THE GENUINE SILVER-STEEL, Lance Tooth CROSS-CUT SAW!

It stands without a rival, and is the fastest cutting saw in the world. It has beaten the best Canadian and American made saws 33 per cent in every contest. Its superiority consists of its excellent temper. It is tempered under the secret Chemical Process, which toughens and refines the steel. It gives a finer and keener cutting edge, and will hold it twice as long as any other process. We have the sole right for this process for the Dominion of Canada.

None genuine that are not like the above cut, with registered trade mark with the word "The Lance," and Maple Leaf with our name. Price \$1 per foot.

CUTION.—Beware of Counterfeits. There are inferior counterfeits on the market, which are intended to be sold at a high price upon the reputation of this saw. We will send to any address a saw exactly like any counterfeit, warranted equal in quality or no sale, at 60c per foot. Therefore do not be humbugged into paying a first-class price for a second-class saw. A fact to bear in mind is that if the material and temper are not of the very best quality the shape of the teeth amounts nothing. A saw, like a knife, will not cut fast without it will hold a keen, cutting edge. We have cut off a 14-inch round sawwood log in eight seconds with this saw. Manufactured only by

SHURLY & DIETRICH,

Manufacturers of Saws, Plastering Trowels, Straw Knives, &c. &c.
