THE FARM.

Flavor of Butter. The butter flavor is not only very evanescent, but is very delicate. Few persons can thoroughly appreciate it. The great majority of eaters of butter would be unable to distinguish a first class product from a butter which is rancid by an expert would rank below it.

THE RUSSIAN THISTLE. A Description of the Plant Which is Causing the Dakota Wheat Farmers so Much Trouble. At maturity the average plant is two to three feet in diameter, weighs, when dry, from two to three pounds. It is estimated to bear about 25,000 seeds. It breaks from the ground in cold weather and is blown rapidly over the surface by the winds, scattering its seeds as it goes.

Work for Rainy Days. By far too many farmers and their laborers consider the rainy days as sacred to rest and inactivity. The thrifty, successful farmer, however, usually has plenty of dry work planned for this inclement weather.

HE IS IRRESPONSIBLE. Debs, the leader of the Great Strike, said to be a dipsomaniac. The New York Advertiser says—Dr. S. Robertson is one of the New Yorkers who knows something of the antecedents of Eugene V. Debs. Dr. Robertson, who is a specialist in nervous diseases, treated Debs in April, 1892, for a serious case of dipsomania.

Honors from the Crown. It is not to the discredit of Lord Rosebery that on the occasion of the Queen's 75th birthday, the honors of baronetcy and knighthood were conferred so wisely, and for the most part, upon persons who have been public benefactors, says the London Independent. Among them were Samuel Montague, distinguished for his benefactions to the Jews and the poor generally at the East End; Mr. J. Austen, whose munificence to the town of Hull has been conspicuous; Mr. T. G. Coates, the thread manufacturer, who has been noted for his princely generosity, and whose family has lately erected a memorial church to his father, at a cost of half a million dollars; Mr. Mansfield, a philanthropist and model employer; Mr. Isaac Pitman, the venerable originator of a system of shorthand, Mr. George Williams, who founded the Young Men's Christian Association, and who is a munificent supporter of Christian education; and Mr. Richard Tangye, who with other members of his engineering firm at Birmingham, are reported to have given \$1,250,000 for educational, religious, artistic, and philanthropic purposes for the benefit of his town.

Profit and Loss on the Farm. When a man uses an acre of hundred dollar land for growing a ton of hay, worth on the farm only ten or twelve dollars, it is a confession that he has more land than he can properly utilize. The business of growing hay is all right, but the product should be at least two tons per acre, and can be made so by proper methods.

Setting Fence Posts. Posts that are to be placed in a clay soil which is liable to heave by the action of frost, will retain their original position longer if they are set in dug holes instead of being driven. Unless all the sharpened portion is placed below the action of the frost, and even then, if at the time of freezing the soil is soaked with water, the action of the frost will heave the posts upward.

Can't be Helped. Book-keeper—"Six more of our dunning letters have been returned by the Dead Letter Office, and postage had to be paid on them." Tailor—"It can't be helped." "If your envelopes contained your name and address, they would be returned without expense." "Yes, but then the people who receive them wouldn't open them."

A NEW RAILROAD TIE.

The Rail Clamped into Position and Repairs Easily Made. An inventor has patented a new form of old steel rails which are selected, all the rails being discarded. These rails are run at white heat through rolls especially designed for the purpose. Upon coming through the rolls and being sheared to the desired length for street or steam railroads, the tie is plunged into a vat of boiling tar, where it remains for several hours, taken from this vat it is punched as may be desired to suit the flange of rail to be used upon it.

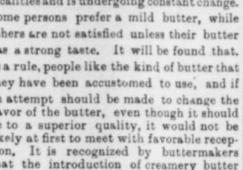

Fig. 1.—ONE CLAMP REMOVED TO DISPLACE RAIL.

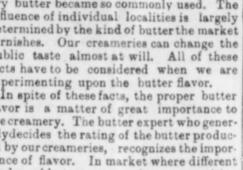

Fig. 2.—SIDE VIEW. The form of the tie is clearly shown in Fig. 2. The rail is held to the tie by the tie being heated and expanded.

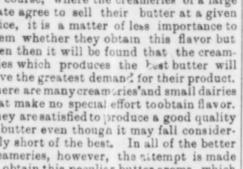

Fig. 3.—TIE WITH RAIL CLAMPED IN POSITION. clamps as shown in Figs. 1, 2 and 3, and to remove the rail it is only necessary to loosen one of the clamps.

LACROSSE IN CANADA.

When the National Game Originated and How. The history of lacrosse in Canada dates back a great many years, when the game was first played by the Indians and although it has changed slightly in minor details, it is still as exciting and exhilarating as when first played by the original owners of the soil. The first record of its existence as a white man's game was that in 1840 a club was formed in the city of Montreal, which played matches with the Indians, though they may have been inferior to the red men, for it is recorded that they captured but one match. Of the Montreal club's history, but little is known, except that it did not thrive in its early days.

For Over 50 Years. Mrs. Winslow's SCOTCH SYRUP has been used by millions of mothers of children while teething. If disturbed at night and broken of your rest by a child suffering and crying with pain of cutting teeth, send at once and get a bottle of Mrs. Winslow's SCOTCH SYRUP for Children Teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no other remedy so safe and so effective. It cures the Stomach and Bowels, cures Wind Colic, soothes the Gums and reduces inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's SCOTCH SYRUP" for children teething is pleasant to the taste and the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's SCOTCH SYRUP." In 65.

Natural History. "She has become quite a butterfly of fashion," said one girl. "Positively dazzling," replied the other. "And yet her father started as a small corner grocer!" "Yes, you know we earned at school that it takes the grub to make the butterfly."

WHENEVER I see Hood's Sarsaparilla now I want to bow and say "Thank You" I was badly affected with Rheumatism and Neuralgia. Hood's Sarsaparilla cured me, covering almost the whole of one side of my face, nearly to the top of my head. Running sores discharged from both ears. My eyes were very bad, the eyelids so sore it was a painful opening or closing them. For nearly a year I was deaf. I went to the hospital and had an operation performed for the removal of a cataract from one eye. One day my sister brought me Hood's Sarsaparilla which took, and gradually began to feel better and stronger, and slowly the sores on my eyes and in my ears healed. I can now hear and see as well as ever. Mrs. AMANDA FAIRBANK, 170 Lander Street, Newburgh, N. Y.

Thumb-pruning Trees and Shrubs.

"Nip it in the bud," is an old saying, but contains a remarkable amount of good common sense, and when the application is made to tree growth, it is of great importance as regards the future shape, value and health of the tree. Upon the large limbs and trunks of trees, buds are pushed forth that, if not removed in the early stages of growth will cause an unsightly tree. If left several years before removal, it may result in the decay of the tree at the point of removal, or, if allowed to grow and become a part of the tree, will often make a difficult matter to reach among the limbs to gather the fruit. All of this trouble may be avoided by promptly pinching or rubbing off the out-of-place buds as soon as they appear. On trees planted only a few years, this is an easy matter. An active man will hand-prune many small trees in a day's time, and it should be done several times each summer, so that these succulent growths are not confined to spring or early summer.

A BIT OF HISTORY.

How George III. Treated the "No Popery Riots" in London in 1786. The dreadful rioting and destruction of property in Chicago and elsewhere in the States, and the accompanying loss of life, have been mainly the result of the authorities abstaining from vigorous action at the commencement of lawlessness. The calamitous state of affairs shows how little those who are in authority profit by the stern lessons taught by history. The universal experience of the Old World has shown that, apart from the questions of right or wrong, it is wiser, and by far the most merciful method of dealing with such rioters, to use the strong hand at the very commencement. Common sense teaches us that it is very easy to stamp out

THE INCIDENT SPARK. but that it is the height of folly to allow it to grow to a big fire before endeavoring to extinguish it. London, England, had in 1786 (114 years ago) a similar experience to that of Chicago. In that case, through the moral cowardice of the authorities, the mob was largely composed of the criminal classes, rioters for nearly a week, and practically dominated London.

The British Government had brought in a bill to relieve the Roman Catholics from certain disabilities, and designing men working upon the passions of ignorant people brought about the "No Popery Riots." The leader—Lord George Gordon—was more than half insane. He subsequently turned Jew. At one time there were 300 men raging, and hundreds of houses, including many mansions, were burnt. First and last property exceeding £1,000,000 in value was destroyed. Fortunately the atmosphere was still or the greater part of London would have been burnt.

Tenant Houses on Farms. Every large farm should have a tenant house conveniently located on the premises. Even for a smaller farm, where the owner is obliged to depend upon hired help to some extent, a tenant house will prove a good investment. It is a permanent investment, and adds that amount to the value of the property. The farm laborer living therein can get his meals at home, thus saving that much extra work for the farmer. Personal matters can then be handled over by a landlord or other little man, perhaps a stranger, in present, which will make many dollars difference in your favor at the end of the year. The tasks planned for rainy days should be such as can be done under, or near to, shelter. In the latter case, the attention to details that will make many dollars difference in your favor at the end of the year. The tasks planned for rainy days should be such as can be done under, or near to, shelter. In the latter case, the attention to details that will make many dollars difference in your favor at the end of the year.

Herolism Among Small Children. A few weeks ago we recorded the award of a medal by the Massachusetts Humane Society to a girl of 7, in Lynn, who had saved from drowning another lass of the same age, says the Boston Transcript. Notable as the action was, it is interesting to hear that such incidents are common, though they have not always commanded recognition from the Humane Society. A correspondent in Essex sends us two items which show that the noble qualities of human nature may be developed, or at least manifested, at a very early age. About a year ago some boys were playing on the railroad when an express train came along. The whistle was sounded and all but one little fellow got off in ample time, the one left being but 3 years old, and, of course, unable to appreciate his danger. One of the boys, 10 years of age jumped for his life, and pulled him away just as the pilot of the engine brushed against his clothing. The engineer said: "When I saw the bigger boy jump for the smaller boy, I thought that there would be two killed, instead of one." On a recent winter day a boy of 6 fell through the ice, and another boy, aged 10, catching him by the collar, tried to pull him out; but was not strong enough, so he called for another boy, a lad of but 8 years, years, and with his own hands he saved his companion. They were all in a peculiarly perilous position, and the wonder is that any of the three escaped alive; yet, with the indifference to danger characteristic of most boys when their sympathies are aroused, they spoke of the venture as though there was nothing remarkable about it.

Emperor William will probably be the czar's guest at the northern army maneuvers, which will be held around Smolensk. Some menagerie as if there were an even chance the inevitable might not occur.

RHEUMATISM CURED IN A DAY.

South American Rheumatic Cure for Rheumatism and Neuralgia radically cured in one to three days. Its action upon the system is remarkable and mysterious. It removes at once the cause, and the disease immediately disappears. The first dose greatly benefits, 75 cents. Warranted S. Feed & Co.

SOCIETY CARDS.

MURRAY LODGE No. 308, BEAVERTON, ONT. Meets 1st Tuesday on or before full moon in their hall, Simcoe St., Beaverton. A. GRANT, M. D. F. S. KING, Wor.-Master. Secretary.
