

### PULP NOTES.

Darblay, Pere & Fils, of Paris and Rouen, one of the largest pulp and paper-making firms in France, have had agents in New Brunswick recently making arrangements for a supply of spruce for pulp-making.

The following figures show the quantity of pulp exported from Montreal to Great Britain in the past five months: May, 6,528 rolls; June, 15,731 rolls; July, 16,593 rolls; August, 30,553 rolls; September, 8,422 rolls.

An Australian correspondent writes to an exchange as follows: Orders have gone forward from here for pulp for paper mills in this country, and correspondence is in process respecting paper. The paper will follow in the wake of the pulp. A proprietor of a leading newspaper said the other day, "When a representative of a Canadian paper mill comes here I want to see him."

A party of Montrealers, including Messrs. Herbert S. Holt, president of the Montreal Gas Company, Lieut.-Col. Whitehead, George F. Hartt, R. D. McGibbon, Q.C., Edgar MacDougall, William F. Robinson and Mr.

J. W. Houston, of New York, counsel for the Westinghouse Electric Company, recently inspected the pulp mill and new works of the Laurentide Pulp Company at Grand Mere, Que.

A plan is mooted which shall consolidate the big paper and pulp mills of the United States. The mills interested in the consolidation are the Glen's Falls Paper Mills, the Otis Falls Pulp, the Fall Mountain Paper, the Niagara Falls Paper, the Ticonderoga Pulp and Paper, the Hudson River Pulp and Paper, the Montague Paper, the Turner's Falls Paper, the Olcott Falls, the Winnipegosis, the Glen, the Berlin Mills, and the Falmouth and Rumford Mills Companies. The total capital will be about \$22,000,000.

## WHY BAND SAWS BREAK

SIXTEEN

REASONS,

AND HOW TO

AVOID THEM

Being instructions to filers on the care of large band saw blades used in the manufacture of lumber.

A book filled with valuable information on the care of band saws. Giving the reasons for breaking; analyzing each reason; giving instructions to dispense with the causes as laid down in each reason; and full details on filing and brazing. The proper styles of hammers to use are illustrated and described, and views of blades showing the blows of the different styles of hammers form an important part of the illustrations. Improper and unequal tension are then treated, and the manner of properly setting irregular teeth is described. In connection with the treatise is a history of the invention, manufacture and use of the saw from its origin to the present time. The work in whole makes an accumulation of information such as has never before been published.

The book is printed on fine paper, good clear type, and is handsomely and substantially bound in cloth. It will be sent to any address on receipt of the price, **ONE DOLLAR.**
