

INTRODUCTORY REMARKS

I have much pleasure in presenting to my valued connexion an entirely new and enlarged edition of my Catalogue of Machinery, extensively illustrated with a new series of Wood-cuts, which, I trust, will prove serviceable to them in making a selection of such Machinery and Implements as they may require.

In the manufacture of the various articles described in this Catalogue, I respectfully request that it may be borne in mind that I rest my claim for notice on the intrinsic excellence of my Implements and Machines in workmanship as well as in principle. It will be my aim, not only to maintain the high standard of excellence which has hitherto characterized my manufactures and given them their high reputation with consumers, but to make every resource available for their improvement.

I have much pleasure in calling your attention to the improvements and additions made to my machines since my last issue, which will greatly enhance their value and efficiency.

In the class of HORSE-POWER THRESHING MACHINES I occupy the first position, holding patents and licenses that enable me to manufacture and offer for sale to the public a Threshing Machine that stands unequalled in Canada, with Machinery of the most approved description; and twenty-five years' experience in the manufacture of Threshing Machines enables me to carry into effect the motto, "Practice with Science," so that of late years my Patent Improved Threshing Machines have stood unapproachable in their excellence. They have now won their way by their intrinsic value, and are recognized throughout Canada as unrivalled in their Simplicity, Excellence of Workmanship, Ease of Draught and Durability, and have attained the well merited and fairly earned reputation of the most perfect Threshing Machines in use. They have for years past maintained their acknowledged position as the standard machines of the day; and every modern improvement and appliance of mechanical skill is employed to keep them in advance of all competition.

I beg an inspection of my Machines, feeling confident they are of a character to show that I do not wait to copy or follow in the track of others, but constantly and successfully aim at standing in the very first rank of producers. The constantly increasing demand for my Threshing
