Montreal.

Re "Co-Motional Power Co."

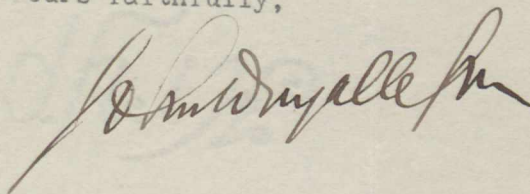

Dear Sir:-

We thank you for your effective replies of February 5th and 13th to the enquiry forwarded you under the date of February 4th. We are enclosing a copy of an editorial warning to investors which will appear in this week's Witness.

As we have not the evidence that the inventor, or his agent, mentioned McGill, we have deemed it best to make the warning general rather than specific; for the real game may not be to sell shares in a new engine industry but to seek technical opportunities for lawsuits against publishers. So we have omitted names and designation of inventor and enquirer.

We greatly appreciate your prompt replies.

Yours faithfully,

F.E.D.:JP
