Infection from Animals A phase of By Ald Snowball:-By-laws and License: the question in which farmers are partic--Ald Maher, (chairman) and Ald. Watt ularly interested was discussed by Dr. Ravenal, an eminent United States authority, who is assistant medical director of the Henry Phipps Institute at Philadelphia, in an able address on "Animal Tuberculoses in their Relation to Human Health." Dr. Ravenal detail By Ald. Morris: -Police Ald, Morris ed with exactness the advancement made (chairman) and every other member of in the study of consumption since Koch of Berlin made h s famous discovery of mittee bills and Ald. Watt a number of the course of many years experimenting Public Works Committee bills which were he had not found any animals that were immune from tuberculosis. The lecturer vigorously combatted the opinion of Koch and others that there is an essential difference between human and begins tuberculosis, and cited a large number of experiments in support of his view that these were prat cally idea t cal. While admitting that the unj r.ty of cases of consumption were due to infection by inhelation, he claimed that a considerable 10 percentage could be definitely traced to 10 infection through the digest ve tract by 10 ned, part cularly milk and meat. The 10 few figures available seemed to indicate Potted that about 25 per cent of children's cases we e due to the later cause. He had no knowledge of any case of an adult becom ig consumptive in this way. In conclusion, D . Ravenal u gel that while i important to educate the public, te build sanatoris, and to establish large institutes for the treatment of advanced cases, the whole duty of prevention was

not being done if the possibility of infecton from animal sources were neglected. The speaker was most favo a sly receiv
