THE ORGAN.—By Dr. John Stainer.
 This work is one of the most practical ever published. After giving a short, complete history of the instrument, the author proceeds to discuss it, laying bare each part and explaining fully its construction and use, enabling the student to acquire complete knowledge of the instrument, and to be confident, as is too often the case, that he knows it. This is a most valuable work. Attention is then given to the stops; their construction, and the tone, and method of using them being plainly set forth. This portion of the work will prove a valuable aid to many who are holding positions as organists. From the point of practical study, organists, and in combination with the preceding, reports and made known, manner of playing Chorales, Litanies, Tunes, etc., explained, and concluding with a number of selections of varied style and graded difficulty.

Dr. Stainer is the organist of St. Paul's Cathedral, London. The best known musician in England in this branch of the art. Bound in Paper, with Paper, 60 Cents. **Bound in Cloth, \$1.00.**
