BUT POLITE IN GREETING

apanese Training Cruisers Are Given Formal Welcome There, But Japanese Residents Do All the Shouting

Vancouver, May 18.—Admiral Ijichi asks that The Evening Post express for him his feelings of thankfulness for the welcome accorded him and the officers and men udner his command at Victoria, which he said was one to be long remembered by them. Capt. Ishii, of the Aso, and Capt. Saito, of the Soya, also requested their thanks be added to those of the admiral. They were enraptured over their voyage through the Gulf of Georgia bound here, one and all stating that it reminded them much of the Inland sea of Japan, with the beauties to be seen on the way.

A Quiet Welcome.

Vancouver opened her arms to the Japanese, but not widely. The banzais in welcome to the visiting warships Aso and Soya as they rounded Brookton Point with the convoying fleet of the steamers Belcarra and Barramba and a flotilla of gally decked Japanese fishing boats with the "Hino Maru" of Japan conspicuous, were given by Japanese; others looked askance at the blue-gray fortresses as they steamed in. The welcome was by no means extravagant; it was formal, that was all.

they steamed in. The welcome was by no means extravagant; it was formal, that was all.

To the Japanese, though, the occasion was a great one. They flocked from Steveston, from near and from far, and are making holiday in honor of their cruisers. The fishing fleet was transformed into an excursion flotilla, each sloop, each gascline launch, being thronged with Japanese arrayed in their holiday garb, and shortly before noon the gaudily-draped fleet preceded out in the wake of the Belcarra and Baramba, both crowded with Japanese, to shout welcoming banzals.

Meanwhile Vancouver generally looks on apathetically. There was a report—it was published by the World—that the Sixth regiment had refused to parade at a recortion to the visiting Japanese, but as far as can be learned there was no opportunity to refuse The riflemen were not asked to parade.

Most of the sawmills have been closed down as a result of the visit, the Japanese workers calling a holiday.

day.

Two bands were taken out on the Beicarra and Beremba to play the "Elmi ga yo as the watchips were met, and on the Batamba were the children of the Japanese school, about a hundred boys and girls dressed in white and carrying bouquets and Japanese uniform and carrying a sword as large as himself as the leader.

leader.

The Japanese quarter, between Powell and Alexander streets, is decorated. All the Japanese boarding houses are arrayed with bunting, with a profusion of Japanese flags, over which, however, the Union Jack or Canadian flag is hoisted. This was carefully done to avoid hurting the susceptibilities of the anti-Asiatic section of the community, for there is undoubtedly an anti-Asiatic section here.

Well Entertained

Well Entertained The Royal Vancouver Yacht club has issued an invitation to the officers of the Japanese squadron, extending the privileges of the club during their stay and offering them the use of the float at Coal harbor belonging to the club. It is the intention of the bluejackets from the Aso and Soya to hold a parade through the city on the occasion of the military sports at Brockton Point today. They will land at the ferry wharf and parade through the were hurled against the train.

MILLIONS OF CELLS

The human body is composed of countless millions of cells. These cells are constantly dying and new ones are being created. Dead cells are removed from the blood by the bowels, kidneys and skin. These great eliminating organs filter this waste matter from the blood and thus purify the blood. If there is Constipation, or non-action of the bowels—if the kidneys are strained or weakened—if there is defective skin action—then the dead cells are not removed from the body. The blood thus becomes loaded with impurities, and we suffer for it.

The only way to purify the blood is to cure the skin, bowels and kidneys. When these organs are healthy and the body there is the cure the skin, bowels and kidneys.

to cure the skin, bowels and kidneys. When these organs are healthy and doing their work as nature intended them to do it, waste matter is promptly removed and the blood is kept pure and rich. CORPORATION TAXES

issioner Smith Makes Report on Methods Employed in United States

Washington, May 17.—A unique and interesting report dealing with state manufacturing, mercantile transportation and transmission corporations was made public today by Herbert Knox Smith, Commissioner of Corporations

Knox Smith, Commissioner of Corporations.

The part of the report transmitted to President Taft concerns particularly the New England states. It is expected that additional parts dealing with other groups of states will be published later. A careful investigation into the tax laws of each state was made by Commissioner Smith and the results of the inquiry are represented in concise form.

The report presents in a popular way a digest of the tax laws and the methods of their administration. While in a sense it is a legal publication, it was prepared rather for the general public than for lawyers. It contains much information particularly interesting and important to legislators and all other students of taxation.

It is pointed out, too, that Massachusetts alone succeeds appreciably in the effort to tax especially the manufacturing and mercantile corporations. The railroads, too, are the largest tax payers. Public service corporations are most of them brought under new systems of taxation. A review of the six systams of taxation. A review of the six systams of taxations indicates to Commissioner Smith that the entire subject is still in an unfinished condition and will need further careful thought and consideration.
