Montreal 0300002X—8 14 1
Batteries—Mahaney, Gittings and Reynolds; Cadore and Madden.

MAPLES HAD EASY WIN FROM THISTLES

Last Night's Game in St. Peter's League Was Interesting, Even if One-Sided.
The Maples were outclassed completely last night by the Thistles in their little argument on the St. Peter's ground. The session lasted for seven weary innings and consumed nearly two hours. Mahoney started in the box for the Maples and did very well the first inning but after that the Thistles found him and in the third he was replaced by H. Dever. Doyle handed them up for the Thistles and his opponents were only able to make three hits off his delivery. The team was all behind him and put up a good exhibition. He handed out six passes and struck out four men but was there with the goods in the pinches. The final score was 14 to 1, in favor of the Thistles.
Following is the score by innings:
Thistles 0 3 6 3 0 1 1—14
Maples 0 0 0 0 1 0 0—1

NEW BOND ISSUES FOR LAURENTIDE POWER

Special to The Standard.
Montreal, July 10.—Announcement is made that the Laurentide Power Company will shortly make an issue of \$3,500,000 5 per cent. bonds due in 1946. The issue, it is understood, will be made simultaneously here and in New York.
The bonds will be issued at 90. It will be recalled that at the time this company made its last issue reference was made to the exceptionally low bonded debt, which was equivalent to 60 per cent. of the value of the assets. The smallest bonded debt of any similar company.

NEWS AND

REVIEW OF THE WEEK
IN GROCERY TRADE
Molasses Strong—Beans Very High—Flour Situation Looking Up.

Toronto, July 6.—The event of the week in so far as the grocery trade and the public too, are concerned, is the arrival at last of a considerable quantity of molasses. This reached Montreal this week; it has been expected for some time. The molasses situation has been exceedingly strong for some months and it is not expected that there will be any immediate ease in the market just because a certain amount of molasses has come in from Barbados. It will probably take some time before prices adjust themselves to lower levels, and indeed the arrival this week of the consignment did not appear to be weakening at all. Hitherto, the only way in which purchasers have been able to secure molasses has been merely to obtain a percentage of what they ordered. There will, however, now be enough to go round the country. The situation in beans gets worse and worse. As time wears on the old stock becomes less and less sufficient for the unusual demand upon it. The crop was so slim to begin with and export demand, as well as a fairly heavy domestic demand, have been too much for it. After a period of some months in which prices for white beans have been inordinately high, these levels are stronger today than ever. There are hardly any prime beans in sight. A somewhat unusual situation is further complicated by the fact that in late years the trade has been educated to look for a good quality of beans. This being so, they are not satisfied with the poorer quality, calling loudly for No. 1 stuff. There are fairly adequate supplies of second grade beans, but No. 1 quality is conspicuous by its absence. As the months wear on the situation is bound to get more and more unbearable inasmuch as the new crops will be about one month late. Rain and bad weather generally have interfered and it is not expected that the crop will be harvested until November. The present supplies will certainly expire before that date. It is perhaps somewhat surprising that beans have been so scarce in view of the fact that western Winnipeg Japanese beans have been coming in there. The reason why these came in at all was because Ontario's this year were of such poor quality and Japanese beans—themselves of poor quality—had a chance. However, Japanese beans are now practically off the market. West of Winnipeg the beans which are selling are Michigan beans and these are as scarce as Ontario's. The flour situation is now looking somewhat and cables for western flour have improved this week. Some further business has been registered on old country account. Winter wheat flour, however, is still unsatisfactory for an export point of view. The reason why flour generally is picking up a little is presumably because ocean freight rates are now more acceptable. They have, of course, materially decreased and indeed one would suppose that the reduction which has occurred would have stimulated business in flour for export accounts to a much greater extent than has been the case. However, this week's activities may be the beginning of a prolonged process of building-up business in flour again. There is a good demand for rye wheat flour for export and also for barley, which may be for domestic account, or again for shipment overseas. Both rye and barley are somewhat scarce at the moment and there is consequently a firmness in these commodities which is somewhat foreign to the cereal market of the last few weeks.

The situation in cheese, both in Canada and in England, is again weaker and prices are down very slightly from the levels registered last week. It is said that at the moment there is a good deal of cheese in England, and cables are not so frequent, nor do they contain as cheerful a desire to accept exporter's offers as was the case some little time ago.
