### FATHER DOES THE WOOING

"It is the duty and privilege of every Serbian to choose a wife for his son. As soon as the boy has reached his eighteenth year the Serbian parent asks his friends, confidentially to help him find a prospective wife. He himself visits assiduously all the fairs in his own and neighboring districts, dressing better than usual, and watches the girls dancing. He makes careful inquiries about the families that have marriageable daughters.

"In some parts of Serbia the young unmarried women carry a special mark in their heads—generally a real feather—to indicate that they are open to proposals.  
"When the father has chosen a promising girl, he ascertains through a friend whether the parents would consent to give her to his son. If he receives an encouraging answer, he invites relatives or friends to go with him on the 'requesting errand.' They start out, dressed as well as can be. The father carries a fat wheat cake and a bunch of flowers. One of the company must carry a pistol, for it is customary in Serbia to announce every joyous event by firing rifles or pistols. They arrive at the girl's house before supper.

"After eating and drinking in which the men alone of the two houses participate, and some preliminary conversation, the father of the prospective bridegroom draws from his bag the wheat cake, puts the flowers upon it, and places the whole upon the table. He then takes from his money bag some gold or silver coins and places those too upon the cake.  
"Brother, let us not precipitate the matter," the girl's father will then say, "Let me first find out what my daughter says."  
"He then goes out to consult his wife. This is only for appearance, as the matter was practically settled when the father was encouraged to come to 'beg' the girl.  
"After more or less suspense, the door opens and a male relative brings the girl in. He leads her to the father of her prospective husband, before whom she bends deeply and kisses his right hand.

### FOR THE HOUSEWIFE

**MARSHALLOW CHOCOLATE CAKE**  
Cream half a cup of butter with one of sugar, beat three eggs with half a cup of milk, and sift two heaping teaspoons of baking powder with two cups of flour, then mix all together and add flavor with a teaspoon of orange extract. Bake in three layers. Let cool, then put together with the following: In the cereal cooker melt half a pound of marshmallow, meanwhile beat an egg white to a stiff froth and over it turning the melted mallow, beating all the time. Spread between the layers, then ice all over with chocolate prepared as follows: Into the cereal cooker scrape two ounces of chocolate. Mix with half a cup of powdered sugar, two teaspoons of butter, a fourth of a cup of milk and a scant teaspoon of vanilla. Cook all until a little dropped in ice water forms a soft ball, then spread all over the cake. While it is still soft decorate with marshmallows, cut in thin layers, with the kitchen shears, the blades rubbed between cuttings with cornstarch. A little care will enable you to make the prettiest of cakes. Decorate the middle of the cake, using a strawberry, or a candied cherry for the flower centre.

**JELLIED SALMON**  
Get a large can of salmon and turn the contents into a china bowl and hou before needed, then remove all skin and bones, and shred the fish with a silver fork. Soften an envelope of granulated gelatine in two tablespoons of cold water, and into two egg yolks beat two scant teaspoons of salt, a scant teaspoon of dry mustard, and a little cayenne. Turn this into the cereal cooker, and add one and a half tablespoons of melted butter, measured after melting, threefourths of a cup of milk and two tablespoons of vinegar. Cook until it begins to thicken, then quickly remove from fire, add the softened gelatine, stirring until it dissolves, and finally the fish. Stir until all is mixed, then turn into a mold wet with ice water, and let stand over night. Who ready to use turn out on platter and edge with heart leaves of lettuce or water cress.

**PINEAPPLE**  
Get a ripe pineapple, testing it by pulling out one of the inner leaves. If it comes easily, and the end has a fine fragrance the fruit is all right. The day before serving, cut off the leaf end and the base, and with a very sharp knife peel off the spines, leaving a few fresh berries, and every cutting deep enough to take off every particle. Toss with a silver fork pulp of the pulp in shreds; after you have detached a little the rest will come off easily, leaving the hard core. Put the pulp in a pretty glass dish, sprinkle with powdered sugar until sweet enough to suit the taste, then put in three tablespoonfuls of juice from preserved strawberries or syrup made by cooking a few fresh berries, and by cooking the dish closely, setting it where it will get very cold. The covering is to prevent the rest of the articles in the ice chest from acquiring the pineapple flavor. Prepared in this way, pineapple is delicious.
