the St. John Medical Society a short time

Canadian government would not be justified in giving the very large subsidy required for the establishment of a Fast Line unless, in doing so, such time could be made between Great Britein and a Canadian port as would enable mails and passengers to reach their destination more quickly than by the New York liners. This result can only be accomplished by making the shortest ocean voyage and using the railways as much as possible. It would, therefore, be absurd to entertain any proposition to make St. John the port of destination or departure on this side of the A lantic for the Fast precedent in ordinary political changes

itself" indicated to his honor what it limitations of law which ought to have would approve of in the matter. We restrained the Council in its undertakings, hesitate, however, to believe that any and it now seems that leading member special information on the subject has of the late board intended that not only been given to the Transcript upon which the over-expenditure of more than \$1,500 it can truthfully say it bases its intima- on sidewalks and streets, but a first inrailway haul—i. e., the greater the tions respecting either the ex-premier's stalment of the proposed payment to proportion of water, over railway "suggestion" or "the approval of the Mr. McDonald, together with the interbe done. become so familiar.

Town Affairs.

It is satisfactory to the ratepayers of St. John Letter. Chatham that one of the first acts of the new Council was the appointment of a new is angement the subsidized steamers are to land and receive steamers are to land and receive British mails at Halifax, and St. John is made their terminal point on this side of the Atlantic, instead of Portland, as formerly. Reasonable people everywhere would naturally say this was a good policy, based on sound bearing the new assistant superintendent of the asylum, was escorted to the institution on Friday last by Hon. Messrs. The mail service provided for under it to the Provincial Legislature in 1829 and through the forethe category, a plain statement of the town's financial position. The subject is an important, if not a pleasing one, and as it was fully discussed at Monday night's meeting of the Council, the report of the proceedings, which is in another column, will no doubt be of percent. Tweedie and Dunn and installed in his position. Hon. Robert Marshall entered Tweedie and Dunn and installed in his position. Hon. Robert Marshall entered on the feet of pinion in regard to the late council's occurse in determining to make the \$1,500 or more expended on attreets, over and above the regular assessment, an amount to that they are very narrow and shows that they are very narrow and sectional in their views and unworthily igalous as well, because they could heretofore view, with complacency, the steamers touching at their port and proceeding to their destination in a gitator.

The victorian Nurses.

The mail service provided for under it is not a fast one, but similar to that position. Hon. Robert Marshall entered opinion in regard to the late council's occurse in determining to make the \$1,500 or more expended on attreets, over and above the regular assessment, an amount to the they are cooked by boiling, that carrots, if cut at all before boiling should be placed to the late council's are that potatoes, carrots and cabbage, when boiled, should be placed in just enough boiling water to cover them and cooked in as little time as possible. In the excessive assessment next year, which the streamers touching at their port and specified to the test and the products, the trade of pointed and above the policical and above the regular assessment, an amount to our expended on atreets, over and above the regular assessment, an amount to the they are cooked by boiling, that carrots, if cut at all before boiling should be placed to the late council's and cabbage, when boiled, should be placed in just enough boiling water to cover them and cabbage, when boiled, should be placed in just enough boiling water to cover them to the product of the nothern counties, where it properly belongs and preventing the excessive assessment next year, which the late council's method of handling the account of the great tire of liverally and enterprise." This is occurse in determining to make the \$1,500 or more expended on atreets, over and above the regular assessment, an amount to the they are cooked b

meet with general approval.

The fact is now developed that after properly placing the cost of undertakings entered into by the late Council under the law authorising the bond issue, and the late of the presence. In other words it has lightly iter for extras on the public build.

An evening paper publishes a column article laudatory of an alleged "fortune teller" who has recently honored the city great pains to write up his facts. He wrote with a vigorous pen, with considerable distributions for extras on the public build. The smusing parts of the controversy consists of the prominence given by the Sk John-Sun and Telegraph to Messra. S. D. Scott and James Hannay in connection with it. Mr. Scott, who is editor of the Sun, informs the readers of that paper, with more or less regularity and gravity, that Mr. Hannay, has, in bygone times, maile grave attacks upon gentlemen who are supposed to control that paper, as well as upon its independence and loyalty to St. John's interests. On the other hand, Mr. Hannay observed the Mr. Scott, when on the staff of the Halifax, Hernald, was accustomed to attack St. John in divers ways. The inference which each of these gentlemen appears with some consists of the proposed to control that paper, as well as well as a missing and deaction must necessary. The inference which each of these gentlemen appears with consists of the proposed to control that paper, as well as well as a missing and deaction must necessary. The proposed to control that paper, as well as well as the well and the staff of the Halifax Hernald, was accustomed to attack St. John in divers ways. The inference which each of these gentlemen appears which each of these gentlemen appears which each of these gentlemen appears with consists of the papear of the building is to the water from the proposed to control that paper, as well as each of the staff of the Halifax Hernald, was accustomed to attack St. John in divers ways. The inference which each of these gentlemen appears which each of these gentlemen appears and the safe to take its form the river, but he did form the proposed to control that paper, as well as a water from the proposed to control that paper, as well as a water of the water had not constitute the control of the paper of the federation of the staff of t

John in divers ways. The inference which each of these gentlemen appears to wish his readers to draw is that the other is merely a mercenary writer who will either praise or condemn as his employers dictate. This branch of the controversy may be very interesting to St. John people, but it strikes outsiders as rather "small potatoe" in the discharge of his official duties, in fluenced by politically influenced, and even governors, journalism, which is not calculated to the controversy, which is not calculated to the controversy, which is not calculated to the controversy which is not calculated to the controversy which is not calculated to the controversy in the controversy in the controversy way be very interesting to St. John people, but it strikes outsiders as rather "small potatoe" in the discharge of his controversy, which is not calculated to the controversy ways in which men may be obtained and the controversy ways in which men may be obtained and the controversy ways in which men may be obtained and even governors, journalism, which is not calculated to the controversy which is not calculated to the controversy which is not calculated to the controversy ways in which men may be obtained and the controversy ways in which men may be obtained and the controversy ways in which men may be obtained and the controversy way be very interest. The discharge of his official duties, in the discharge of his official and insects, with notes on some of the trees and other duty down. Lawlor who looks up "Cooney's History" will have been
