Gerhard Heintzman

❁ ❁ ❁ ❁ ❁ **PIANOS** ❁ ❁ ❁ ❁ ❁

GERHARD Heintzman Pianos are indisputably the most artistic instruments made in Canada. Their reputation has been won solely by merit. They are used exclusively by the most distinguished artists in Canada. They are elegant in appearance, refined in tone, responsive in touch and extremely durable. Quality considered, our prices for Gerhard Heintzman pianos are extremely moderate. Terms of payment and catalogues upon application.

We would like you to see the new Gerhard Heintzman Coronation Style 22 Cabinet Grand. Price (on easy payments without interest), \$450.00, with a discount of \$90.00 for cash settlement.

MEDICAL FACULTY

THE regular course of instruction consists of Four Sessions, of eight months each, commencing October 1st. There is a distinct and separate course for each of the four years.

The lectures and demonstrations in the subjects of the First and Second years are given in the Biological Laboratory and the lecture rooms of the University.

Lectures and demonstrations in the subjects of the Third and Fourth years are given in the building of the Medical Faculty, corner of Gerrard and Sackville streets.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

Clinical teaching (largely bedside) is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honour course in Natural Science are able to fulfil the requirements of the primary work in Medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

The new building, at present in process of erection on the University grounds will be completed by January 1st. Extensive laboratory and lecture room accommodation will be provided for the Departments of Physiology and Pathology, and all the lectures of the final years will be delivered in the new lecture theatres after the date mentioned.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide three medals for the graduating class (one gold and two silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.

R. A. REEVE, B.A., M.D.
Dean.

A. PRIROSE, M.B.
