## Men's Suits and Overcoats

**SUITS**

We have just taken the whole stock in our Men's Suit department and divided it in four groups, one group of suits to sell at

**\$15.00**

THE OTHER THREE AT

**\$27.00**

**\$33.00**

**\$42.00**

The only difference between them is the difference in excellence. They are all of the best materials and workmanship in nice patterns and staple styles.

At \$15.00, \$27.00, \$33.00 and \$42.00 they represent savings from \$15.00 to \$35.00. There are, in fact, plenty of suits among them that not long ago were \$15.00, \$20.00, \$25.00 and \$35.00 higher than the new prices.

There are Fancy Suits as well as staple Blacks and Blues.

**PLEASE TAKE NOTICE** that the reason for this extraordinary reduction is we are about to take stock soon and we wish to convert the goods into cash.

**OVERCOATS**

We have placed all our Overcoats for this sale in one group regardless of cost at

**\$19.50**

At this price the savings are large, as many come away below cost. The reason for this is that we do not wish to carry any stock over to next season. Any man contemplating the purchase of a Suit or Overcoat should act at once. This Sale will be for a short period only, from

**Fri., Jan. 21, to Wed., Jan. 26**

## Winter Weather Hard On Little Ones

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes cold and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They are mild laxative which regulate the stomach and bowels and thus prevent colds. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**PASTORAL VISIT**  
Bishop Richardson of Fredericton made a pastoral visit here on Sunday. He preached in St. Andrew's church both morning and evening and in St. Mark's church in the afternoon.

A. McCurdy, James Robinson, Osborne Nicholson, John McKeen, Wm. E. Fish, and James B. Russell. Interment in St. James' Cemetery in the family lot.

## Mrs. Turner Studying Baby Hygiene

She Asks The Physician  
"My dear Mrs. Turner" said the family physician, "I can only repeat what I have said so many times—that at only must we see to it that the child properly assimilates its food, but equally important, that the waste products are properly eliminated. Infant or Child Hygiene plays an immense part as this day. The proper feeding of children is to say an exact science and it has brought with it the knowledge of how to keep the child's alimentary tract in the proper condition. Have you noticed how many physicians now specialize in children's diseases? Those men have at their command all the treatises on the maladies of infancy and childhood. Naturally they have the advantage over the general practitioner. But do you think the specialist has more success in treating the children than has the physician who brought them into the world; who day in and day out sees them, watches them and notices all their little individual peculiarities? The specialist comes in as an outsider and has to learn of the things. The family physician knows them."

"One of the best physicians in this country puts the matter of the alimentary canal into a terse sentence—'Clean out, clean up and then clean.' Surely what is true about the grownups is still true so in regard to children. The grown-up can think for themselves. But the baby? Ah! you get the point? Food that may suit one child may be absolutely unfit for another, the fecal cream, the tempting watermelon, the ever so desired green apple, these and many more cause the woes, which may be soothed by remedies that cannot be given to the infant or small child, such as Castor Oil, a most nauseating old-fashioned remedy. Now, to tell you the truth, I very rarely give Castor Oil. For years and years, in my own family as well as in outside practice, I give Fletcher's Castoria and I know of scores of other physicians doing likewise. You ask why? Well I have had nearly thirty years' experience with it, that is why. Experience teaches. You, Mrs. Turner, are still young and have only your first baby to worry over and because his little stomach is out of kilter you are scared. Now just do as I tell you. Give him Fletcher's Castoria as directed and you will find it at your boy will be very comfy."

"But Doctor" broke in Mrs. Turner, "are you sure there's nothing nutritious in Fletcher's Castoria?" "Why my dear Mrs. Turner, right on the wrapper of every bottle you will find the formula. And since you are of such an inquiring turn of mind, if you will some day come over to my office I will read to you what the text books say about those ingredients and explain it to you in every day lingo."

The doctor's candid talk convinced Mrs. Turner that Fletcher's Castoria was the remedy for her to keep in the house and any other mother who takes the trouble to ask her physician will receive the same advice.
