A MOURNFUL MISFIT. The Man Who Has a Genius For Bo

"There goes a man," said a Cana treet philosophic, "who has made a fall street philosoph.c, "who has made a fallure of life in spite of exceptional equipment for success. He is honest, affable, highly educated and industrious as a beaver. He has no had habits, and I couldn't name a man in New Orleans who possesses a kindlier disposition, yet he is continually out of a job and is studiously avoided by everybody who knows him. The mysterious part of it is that nobody can tell you just why, and the poor fellow doesn't understand it himself. He is beginning to think that somebody has worked a rabbit's foot on him, but the secret is really this:

has worked a rabbit's foot on him, but the secret is really this:

"He has a genus for the inopportune. By some malign freak of fate he always says and does the wrong thing at the wrong time. It is not lack of tact; it is destiny. For example, I like him, but he never called on me in his life that his visit wasn't highly unwelcome. He is morally certain to drop is just is time to catch one doing something foolish or discreditable, and you know how we hate the innocent chance witness of our follies.

"He made a mortal enemy of Colone "He made a mortal enemy of Colonel because he happened to walk into his office while the old man was dying his mustache. He chanced on a certain prominent lawyer smirking before a mirror, rehearsing an impromptu after dinner speech, and the prominent lawyer got even by knocking him out of a valuable contract. Those are two cases out of dozens. He never gossips or tattles, but the mere fact that he has seen things he oughtn't to see and heard things he oughtn't to hear makes his very presence embarrassing to the other fellows.

"It's most unfortunate, and all fate. If he were introduced to a man whose grandfather had been hanged he'd be absolutely certain to begin talking about

he were introduced to a hind words grandfather had been hanged he'd be absolutely certain to begin talking about rope inside of two minutes. As I said before, he has a genius for the inopportune. My wife loathes him because her false frizzes blew off on the street one day and landed on top of his umbrella. He had nothing whatever to do with either the frizzes or the elements, but now I can't ask him to my house. Terrible to be under such a curse, isn't it?"—New Orleans Times-Democrat.

Franklin Should Be the Patron Saint
of Housewives.

Every housewife is supposed to know
how to handle a broom, but it is safe to
say that not one in ten has any clear idea
of what her sweeping utensil is made of
or how it is made or where the material
came from. Brooms are made from the
heads or brushes of the broom corn, a
first cousin of eur common field corn.
And in this connection is told a very
pleasant little fairy story concerning
Benjamin Franklin. "Poor Richard," by
the way, seems to have been about the
biggest jack of all trades that ever helped
the United States to become the richest
and most powerful antion of the world.
If this story is true, he is the patron
saint of the housewife and the broommaker, as well as a kitedier, lightning
catcher, printer, publisher, editor, author,
philosopher, statesman and other things
"too numerous te mention."

Now, broom corn first grew in India.
From there it was carried to Europe.
The story goes that Dr. Franklin was examining a whisk broom that had been
brought over from England in the days
before we had any broom corn of our
own. He found a single seed on the
broom, picked it off, planted it and raised
a stalk of corn *som which is descended,
so to speak, all the broom corn of the
United States.

However this may be, broom corn
grows much like its first cousin, our
maize, which originated here. The head
is larger, however, and the seeds grow on
the head instead of in ears. The heads Franklin Should Be the Patron Saint

maize, which originated here. In the series larger, however, and the seeds grow on the head instead of in sars. The heads are cut off, leavips about six inches of stalk, and the seeds are scraped off by a machine which does a clean job and does not injure the broom. The seeds are valnot injure the broom. The seeds are val-uable in a way. They are fed to horses and poultry and ground into meal for cat-

In the making of the broom the corn is In the making of the broom the coal is put around a handle of basswood or soft maple turned in a lathe. Each layer is wound tight with twine or wire until the desired size is attained. The broom is then pressed out flat and sewed to keep it in that shape. Whisk brooms are made

Pleasant Memories. fitting soil in a single hour. A kindly look and word to a young child may be the seed of glad and grateful memories to that child for a lifetime. An assurance of sympathy in time of sorrow and need to one who is heavily burdened may fix remembrances for all coming years of the remembrances for all coming years of the loving heart that gives its expression. The seed sowing is of the hour. The harvest is continuous and unending. Now is the time to sow for that harvest. The sowing is deliberate, the growing and reaping are unconscious and involuntary. There is no harvest where there was no sowing. If we neglect to sow now, others may never reap from our good labors.

Mrs. Smith repeatedly reminded her husband that the silver was hers, the furniture was hers, and so on, until poor Smith almost wished he had married a girl without a penny. The other night Mrs. Smith awoke to hear strange voices in the lower part of the house and, vigor-basely nunching her husband in the ribs, Mrs. Smith awoke to hear strange voices in the lower part of the house and, vigorously punching her husband in the ribs, called: "John, get up! There are burglars down below!"
"Eh?" inquired Mr. Smith sleepily.
"Burglars—down stairs!" shricked Mrs.
Smith.
"Burglars?" said Smith as he turned over. "Well, there's nothing of mine

KIDNEY DISEASE.

of all my will-power to keep awake. In a short time I was attacked by sharp piercing pains, which shot through the lower part of my back. At first this did not trouble me very much during the day, but at night the pain became almost unen-durable and often I would not close durable and often I would not close my eyes throughout the whole night. Gradusly a nauses and loathing for food developed. Sometimes I would sit down to a meal with a keen ap petite, but after a mouthful or so had passed my lips, sickness and vomiting would follow, I became greatly re-duced in flesh and in a short time was but the wreck of my former saif. The but the wreck of my former self. The doctor said the trouble was disease of the kidneys, but his treatment did not help me. My mother who was some-thing of a nurse, urged me to try Dr. Williams' Pink Pills, and at list to satisfy her more than from hopes of being cured, I took up their use. After taking one box I seemed better and I resolved to try another. Before the second box was used my condition was mproved beyond gainsay and I felt sure the pills were responsible for it.

I took two more boxes and before they I took two more boxes and before they were all used the pain in my back had wholly disappeared, my appetite had returned and I felt like a new mar. For the sum of two dollars I cured myself of a painful disease. There cannot be the least doubt but that Dr. Williams' Pink Pills was the sole cause of my recovery, and I consider them the best medicine in existence.

LETHBRIDGE.

DEAR SIR.—Since my return to Athens after a year's residence in Lethbridge, Southern Alberta, I have been besieged with questions relative to the climate, soil, and general phy-sical features of that district, and the social characteristics and industrial pursuits of the people. For the following concise summary, which I endorse in every particular, I am indebted to the Lethbridge News, the ably conducted journal of that hustling town: Lethbridge, which is recognized

one of the leading towns of the Cana-dian Northwest, is beautifully situated on the Belly river in Southern Alberta and the divisional point for the Alberta Railway and Co.'s road, the Crow's Nest Railway, and the Lethiridge branch of the C. P. R. from Medicine Hat on the main line; There are many reasons why Lethbridge is the most desireable place in the West for settlers to locate. The climate conditions are most favorable the district being marked by a equable temperature, with freedom from rapid and extreme fluctuations in the growing easons. The productionant feature is the great dryness and clearness. With the exception of that portion of British Columbia situated along the Pacific Coast, Southern Alberta enjoys the mildest climate in Canada. The soil of the plains surrounding the town is generally rich and deep, and varies from a rich sandy to a clay loam. All of it is thoroughly adapted to the growth when out of season. a rich sandy to a clay loam. All of it is thoroughly adapted to the growth of all classes of cereals, cultivated grasses, vegetables and even fruits of various kinds. The only drawback has been the dryness of the seasons, but this is to be overcome by a system of irrigation now in course of construction by the Capadian Northwest Legistrican Co. who, will irrigate a construction to the construction of th but this is to be overcome by a system of irrigation now in course of construction by the Canadian Northwest Irrigation Co., who will irrigate a portion of land 40 miles square immediately adjoining Lethbridge, thus making it the centre of the garden of the West. For stock raising Southern Alberta is looked upon as being the Alberta is looked upon as being the nest in America. The grasses are most nutritious and cures on the stem, pon which the cattle feed through the

entire winter. At least 200,000 head of horned stock and large bands of horses are running at large both summer and winter, never needing shelter of any kind. Here are operated the coal mines of The Alberta Railway coal mines of The Alberta Railway and Coal Co., who employ the year round between 400 and 500 nen. round between 400 and 500 men, and have an average output of 700 tons per day. Their coal finds a ready sale through all parts of the West. The machine shops of this company are here and employ a permanent staff of about one hundred machanics. In addition to some the staff of about one hundred machanics. In addition to some the staff of about one hundred machanics. In addition to some the staff of about one hundred machanics. In addition to some the staff of about one hundred machanics. machanics. In addition to several first class stores and shops Lethbridge has excellent telegraph and telephone service, daily trains and mails, branch-es of the Union Bank of Canada, and Bank of Montreal, Dominion Land office, Customs office, Public and Roman Catholic Schools, Presbyterian, Roman Catholic Schools, Fresoyterian, Methodist, Church of England and Roman Catholic churches, a large and well controlled General Hospital, Public Library and Reading Room, good Hotels, up-to-date Fire Brigade, Board of Trade, fine Public Buildings,

Kingston, Nov. 15 .- For the first

The man was dead and upon examination proved to be John James. His companion had got safely away. Mr. Fralick immediately went across the street to Mr. Purdy, county constable, and gave himself up, informing him of the shooting. The body was removed to Corbett's undertaking rooms. Fralick drove to the police station with Mr. Purdy and was taken into custedy. Mr. Purdy and was taken into custody. The dead man was about thirty years of age, and is the son of Martin James, ship-carpenter, University avenue. He was viclinst in a local orchestra which does considerable work. A

wife and young child are left.

The coroner's jury which investigated the matter Thursday afternoon, brought in a verdict of justifiable homicide. Fralick gave evidence at the inquest, and claimed that he fired the shots at random, to scare the men. It was too dark to see them, and one of em swore violently at him after he had fired twice, so he was afraid they would come upon him and do him an injury. His house had previously been broken into and \$50 stolen.

As the police court Thursday it was expected that some action would be taken, and Fralick was present. But as the coroner's jury had acquitted him, the matter was dropped, and he was allowed to depart a fre man.

GLEN BUEL.

One of the many events which help to make life happy and useful recently occur red at the Atcheson homestead arm. Soon after the fact became known to the citizens of the "Glen that Mr. and Miss Derrick were about that Mr. and Miss Derivation to remove to Smith's Falls, a larger field of usefulness, a number of their friends went to their home and enjoyold mansion in music, song and reci-tation, after which the following address was read and presented by Miss Orten on behalf of the members of Glen Buell church and Sabbath school: TO MR. A. DERRICK AND MISS A. DER

Respected Brother and Sister,—We, the members of Glen Buell Methodist church and active members of Glen Buell Sabbath school, having learned that you are about to remove from this field of usefulness and from our circle of friendship, desire to express to you our sorrow at losing you from our active church work. We have learned to love you as a brother and sister in Christ. Your cheerful servisister in Christ. Your cheerful services in the past have been very helpful and we are going to miss you very much indeed, inasmuch as you have always been willing workers whenever and wherever called upon. We sincerely hope and pray that the change you are making will be one of great advantage to each of you, both temporally and spiritually, and that your lot will be cast among christian friends. We pray for you that you may always have with you that friend who at all times is ready and willing to surround We pray for you that you may always have with you that friend who at all times is ready and willing to surround this faithful children with a wall of arotection, greater than the mountains that are even now around about Jerusalem as a wall of defence. We can not see the end, but God, who sees the nd from beginning, will reward you in his own good time for the His faithful children with a wall of protection, greater than the mountains that are even now around about Jeru-Vegetable pepsin is the most valuable salem as a wall of defence. We can not see the end, but God, who sees the digestive juices of the human end from beginning, will reward you helps by the way you have given. We trust your talents will continue to multiply and you may hear the well done" said unto you We extend to you our best wishes for happiness in your new home and hear

happiness in your new home and hope that you will sometimes think of and pray that God's blessing may attend our work at Glen Buell. JOSEPH TOWRISS, Class Leader. C. J. GILROY, S. S. Superintenden:

She Didn't Pay It McAffie, a farmer near Morrisburg and threw a dynamite cartridge into the front room. A terrific explosion followed, part of the wall being blown LIFE IN THE MIDDLE AGES.

Some of Their Customs and Habits
Were Revolting.

This is a realistic age, averse to convention and loving to be told the plain truth about everything. As an appropriate corrective or supplement to the romantic view of mediaeval life, which leaves out of account everything that is not picturesque, we know of nothing better than Mr. Hopkins' essays. Certainly no one would learn from Scott or Hugo that a city in the middle ages had diffused that pungent odor which could be smelled leagues away and which was capable of turning a king, the brave Philippe-Auguste, sick when he put his head one day out of a window. convicted at Cardinal for horse stealing, and sent to Kingston Penitentiary.

WAYS OF FEIGNING DEATH.

would cause a slow numbing of the senses.

"As Jess in 'Hoodman Blind,' " concludes Miss Allen, "I died of starvation and lay on my side well down the stage. This was often an awkward situation on account of the different curtains at the various theaters. Sometimes, to avoid my being struck by the curtain, the hero would be obliged to drag my body back, and once, though a man put out his hand to keep the roller away from me, the heavy mass actually grazed my nose."

Picturesque Fishermen All the fishermen of the Zuyder Zee are All the fishermen of the Zuyder Zee are large and robust men. They are on the sea all week and are accustomed from infancy to the perilous occupation of fishing. Many of them spend the greater part of their lives in boats, and what strong, healthy models they are for the registral.

part of their lives in boats, and what strong, healthy models they are for the painter!

They know every foot of water in the region to which they are limited by the fovernment to ply their vocation, and they rarely leave familiar waters on account of the numerous sand banks which are a menace on all sides. The sea is a dangerous one for that reason. It also has its special characteristics owing to the singularity of its original formation, it being said that cities are flooded at its bottom, it having submarine meadows and banks of yellow mud rarely covered by more than two feet of water, giving its edge that strange, greenish color noted by artists as they paint it. The dikes prevent the other parts of the lands from being submerged.

The Volendamers evade calamity successfully most of the time, but when hungry mouths at home prompt them to seek for food in new waters they become venturesome and go as far as the North sea, at the expense of life sometimes, as was the case recently when eight brave fishermen were caught in a gale in which their boats foundered on reefs and all perished. Regularly on Sunday evening can be heard the click click, tick, tick.

their boats foundered on recfs and all perished. Regularly on Sunday evening can be heard the click, click, tick, tick, as they haul the nets down from the masts of the blunt bowed boats and make them ready for a long week's work.—Donahoe's Magazine.

A Bad Habit.

It, knows how to keep silent in 11 languages and has made a handbook of Chinese conversation as well as a treatise on modern Greek might be in darkest ignorance of any language but English for all his conversation shows. So severe is his taste for plain English that he scrupulously translates all of the foreign phrases that have crept into general use. He even disdains to say creme do menthe, and simply asks for cream of mint when he happens to want it. It really sounds rather distinguished.—Philadelphia North American.

A Dry Lunch.

A parson staying in Wales for his holiday set out with his three sisters one day to go up Snowdon. After a long and tiring climb of some three hours they arrived at the summit and sat down to enjoy some sandwiches which the roverend gentleman had carried all the way in a brown paper parcel. The string was cut. Four pairs of eyes looked eagerly and hungrily at the parcel. The paper was unfolded, and two or three night-shirts were exposed to view. The parson had taken the wrong parcel.—Church Times.

For a brief, breathless moment the

About 60 or 70 years ago, when the manufacturing trade was in its infancy, several poor Scotsmen settled in Manchester, who ultimately became millionaires, and whose descendants are still connected with the city. We were speaking a short time ago with a very old woman, who knew one of these men in his early struggles. His landlady thought he paid too little for his room, and was determined to raise his rent from 18 6d to 18 8d a week. This the Scotsman stoutly resisted, and was resolved to pack up his baggage and be gone rather than pay a fraction more than eighteenpence. After gaining his point he concluded the dispute with this axiom, which ought to be remembered by our young men:—"It isn't that I mind so muckle for the odd tuppence; but, ye ken, Betty, it's the breaking into a fresh piece o' siller."

Tubbed from the roots to the ends, and never the "wrong way."! Vase or twice a week. When they core twice a week. When they care the overline should be pubt on the spot, and they should be washed with hot water and a little soap, but on no account should they be rubbed. The eyelashes of children may be rubbed. The eyelashes of children may be rubbed from the roots to the ends, and never the "wrong way."! Vase or twice a week. When they care twice a week. When they care the "wrong way."! Vase or twice a week. When they care them once twice a week. When they care twice a week. When they care the could be vashed to the spot, and they should be washed with hot water and a little soap, but on no account should they be rubbed. The eyelashes of children may be rubbed. The eyelashes of children may be rubbed from the roots and heave we have and a little soap, but on no account should they be rubbed. Fruit Piss in Demand.

Growers of stone fruits can count upon a new source of revenue. The pits of peaches, apricots, nectarines plums and prunes, heretofore thrown away or used as fuel, have a market value. Especially is this true of peach and apricot pits. This year laws to good the sheriff.

Charged to the Sheriff.

A man charged with a minor offense escaped from Georgia and fied to North Carolina. When notified of his arrest in the latter state, a rural sheriff wired: "Don't bring him back. Just tar and feather lilm."

The following reply was received by the Georgia sheriff shortly afterward: "We gave him the tar free, but you'll have to foot the bill for the feathers—\$2. away or used as fuel, have a market value. Especially is this true of peach and apricot pits. This year there is a strong demand for them at from eight to ten dollas a ton, delivered in San Francisco. The kernel' is the product sought. From the apricot kernel that delicious French "nut candy" is made, displacing the almond. Cinnamon, allspice and nutmeg are adulterated with this same. pit, ground and highly prepared for the purpose. Prussic acid and essence and oil of almonds are made from the peach and prune pits, and these flavors are used in a thousand different ways. The nite are cracked in San Francisco. are used in a thousand different wa The pits are cracked in San Francand the kernels are then sent east.

THEIR FAVORITE BOOKS. Cowper read only his Bible and his

Chopin rarely read anything heavier than a French novel. Voltaire's favorite classical author was Juvenal, the satirist.

Caesar Borgia had a library of works relating mostly to art.

Rossini for nearly 30 years read nothing but French novels.

Jean Paul Richter had only five or six books; all philosophical

Jean Paul Richter had only live of sixbooks, all philosophical.

Titian read his prayer book and the metamorphoses of Ovid.

Paul Veronese thought there was no book equal to the "Aeneid."

Lord Clive said **hat "Robinson Cru soe" beat any book he ever read.

Franklin read all he could find relating to political economy and finance.

Beethoven was not a great reader, but occasionally found pleasure in a novel.

ecasionally found pleasure in a novel.

Hogarth was fond of joke books and arces and enjoyed them immoderately. Michael Angelo was fondest of the ooks of Moses and the psalms of David. Cherubini was a lover of botany and ade collections of works on the subject. Mario, the great tenor, read anything e could obtain relating to sports or hant

"Papa" Haydn liked stories,

Da Vinci read Pindar and thought his St. John Chrysostom never tired reading or praising the works of the apostle John.

Heine seldom read anything but poetry but he read that with the most scrupu Bobby Rich—My na gave me a watch and promised me a lickin if I was late to school any more. What did you get? Johnny Poor—A lickin and a promise of a watch if I was not late any more.— Jeweler's Weekly.

A man who has tried it says that eat-ing candy will cure the drink habit. Whenever the longing for alcoholic stim-ulus comes on a few bits of candy will satisfy all esaying Elgin News

Does You Back Ache?

till night? Why not put the medicine exactly on the disease? Why not apply the cure right to the spot itself? You can do it with

Dr.Ayer's Cherry Pectoral **Plaster**

Immediately after the Plaster is applied, you feel its warming, soothing influence. Its healing remedies quickly penetrate down deep into the inflamed tissues. Pain is quieted, soreness is relieved and strength imparted No plaster was ever made like it.
No plaster ever acted so quickly
and thoroughly. No plaster ever
had such complete control over all
kinds of pain.

Placed over the chest it is a powerful aid to Ayer's Cherry Pectoral; relieving congestion and drawing out J. C. AYER CO., Lowell, M.

Furs will look much improved if they are cleaned with bran. The bran should be placed in an earthen receptacle and heated in the oven. When het it should be rubbed well into the fur. Flannel is the best thing to use for rubbing the bran into the fur. After the husk has remained in the garment for about half an hour shake it thoroughly to remove all particles and brush until the article is perfectly clean. Fur collars that have become soiled from rubbing against the hair may be made to look like new by using hot bran on them. Two applications of the bran, and probably three, will be necessary if the fur is badly soiled.

Care to the Eyebraws.

The eyebrows should be carefully washed every day, and a tiny brush and comb used to keep them soft and smooth. They should always be rubbed from the roots to the ends, and never the "wrong way." Yaseline should be rubbed over them once or twice a week. When they get scruffy, vaseline should be put on the spot, and they should be washed with hot water and a little soap, but on ne account should they be rubbed. The eyelashes of children may be made to grow long and curly by being clipped slightly now and then, but not he case of a grown person this would make them coarse and stubby. Care to the Eyebraws.

A Useful Heart Tonic.

A friend of mine tells me that in Mexico vanilla is much used as a heart tonic and that she has known several English people use it with good effect. The plan is simply to take a piece of vanilla, such as is used for flavoring, and to shew it. It seems a simple and harmless remedy and is worth trying.—Home Notes. A Useful Heart Tonic

Do you take cold every change in the weather? Does your throat feel raw? And do sharp pains dart through your chest?

Don't you know these are danger signals which point to pneumonia, bronchitis, or consumption itself? If you are alling and have lest flesh lately, they are certainly danger signals. The

question for you to decide is, "Have I the vitality to throw I these diseases?' Don't wait to try SCOTT'S EMULSION "as a last resort." There is no remedy

equal to it for fortifying the Scott's Emulsion

prevents consumption and hosts of other diseases which with poor blood.

SCOTT'S EMULSION IS the one standard remedy for inflamed throats and lungs, for colds, bronchitis and consumption. It is a food medicine of remarkable power. A food, because it nourishes the body; and a medicine, because it corrects diseased conditions.
