Fill Your Silo Quicker With Less Power

All the latest improvements are embodied in the various sizes of feed cutters we make. Dangers of breakage at high speed are eliminated, and our feed cutters can handle the largest quantities of corn in quick time and with the least power.

Peter Hamilton Feed Cutters and Silo Fillers

have convinced many farmers that they positively stand the test of hard usage. The frame is well built of thoroughly seasoned timber which is always tight and rigid.

Our Ensilage Cutter and Blower, (as illustrated) will easily handle 8 to 10 tons of corn per hour. The cast iron Fan Case will withstand the hard wear of the corn passing through at a tremendous speed far better than a steel case will.

A splendid feature of our Ensilage Cutter and Blower is the solid steel knife and blower wheel, which cannot break or blow to pieces from excessive speed or by the entrance of a stone or other foreign substance. The wheel weighs 150 pounds and gives great momentum for heavy cutting.
