

The Secretary: I think you will find that enough subjects will come up, and I think it would be well to embody it in the resolution.

(The resolution was unanimously adopted.)

Chairman Bowman: I would like to say before we separate on behalf of the American members of the conference that we are all delighted and very much pleased with you gentlemen from Can-

ada, and there is a general feeling that we would like to get nearer together. Our interest in fish matters are in unison and it would not only be pleasant always to have you with us but I think it would do us both good. Certainly, we feel that we are receiving good from you hands.

The conference then adjourned sine die.
