John Macdonald & Co. Wellington and Front-streets East,

Mr. Maughan Says It May Be Reduce Eleven Millions This Year. Legislation as it affects the city was considered by a sub-committee of the Executive yesterday afternoon. Dr. Ryerson's bill to amend the Assessemnt Act was fully discussed. Exception was taken by Chairman Shaw, several of the aldermen and by a deputation of the Ratepayers' Association to the clause that the value of land having finally passed the Court of Revision and the County Judge, the council may by bylaw determine that such value shall remain for the four following years.

determine that such value shall remain for the four following years.

Ex-Ald. Defoe said the Ratepayers' Association considered the assessment of Toronto 25 per cent too high. A levelling of assessment should be made and that at once. The city was acting on false pretences in going to the money markets of the world to obtain loans on any such statement as an assessment of \$150,000,000.

Ald. Lamb replied that no towm in the world had less taxation apart from local improvements. It was the extent of these that swelled the assessment.

Mr. Defoe gave examples of inequalities of assessment. Adjoining properties in King-street between Bay and Yorkstreets were put down at widely differing figures.

streets were put down at widely differing figures.

Assessment Commissioner Maughan said he had been governed by arbitrators' figures as to remunerative values.

Ald. Hallam said that, though he had upheld the Commissioner's figures when a member of the Court of Revision, he believed that the assessment of the city generally was 35 per cent. too high.

Mr. Maughan justified the action of his department, and surprised many present when he said there was a decrease of \$11,000,000 in the assessment last year, and he would not be surprised to see another \$11,000,000 decrease this year.

'It is utterly impossible to keep up the present assessment in the circumstances in which the city is. If things get into a settled condition and values stand the assessment might stand at the same a settled condition and values stand the assessment might stand at the same figure for three years. The great objection to Dr. Ryerson's proposal is that in Toronto land values vary so much. While they are increasing in one portion they are decreasing in another. East of the Hay Market property which a year or two ago was \$11 a foot is now only \$8.50. At the same time property at College-street and Spadina-avenue had increased from \$70 or \$80 per foot to \$400.

per foot to \$400. Ex-Ald. Carlyle said the association wanted the five-years' fixture only to apply after re-assessment and reduction.
Ald Jolliffe and Crane also spoke of glaring inequalities.
Ald. Frankland said the cause of the

Ald. Frankland said the cause of the inflated values was that a year of two ago the land-bomiers were asking the assessors to raise values, so that they could go to the loan companies on the value of their assessment.

City Counsel Fullerton was instructed to oppose the quinquennial clause in Dr. Ryerson's bill.

Similar instructions were given in reference to Mr. Richardson's bill to abolish market fees, unless in regard to Toronto there was the condition inserted that if the fees be abolished tollgates must go.

\$1000.00 GOLD IN PRIZES.

Tremendous Revolution in Medicine.

In introducing their eight marvelously successful curative remedies in Canada, The Dr Archibald Peerless Highland Medical Company offer 200 cash prizes to the persons calculating nearest correctly the amount of money contained in an ordinary Imperial self-sealer quart jar exhibited in their show window, which is filled as tight as possible with Canadian 10 cent pieces. No person knows the sum contained, as the jar was partly filled, then taken to the bank and there filled tight by one of the bank officials (who will not make known how much he put in) in the presence of Wm. Pears, Esq., license inspector for the County of York and ex-Mayor of Toronto Junction, and J. B. Brooks, Esq., Grand Worthy Patriarch of the Sons of Temperance for the Province of Ontario, who immediately sealed it, marked it with their private signets, and who will open it at the close of competition, count the money and announce the winners, whose names will be published in the Toronto papers of SATURDAY, JULY 1372, together with a statutory declaration from those receiving the four largest prizes to the effect that they are not interested in the firm in any way whatsoever. Anyone competing must enolose \$1 with every answer, for which will be sent immediately in plain package, medicine to that value selected by purchaser. Answers received only by mait, so that those living in Toronto have no advantage over those living a thousand miles away.

This is no lottery, no chance work, not even a guessing competition, but a mathematical problem, which may be skilfully and scientifically solved in at least half a dozen different ways.

Everyone knows the exact shape and size of an ordinary Imperial self-sealer quart jar, also of a 10 cent piece.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escap emany a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame.—Civil Service Gazette.
