raise our pay.  
We believe that  
what the working-  
man wants is not  
protection and re-  
striction, but more  
freedom and lib-  
erty, not charity,  
but justice and  
fair play. It is  
monopoly alone  
that demands  
protection and  
restrictive ordi-  
nances.  
That the labor  
question does not  
consist altogether  
of strikes and  
lockouts, is a  
memoranda for  
the committee  
of thirty-six, as  
well as for a  
large number of  
our employers,  
several political  
economists, and  
innumerable  
writers and poli-  
ticians, to re-  
collect. After the  
strike and lock-  
out problem has  
been settled, there  
is the working  
man's right to an  
eight-hour work-  
day. This is one  
of the ancient  
rights which has  
been taken away  
from him, and his  
restoration is  
now demanded in  
the bill of rights.

**A MODEL UNION MAN.**  
He takes the labor paper, which he pays for in advance. The United Garment Workers have their label on his pants. He patronizes barber shops that have the union card up. He cheerfully will help a fellow-craftsman that is hard up. He chews union tag tobacco and wears union label shoes. And, if he drinks, you bet it's union label booze. The union label is in his hat he wears upon his head. And when he leaves the bakery it's always on his bread. He has that union label in the pocket of his coat. The unprogressive candidate could never get his vote. His cigars, if he smokes 'em, have the label on the box. And if he could he'd even have it sewed upon his socks. He's got it in his overcoat - you know it without looking. The chef who carries a union card is the one who does his cooking. The store that hires the union clerk is the one he patronizes. The good it does humanity he fully realizes. If he has any printing done it's by a union printer. And union miners dig the coal he burns up in the winter. No fellow mory's pleasure does he ever try to curtail. The label is on the broom he buys and even on his shirt-tail. He attends the union meetings and he helps whenever he can. He lives by the Golden Rule and he's a model union man.  
-Oakland Printer.

**WOMAN LABOR**  
(As Viewed by a Woman.)  
The labor woman to-day in industrial pursuits, means the total destruction of the family life of the workman. The total number of women engaged in occupations in 1890 was 3,712,141, an increase of 2,066,956 or 125.6 per cent. since 1870. Of this number 3,102,606 were wage workers. Women thus engaged are not free from household duties, it simply adds a new burden to her weary lot. She is torn from her family of little ones, who, perhaps, are entrusted to strange hands, or left to run in the streets, while she seeks the factory to aid the husband in securing the daily bread. In place of the family life thus destroyed, the apologists of the present order are pointing to the day-nurseries as compensatory institutions, which, in reality, are only devised for the purpose of accelerating the separating of mothers from their babies. Do not be deceived by such miserable substitutes. The Socialists demand the abolition of the system that makes it necessary for the wife to aid the husband in eking out an existence. This condition of the family is begotten of capitalism. The introduction of machinery has eliminated the necessity of strength and skill, thus opening the way for the employment of women and children, and so making it possible for them to earn their own subsistence. This done, and the wages of the man could be safely reduced to the level of his own keeping (formerly he had to get wages sufficient to support the whole family, otherwise he could not propagate himself and raise up new labor power for capitalist use), and thus compel women and children to turn themselves into instruments of exploitation. This has given the capitalist an added advantage by the increase of labor power in a market already overstocked. Thus our present system destroys the home, the safeguard of purity and righteousness. -Barbara Bandlow.

**THE OBJECT OF TARIFFS**  
We take the following from one of our exchanges:  
What is the effect of tariffs and ordinances upon the working classes? I always supposed that protection was what the working classes needed, and that it helped to raise wages, but having read your editorial on the most ordinance I have changed my opinion somewhat.  
The object of all tariffs and ordinances that affect trade is to favor special privileges and enrich a favored few at the expense of the many, and make it more difficult for the masses to obtain the very things they need. The tariff is nothing more than a piece of legislation similar to that by which a man would seek to life himself with the straps of his boots. The demand for protection comes most vociferously from factory owners and others who claim the right to dictate to the votes of men. The whole spirit of protection is against the rights of labor. And this reminds us of the story of the street car conductor who, when complaining of the long hours he has to work, was asked if it would not be a good thing to have the Legislature pass a law allowing the company to charge more for fares, said: "You might raise the fare to six cents or sixty cents, and they would not pay us a cent more. No matter how much they made, we would get no more, so long as there are hundreds of men willing and ready to take our places. The company would pay higher dividends or water stock, not raise our pay. We believe that what the working-man wants is not protection and restriction, but more freedom and liberty, not charity, but justice and fair play. It is monopoly alone that demands protection and restrictive ordinances.

**1902 1902**  
**WEST TORONTO**  
Your Vote and Influence are respectfully solicited for the Re-election of  
**THOMAS CRAWFORD**  
The Liberal-Conservative Candidate  
As Member of the Legislative Assembly for Ontario.  
ELECTION TAKES PLACE THURSDAY, MAY 29

**ASK YOUR CANDIDATE**  
If there is so much corruption in our present party system of government, as each party charges against its opponents, then as your candidate why he does not support the method of Direct Legislation by means of the Referendum and the Initiative so that the people can vote on measures, irrespective of party affiliations or entanglements? When people can vote on measures on their respective merits, then bribery and corruption will have lost their efficiency and consequently will cease.  
If the gerrymander is such an evil as the politicians represent, ask your candidate why he does not support a system of Proportional Representation by the grouping of constituencies and the Hare-System of voting, so that gerrymandering will be an impossibility and there may be some chance for representation according to the beliefs or desires of the people?  
Also ask your candidate why he does not say a word about our present method of taxing industry. A great deal is said about the taxation of the companies, a matter of no great consequence, but the taxation of industry is of the first consideration for the welfare of humanity.  
If your candidate does not know, then call his attention to the following facts:  
The land speculator escapes all the time with a single tax on the value of the land, but the settler clears a farm and thus converts wilderness into fertility first pays a land tax, then a clearing tax, a fencing tax, a house tax, a barn tax, an implement tax, a drainage tax, a tax on his orchard, his well and on every other improvement. The better he does for the country the worse the country does for him. The man who gives a life of toil to improve the land, the country is taxed as we tax an evil to be suppressed, while the man who makes no improvement, who adds nothing to the wealth or prosperity of the country, is treated as though he were a blessing to be encouraged and supported. By placing taxes on industry and thus keeping down the taxes on the idle land, we discourage the improvement, we place a penalty on the employment of labor, we encourage the dishonest way of gaining wealth, we thus often enable speculators to gain fortunes. Thus by our taxes we divert one man's crop into another man's barn. We fatten the bugs and starve the bees.  
Do worse than that, if worse is possible. Let a town grow and with every increase of the population there inevitably comes an increase in the value of the land. The best lot in this city has reached a value of \$4,000 per foot frontage, equivalent to \$1,740,000 per acre. A hundred years ago this land had no value but with every addition to the population it has kept advancing to its present figure. Year after year the people have been paying a higher and higher figure for the opportunity to do business on that site. Every decade the obligation of the people has grown larger and larger. The more the occupants have paid the more they have had to pay. Thus as the owner of the land grows to greater fortune the occupants are crushed down and kept down by an obligation increasing at the same rate that it matters not how much men improve their methods of production, the mass of the toilers must inevitably be kept close to the home of penury. From this system of taxation come booms and bankruptcies, inflations and depressions, extortions and spoiliations, the home of leisure filled with overflowing luxury, while the house of industry is blighted with penury. Society is thus split in twain, one part must hoist slaves to do everything for the maintenance of the whole. By thus placing men in unjust relationships one to another, the one part degrades, despoils and impoverishes the other part. We lift extortion into the palace and crush honesty into the newly cemented or the hotel, and thus render our civilization in one most important respect a lamentable failure.  
Ask your candidate to let party differences have a rest for a little while and give some heed to this, the supreme question of the day.  
Ask him why it is that while New Zealand, Australia, British Columbia and Manitoba have done something to relieve industry from its excessive taxation, the Government of Ontario, so progressive in other respects, has not taken the first step in this reform.  
Ask your candidate further why he is silent as a tomb-stone as to the iniquitous law which allows land of two acres and more to be assessed as farm land. In this city a number of very wealthy men own about 800 acres, assessed at an average of about \$700 per acre, equivalent to less than \$2 per foot front, while the land occupied by the laboring classes is assessed from \$19 to \$30 per foot.  
Every candidate should be asked what his intention is as to this iniquitous distinction, the "rich man's acres taxed low, the poor man's cottage taxed to the hilt."  
The Assessment Act allows any municipality, if confirmed by a two-thirds vote of the electors on the roll, to exempt any manufacturing establishment for a period of ten years from taxation. This law means that the industry inside four walls can be exempted, but the industry outside the four walls must be taxed.  
Ask your candidate why industries should be thus divided in the arbitrary fashion, so that some may be exempted, as all industry should be, while other industry must be taxed.  
The same act allows the exemption of buildings erected for the storage of ice; but if a building is used for the storage of dry goods or groceries or of a family it must be taxed. When the assessor finds two men erecting buildings, he asks from the first, "What are you going to do with this building?" "To store ice," replies the man. "God bless you," replies the assessor, "good and wise thing."

**REPORT OF THE LEGISLATIVE COMMITTEE.**  
There is at the present time a disposition on the part of some of the aldermen of this city to resort to the vicious system of increasing the water rates so as to reduce the general tax rate. This means that the water rate is to be used as an indirect method of taking more tax out of the users of water so as to give relief to the general property owners.  
When we consider how the rents have advanced in this city during the last few years, we can see at once the injustice of this proposal. There are at present about forty-five thousand buildings in this city, inclusive of offices, stores and warehouses, as well as dwellings. Placing the advance at an average of about four dollars per month, would give an increase of \$180,000 per month or upwards of two million dollars per year. This is the enormous sum that the tenants must pay to the landlords in excess of the sum they paid five years ago. And now some of the members of the Council seem anxious to increase the water rate to give still greater advantage to those whose incomes have been so enormously increased. When we consider the fact that the taxation of this city amounts to about three millions yearly, then the increase of rent to nearly two million dollars yearly is equivalent to giving the landlords relief from two-thirds of their taxes. If some Carnegie had made a present to the city of two million dollars to help to pay the taxation, then the attempt to unload on the tenants part of the taxes by an increase of the water rates would have been looked on as an act of the most contemptible meanness. But now that the landlord class has gained an enormous advantage in one way, they are seeking to gain another advantage by this indirect method.  
It is only proper that a large portion of the expense of the water service should fall on the general rate. A few years ago more than twenty miles of mains were laid in front of vacant lots, thus conferring on each of these lots the advantage of a well and thus enhancing its value. If the water users paid the water, then they would be making a present to every land speculator equal to the addition to that all street watering and hydrant service together with the amount necessary for the fire service should be a charge on the general rate. It would seem, therefore, rather a rash conclusion to say that the whole of the service should be charged against the users. And, seeing the advantage that the landlords are reaping in higher rents, is it not an extraordinary spectacle to witness the efforts that some of the aldermen are reported to be making to add still more to the advantage of the favored class.  
PROVISIONS OF ELECTRICAL WORKERS' DEMANDS.  
To employ none but union men; rate of wages to be not less than 30 cents per hour; eight hours to constitute a day's work.  
All overtime to be paid for at the rate of time and a half.  
No member of the union to act as a contractor for any electrical work. First offence, \$5 fine; second, \$10 fine; third, expulsion from the union.  
Only one helper allowed to every journeyman; no helper to perform any electrical work without a journeyman.  
Sundays and holidays to be paid at the rate of double time.  
To be eligible a journeyman must serve three years as a helper and then pass the examination of the board appointed by the union.  
Agreement for one year, from June 1, 1902.  
If members are required to leave the city on a job railroad fare and board must be paid.  
All tools to be supplied by the employers.  
OVERCROWDED LONDON.  
New York Post: The increase of London's population in ten years has been just under one million, and the census returns just issued disclose some disagreeable truths. For example, London contains nearly 150,000 tenements of one room, and of these nearly 2,000 contain "six or more inmates." It is horrible to think of.

zen, great shall be your reward. You shall escape taxation. It is the ice houses we want." To the second man he puts the same query, "What are you going to do with this building?" "To shelter my family, of course." "Oh, oh," replies the assessor, "you should not do that. We must tax you. You should not have built a home. You should have built a refrigerator." Insist that your candidate shall explain why homes should be taxed and ice houses be exempted.  
Let two men come to this city each with a hundred thousand dollars. You ask the first what he is going to do with his money. "To establish an industry," he replies. "I will employ labor, erect buildings and every working day produce something to add to the prosperity of the country." Very well, then the law replies: "According to your improvements shall you be taxed. You do and he replies: "My intention is to get some land and hold it till the increase of population adds to its value and thus I will gain riches without producing riches." "Very good then," replies the law. "Your taxes shall be kept low." Thus the law piles the taxes on industry, thus discouraging production and encouraging extortion.  
Do not fail to ask your candidate what he intends to do about this iniquitous discrimination. Does he propose to continue the laws that quench prosperity and encourage adversity? Or will he favor a law to remove taxes from improvements? Or allow municipalities local option in taxation?

Or dark or light,  
Or wrong or right,  
The world is made by you!  
Then rise as you've rose before,  
Nor hoped before,  
Nor dared before,  
And show as you've shown before.  
The power that lies in you!  
Stand all as one.  
Till right is done!  
Believe and dare to do!  
-Charlotte Perkins Stetson  
Catastrophes such as that at Maytinoque are not calculated to make a man feel that he is the "whole tip."

**DR. Beattie Nesbitt**  
Dr. Nesbitt has consistently supported the claims of Labor, and if elected, will, in the Ontario Legislature, set on to advocate all necessary reforms in Labor's favor, and will, if time be ready to him, in the representation of those who seek to have a present condition be advanced legislation.  
Nesbitt's Committee Rooms are at 481 Yonge St., 2 Yorkville Ave., 70 Davenport Place, 5 Brunswick Ave., 828 Bathurst St. and 591 Parliament St.  
TO LABOR.  
Shall you complain who feed the world?  
Who clothe the world?  
Who house the world?  
Shall you complain who are the world?  
Of what the world may do?  
As from this hour  
You use your power,  
The world must follow you.  
The world's life hangs on your right hand.  
Your strong right hand,  
Your skilled right hand,  
You hold the whole world in your hand.  
See to it what you do!  
Or dark or light,  
Or wrong or right,  
The world is made by you!  
Then rise as you've rose before,  
Nor hoped before,  
Nor dared before,  
And show as you've shown before.  
The power that lies in you!  
Stand all as one.  
Till right is done!  
Believe and dare to do!
