilities for treatment and for work.

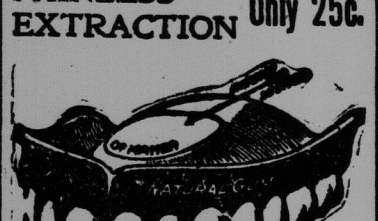

RECORD PARACHUTE DROP.

Girl Dropped 15,200 Feet—"It Was Terrible," She Said.

St. Paul, Minn., July 14.—Miss Phoebe J. Fairgrave, eighteen years old of this city, established what was said to be a new world's record for a parachute drop for women when she dropped 15,200 feet from an aeroplane at Curtis flying field, near here.

It took exactly twenty minutes from the time Miss Fairgrave leaped until she alighted safely in a wheat field. "It was terrible," said Miss Fairgrave, later, "I never want to try it again."

WILL SACRIFICE 30,000 HORSES

Too Expensive to Bring Them from Mesopotamia, They Will be Killed.

London, June 25.—(Associated Press, by Mail).—Horse lovers throughout the country have been shocked by Colonial Secretary Winston Churchill's announcement in the House of Commons that 30,000 army horses in Mesopotamia are to be killed because it is too expensive to bring them home.

It was explained that they are mainly heavy draft horses for which there is no local use, and that they had to be fed on imported fodder. The nearest possible source of food is Egypt, but the difficulties and cost of transportation thence are said to be prohibitive. Shipping men say it costs 240 to 260 to bring a horse from the East to England, not counting horsemen's wages.

The War Office view is that it is better for the horses to be killed humanely and scientifically than to be left in the hands of natives who would not care for them properly, and no one would suggest turning them adrift in the desert.

REAL CHURCH UNION IS DEMONSTRATED

(Toronto Globe.)

A practical demonstration of church union, is the description which the Right Rev. Bishop Reeve gives to the work which is being conducted in connection with the Church of St. Andrew at Centre Island. Although established and carried on under the auspices of the Anglican church, its regular members are composed of members of all the Protestant denominations, for it is the only place of worship on the island. Even the sidesmen and the other leaders in the church work are selected entirely irrespective of denominational considerations.

It is true the form of worship used is that of the Prayer Book of the Church of England, but as Bishop Reeve pointed out in the course of his sermon yesterday, the prayers are practically the same as those used in the churches of other denominations.

Idea is Same.

"The thought, the idea, is the same," he said, "although the phraseology and the way of expressing it may be a little different."

The whole service is adapted to meet the needs of the community, and brought up in that particular communion, the Anglican form of service is followed to follow in the Prayer Book, but this difficulty has been overcome by the acquisition of prayer books which are all of the same and which are distributed among the worshippers. Whoever may be conducting the service is thus able to announce the page on which the particular prayer, psalm or collect may be found. A mixed choir, without surplices or gowns, leads the singing, which is of a congregational character, and a happy choice is made in regard to the hymns, chorales and words of which are familiar to everybody.

To show the extent to which the idea of "union" is carried, it may be mentioned that the Holy Communion, at one time reserved exclusively for those baptized and confirmed in the Anglican Church, may be partaken of at St. Andrew's by full members of any of the other denominations.

Services Are Popular.

A proof of the popularity of the services and the extent to which they are appreciated by residents at the island is the large attendance at the various services. The Sunday school, too, is being very largely attended, and Bishop Reeve has lately had to ask for two more teachers to help in the work.

Of course, in a congregation composed of so many shades of opinion, doctrinal problems are avoided in the sermons, and the simple Gospel message is preached.

CYCLONE CUTS A WIDE SWATH IN ONTARIO

A cyclone of colossal violence cut its way through Niagara township, Ontario, last Friday evening between five and six o'clock, doing \$50,000 damage in a short while. It was somewhat like the cyclone of last fall which passed through that township, only at a different place, doing heavy damage.

The storm seemed to pick up near the Niagara River and smashed its way through Niagara township, two or three miles west of Niagara-on-the-Lake, and going out into Lake Ontario near Port Weller. Its area was about half a mile wide and eight or nine miles long. Great damage was done to the peach orchards. Mr. E. Coleman, a fruit farmer, had a peach orchard of six or seven acres practically wiped out. The trees were smashed off, uprooted, or the limbs twisted off. On H. J. McAvoy's farm there was also heavy loss. One barn, at least, was unroofed.

Great shade trees on the roadside were uprooted and flung across the highways and over the tracks. Strange to say, the wheat withstood the violent wind very well, but oats and corn were laid as flat as if a roller had passed over them. C. P. Coleman, in describing his loss to-night, said it was the most violent storm he ever saw. "Two storms from opposite directions appeared to be meeting overhead," he said. As the wheat is dead-ripe no doubt much grain was shaken out of the heavy heads. Big apple trees were also uprooted.

A NEW BALTIC TRIPLE ALLIANCE

Steps Towards Formation of New Lettish Cabinet to Include Latvia, Estonia, Lithuania and Perhaps Finland.

Riga, June 22.—(Associated Press, by Mail).—Rapid steps toward the formation of a new Baltic triple alliance embracing Latvia, Estonia and Lithuania, which may later take in Finland, are expected by political leaders here to result from the clubhouse at the Polo Grounds on Saturday after being belted for successive home runs by Frank Snyder and Phil Douglas and he has not been seen since by Manager Johnny Evers or any other member of the Chicago Cubs. That home run by Douglas, apparently the last straw for the big sidewheeler, knocked Jim out of the game and also out of the league, at least temporarily. Evers announced last night that if Jim comes back he will draw a suspension for deserting himself without leave. Catcher O'Farrell of the Chicago Cubs was suspended and sent back home yesterday for failing to observe the club's rules.

ONTARIO FARES WELL BY WILL OF MILLIONAIRE

Ontario will get about \$400,000 succession duties out of the \$2,057,000 estate of the late J. L. English, former Chairman of the T. & N. O. Commission. Legacies of \$40,000 to various hospitals will escape, but all other bequests come under the tax for varying percentages.

JAPANESE GIRLS GET GUIDE COUNCIL

Word from Tokio of Spread of Movement in Island Kingdom.

Canadian Girl Guides will hear with deep interest of the formation of a National Guide Council in Japan, where the work has been a long time in progress. At Greenest, a first-class English Guide.

At first the work was discouraging, but it quickly won its way, and the original company of 12 has grown to a membership of 70, and all the girls are keen and active.

The first day was held in Tokio last month, and the time was marked by the presentation of a photograph of herself sent by H. H. H. Princess Mary to the Japanese Guides.

The new guides, who have taken as their daily motto "Guido deservito," "Because We're Guides"—wear the same navy blue uniform as their English sisters.

UNIQUE METHODS FOR KEEPING GOLF COURSE IN TRIM

Washington, July 13.—The drought which has prevailed throughout the country has been a long time in progress, and its possible effect upon the course of the Columbia Country Club, where the national open tournament is to be played, July 19-22.

It was stated at the Columbia Country Club that the course is in excellent condition. The foundation of its present condition is the care which has been given during the past few years to the development of turf on the fairway and putting greens. The latter, watered day and night during the dry spell, were kept their smooth and velvet texture, while the grass on the fairways is of sufficient thickness to withstand the burning rays of the sun.

This satisfactory situation is due to experiments which are unique with the Columbia Country Club, where for many years several tracts have been devoted to the testing out of all varieties of grass in order to secure the best results.

The work on the experimental grass farm has been done by Dr. Walter S. Harban, former vice-president of the United States Golf Association, in conjunction with officials of the United States Department of Agriculture, who have secured valuable data for farm and lawn work.

The ninth green, which is said by experts to be the finest putting surface in the world, was constructed according to what is known as the vegetative process. This process dispenses entirely with the use of grass seed. A variety of grass known as the creeping bent is cut into little bits about half an inch long which are laid upon soil and then covered with a top dressing. The silvers of the grass stem then vegetate and form a smooth turf which, when cropped, is of a soft and silky texture, over which the ball will run without deflection.
