podis triquetrous-ovoid, finely dotted, 4 to 5 lines long; late foli-
age nearly glabrous, but rather fleshy.
Collected by Mr. J. M. Dickson near Port Flamboro, Ont.,
May, 1898, and grown by Dr. Greene and the writer. The grow-
ing plants are very easily distinguished from *V. cuspidata* to
which it is closely related. Included in this paper in order to
complete the enumeration of the Ontario species as far as they
are known.

Ottawa, Dec. 1898.
