

Not so with a NEPONSET ROOF

THIS is a portion of an illustration recently used to demonstrate the superiority of metal over wood shingles as a protection against the elements.

It shows the wind ripping great holes in the wood-shingled roof. No such comparison could be made as between a metal roof and a Neponset Paroid roof.

NEPONSET PAROID

is impervious to rain, sun, wind or hail, and gives assured protection to farm buildings. There are many instances in which a Neponset Paroid roof has stood the test of every variety of weather condition for more than twenty years and is still water-tight.

If you consider roofing, don't experiment, don't waste your money—start right in the commencement and use a roofing material that relieves you of all future cares and worries—specify Neponset Paroid and be sure you receive Neponset—the name that spells honest roofing satisfaction.

The base of Neponset Paroid is a high-grade rag felt thoroughly impregnated with asphalt, making it positively water-proof and fire-resisting.

It is further reinforced with a talc surface, grey in color; or with a permanent slate surface, red or green in color.

EASY TO LAY—With every roll of Neponset Paroid is supplied sufficient nails and cement with full directions.

There is a Neponset dealer in your district. Write us for his name and a copy of our illustrated booklet "Roofing Canada."

BIRD & SON, LIMITED, Hamilton, Ont.

"Canadian money, Canadian made, should be spent in Canada for Canadian trade."

NEPONSET ROOFS

Over 35,000 Tons SYDNEY BASIC SLAG

Over thirty-five thousand tons of

delivered to Canadian farmers during the past season. The railway cars required to move this vast quantity of fertilizer would make a train over eleven miles long. If loaded on wagons, two tons to a load, the wagon train would be seventy-five miles in length. More than ninety-five per cent of this went to farmers who had used the goods before. Just think of it. What better proof of its merits do you want?

There is nothing to equal BASIC SLAG for top dressing grass lands. It would pay you handsomely to give your pastures an application this fall. Let us send you a trial lot—when you have seen results you will want more. Write at once so we may have time to take care of you.

Interesting literature free on request.

Every Home Can Have An Indoor Toilet

THE old-fashioned out-house is not only the greatest disadvantage of country life, but also a serious menace to health.

A very small investment will rid you of its inconvenience, discomfort and disease danger.

The Kaustine toilet is placed indoors. Chemical sterilization and scientific ventilation make it a thoroughly efficient sewage disposal system.

It is the standard used all over the continent wherever high cost or lack of water supply make a water-plumbed installation impractical.

Only a few hours' job to install. Needs very little attention.

If you value health, comfort and the self-respect of your family you will write for literature on the Kaustine system of sanitation NOW.

The first principle of health is proper sanitation. No home, school or public building can be healthy unless there is an efficient indoor toilet.
