This Company added about £90,000 to its permanent capital, for the increased protection of its Insurers. This step distinctly shows that the Company has always acted upon the principle enunciated by one of the directors at the last Annual Meeting of the proprietors—that the interests of the assured have a paramount claim on the directors—a claim superior even to that of the shareholders themselves.

From that moment, as might be expected, the Company attained the highest consideration throughout the country, and has retained it ever since. The result is shown in the unexampled fact that its Fire revenue alone rose in about five years from but a mere £30,000 to above £130,000!

A further cause of this rapid growth lies somewhat more below the surface, but is yet of importance. From inquiry we learn that no fire office possessing half the above revenue annually deposits its accounts with the Registrar-general.

The resources and balance-sheet of this great Company are, on the contrary, annually registered, and unimpeachable evidence is thus given periodically of its capacity to meet its engagements."—Morning Herald, December 26 1855.

Indeed, the bonus of the 'Royal' may be pronounced to be large than any yet declared by the mass of the English office. Here is an office which yields a fairly earned and wholesome investment bonus of 8 per centum in its Life Branch, and in regard to fire operations, can make this very enviable boast, that it has exceeded the Fire business of all but two of the London Fire offices—viz.: the receipt of nearly £130,000 per year in Fire premiums alone—some of which ancient offices have been in existence for a century! Equally successful and singular in both departments. Indeed, the Life Department may be said to present results equally as worthy of mention."—Morning Chronicle, November 28, 1855.
