Gossip.

The Hallman Sale on May 23.

There is perhaps no breeder of Holstein cattle in Canada who is more favorably or widely known than A. C. Hallman, proprietor of the Spring Brook herd of cattle, advertised in our last issue for dispersal by public auction at the farm, Breslau, Ont., on Wednesday, May 23. As a breeder, Mr. Hallman has held a prominent place almost since the breed was first known in Canada, and as judge at all of the larger exhibitions his services have been sought more than those of any other one breeder in the Dominion. Exhibitors who have come out year after year before Mr. Hallman know that one type and one only would meet with his approval which at all times had to measure up to a certain high standard. In the Spring Brook herd, too, every animal has had to approach somewhere near this ideal and in this offering for May 23 we believe our readers will appreciate the size and all round smooth conformations that Mr. Hallman is putting up, absolutely without any reserve. Most of the more mature breeding females in the herd are descended from the Netherlands, Artis, Lady Fay, Clothilde and Aaggie families, imported by Hallman & Company in the early eighties, and in every single instance only the very best herd sires procurable were used. These descendants, which now make up all of the more mature cows are just a few years in advance, in so far as breeding is concerned, of the majority of herds which have been founded in more recent years. The younger females in the sale including nearly everything up to the four-year-olds are from this old foundation stock, and sired by the present senior sire in service, Sir Korndyke Boon, a son of Pontiac Korndyke and Fairview Korndyke Boon, a 32.17-lb. show cow that has never tested below 4.65 per cent. Sir Korndyke Boon is one of the strongest bred Pontiac Korndyke bulls in the world to-day, a grand individual and in all will have over 20 daughters in the sale. In addition to these there will be a number of granddaughters as well as 10 young sons including several show calves that are now ready for service. The majority of his daughters will be fresh or safe in calf to the junior herd sire, Sir Echo Posch, which will also be in the sale, subject to a reserve bid. This is one of the finest individual young sires in service in Canada, and his sire, Inka Sylvia Beet's Posch is also the sire of May Echo Sylvia, the champion milk producer of the world. His dam is May Darkness Echo, a 22.57-lb. three-year-old daughter of Sir May Darkness, the sire of Lulu Keyes, 36.40 lbs and other high-record cows. It is not often so close a combination of Pontiac Korndyke and May Echo blood can be found as the offspring of these daughters of Sir Korndyke Boon and Sir Echo Posch will contain. For full particulars regarding individual records, etc., write for illustrated catalogue and mention "The Farmer's Advocate". Remember everything in the herd is to be sold with the exception of one female from each of Mr. Hallman's individual families.

I went to the theater
With a lowbrow friend,
And the orchestra played
"Little Brown Jug",
And he thought
It was the national anthem
And stood up.
And I did, too,

KEEP YOUR HORSES IN PRIME WORKING CONDITION

SOUND legs pull big loads. No horse with a Spavin, Splint, Curb, Ringbone, Bony Growth or Sprain, can do itself justice. Thousands of horsemen have been keeping their horses sound by using Kendall's Spavin Cure—the old reliable, safe remedy. Mr. Maurice Wayville, Amherstburg, Ont., wrote on April 30th last—"I cured a jack spavin with two bottles of your Spavin Cure. I am just taking off a bog spavin. It is the best liniment for sprains you can get for man or beast. I would like to have a copy of your 'Treatise on the Horse'."

KENDALL'S SPAVIN CURE

acts quickly, leaves no scars or blemishes, and costs little—\$1. a bottle—6 for \$5. Get our valuable book—"Treatise on the horse"—free at your druggist's, or write us 111 Dr. B. J. KENDALL CO., ENOSBURG FALLS, VERMONT, U.S.A.

Make Your Crops Touch a New High Mark!

An experiment in 1913 on loamy soil showed that the limed portion of the land gave 1,865 lbs. of corn, while a similar piece—unlimed—gave only 690 lbs.

Lime is being used more and more, to correct the soil and get bigger, better results. Try an application of
