DIGEST OF THE  
1988 BRAZILIAN CONSTITUTION

The following collection of briefs prepared by the Canadian Embassy in Brasilia is a digest of the 1988 Brazilian constitution. This digest does not attempt to translate or summarize the entire 193 page document. Instead, it paraphrases in language understandable to Canadian readers the major provisions of Brazil's new constitution. Given the detail of this document, this digest can serve as a basic political science primer on the structure of the current Brazilian political system. For a more exact legal reading of the constitution's provisions, readers should consult the original document.

The briefs are organized under the following headings which cut across the chapter divisions of the actual constitution. For a concordance between these briefs and the chapters of the constitution see Brief 14.
