

CANADA HAS SURPLUS OF MANY MILLIONS; SOME REDUCTIONS IN TARIFF ANNOUNCED IN BUDGET SPEECH BY GOVERNMENT

(Continued From Page One)

On sugar the old rates were fifty-five and a half cents per hundred weight, under the preference, and there had been a half cent under the general tariff. The new tariff will be fifty and three-fourths cents under the preference, and fifty-seven and a half cents under the general tariff. Under the new tariff there will be no intermediate rate.

The reduction in the sugar rates are made under the terms of the agreement with the West Indies by which Canadian importers surrender their right to import foreign raw sugar to the amount of twenty per cent. of their best sugar product at the preferential rate.

Increase in Duties
To some time there has been no duty on cocoa beans and lime juice but in order that the duties on these articles, which were imported from other countries, will be in future pay duty on the same as the duty on cocoa beans and lime juice. The duty on cocoa beans will be seventy-five cents per hundred weight, and the duty on lime juice will be fifty cents per hundred weight. The duty on cocoa beans will be seventy-five cents per hundred weight, and the duty on lime juice will be fifty cents per hundred weight.

A few changes were made in the duties on related articles to compensate the manufacturers for the new rates on the raw materials. Some are increases and others decreases, but they are all of minor importance. The duty on thread will be seven and a half cents per lb. Up to the present time the duty was ten cents per lb. The duty on thread will be seven and a half cents per lb. Up to the present time the duty was ten cents per lb. The duty on thread will be seven and a half cents per lb. or a total of \$228,000,000. In 1909 there was a decrease in the total, the figures being \$204,000,000. In 1910 the total amounted to \$244,000,000. In 1911 it was \$246,000,000; in 1912, \$268,000,000; and for the last fiscal year it was \$314,000,000.

The increase of the trade with the United Kingdom. Mr. White said, had been steady and gratifying. The percentage of increase in imports had been greater than the percentage of increase in exports, but this was partly due to the growing demand of the home market for animal products. These had been a falling off in the exports of some of these products, notwithstanding the increase in their production.

Trade With United States.
Coming to the consideration of trade with the United States, the minister quoted the figures for the years from 1908 down to the present. In 1908 Canada's imports from the republic had been \$204,000,000, and the exports to Canada had amounted to \$96,000,000. In the following year the total was \$231,000,000, or fiscal year the total was \$230,000,000. In 1910 it was \$238,000,000. In 1911, \$244,000,000; and in the fiscal year just ended, \$268,000,000. In six years the aggregate trade with the United States had risen from \$204,000,000 to \$314,000,000, but while the imports had increased by only 50 per cent. He pointed out that large sums of money had been brought into Canada during the six years by the many American settlers who have entered the Dominion. The imports from the United States, he said, embrace a wide range of commodities, while the exports consist chiefly of raw materials, the American tariff of some 100 per cent. on the exports of the United States.

Mr. White estimated that in 1908 the exports of animal products were \$55,000,000. The growth of the home market was shown by the fact that although production had vastly increased, the exports were only \$44,000,000. The exports of manufactured goods had grown from \$28,000,000 in 1908 to \$43,000,000 in 1912. The total exports had increased from \$83,000,000 in 1908 to \$125,000,000 in 1912.

Mr. White then turned to the question of immigration and quoted the figures in regard to the growth of immigration in Canada. The total immigration in 1908 was 52,000. In 1909 it was 53,000. In 1910 it was 54,000. In 1911 it was 55,000. In 1912 it was 56,000. In 1913 it was 57,000. In 1914 it was 58,000. In 1915 it was 59,000. In 1916 it was 60,000. In 1917 it was 61,000.
