

FEDERAL POWER SUPREME CONTROLS SUNDAY LABOR

Railways Operating Under Dominion
Charter Not Subject to
Provincial Act.

Another provincial statute has been declared ultra vires by the Privy Council. By the Revised Statutes of 1897, Chapter 246, it was attempted to regulate Sunday labor on railways and steamship lines. The Court of Appeal heard argument in April, 1902, in an action by the Attorney-General of Ontario against the Hamilton Street Railway Company, where it was contended that the provincial legislature had no authority over concerns operating under Dominion charters. The court divided equally and the case was taken to the Court of Last Resort by the Lord's Day Alliance, who were represented by J. A. Patterson, K.C., and A. E. O'Meara. The Privy Council yesterday handed down a decision upholding the contention of the companies that the Federal government alone can regulate concerns chartered under its statutes.

PEST TO KILL PEST.

Parasite Deadly to Mosquito Found
by Scientists.

Washington, D. C., July 14.—Dr. Charles Stiles of the public health and marine hospital service has made another discovery in the parasite world, which is considered by government savants of the greatest importance. This discovery is what Dr. Stiles has named "agamo mermis culicidis," otherwise known as "mosquito destroyer." It is a parasite which kills millions of mosquitoes each year, and which, it is believed, under artificial propagation will prove far superior to any known way of ridding infested communities of these pests. Dr. Stiles not only has discovered the parasite but isolated it. All that now remains to be done by Dr. Stiles and his associates is to discover a rapid and inexpensive manner of propagating parasites in sufficient number for general use in marshes, ponds and localities infested by the insects, and the "mosquito destroyer" will do the rest.

Certain forms of intestinal parasites previously were found in mosquito larvae in India, Italy and Spain, but none was discovered in the American mosquitoes until Prof. John B. Smith of Rutgers College forwarded to Dr. Stiles for examination two worms taken from the abdominal cavity of New Jersey mosquitoes. One specimen was in a hardy condition. Dr. Stiles determined that both specimens were larval round worms belonging to the family of mermithidae, or mermis paramermis. Dr. Stiles christened the parasite, "Agamo mermis culicidis."

STEEL BOUNTIES ATTRACT.

Why U.S. Steel Trust is Coming Into Canada.

New York, July 14.—(Telegram Special).—The publication of iron and steel bounty duties declared by the government of Canada makes it practically certain that the United States Steel Corporation will establish two plants along the border—one at Hamilton, where it has an option on the Hamilton Works, and another at Fort Erie, on the Welland Canal.

The corporation's object is, primarily, to export steel to the United States, but its chief aim is to establish a large plant in Canada so that it may share in great development made certain by definite projects mapped out.

The proposed construction of the Grand Trunk Pacific, and the extension and improvement of other lines, assures for several years to come a heavy and important trade in steel, structural steel and heavy iron. In addition, they would be favorably situated for trade with South Africa, and will benefit from trade relations between Great Britain and the colonies.

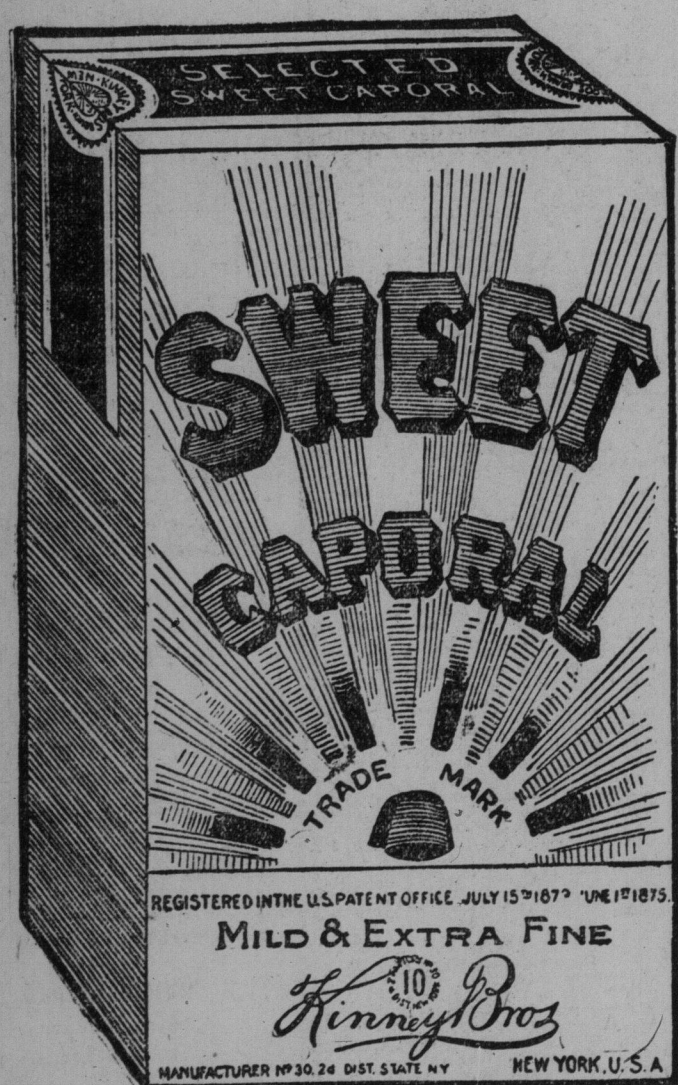

As the bounties are to cease in 1907, thus allowing only three and a half years for the corporation to share the benefits of the new law, it is probable that it will decide to close its option on the existing steel plant at Hamilton, rather than build a big new plant at Fort Erie. By exercising its option on the Hamilton plant the corporation could start at once with a going concern, and could soon turn out half the output of the Dominion. Another reason for the Steel Corporation's desire to get established in Canada is that it is necessary to hold the wire, rod and barbed-wire trade of the Dominion, which is itself an important item. The trade is equivalent to \$3,000,000 a year, and up to date has been no duty on wire rods and wire.

THE LATE JUSTICE ARMOUR.

Toronto, July 14.—The body of Justice Sir John Douglas Armour of the Supreme Court of Canada, and a member of the Alaskan Boundary Commission, who died July 11, leaves Thursday for Canada by the Alaskan Line steamer "Pomona." The two daughters of the deceased will be held tomorrow afternoon at the Temple Church, and will be attended by representatives of the bench and bar, and other prominent persons.

On Thursday, Ottawa, July 14.—(Globe Special).—It is now stated that the government will make their announcement on the Grand Trunk Pacific on Thursday, on which day also the motion for the third reading of the bill to grant the company a charter will be made.

"Let those smoke now—who never smoked before,
And those who always smoked—now smoke the more."

SWEET CAPORAL Cigarettes

AT OSOODE HALL.

Emerson Coatsworth filed yesterday a notice of discontinuance in the action of T. H. Humphries against the Village of Arthur, in which the temperance people sought to interfere with the taking of the census to determine the number of hotel licenses that should be issued. The case was up for argument before Chief Justice Meredith on a motion to continue the injunction recently granted restraining the license commissioners from acting on the census returns. The injunction was dissolved and the case dismissed, with costs to be paid by the plaintiff.

The Electric Meter Case. The dispute between F. V. and R. E. Clisdell and George Gowland over the patents on an electric meter, was heard in Single Court yesterday. Gowland appeared on his own behalf, and said he had transferred the Canadian patent to Crown Attorney Curry, who told him to go to the devil when he asked for payment. Counsel for the Clisdells stated that Mr. Curry was acting as trustee for a company and that Gowland had been paid in stock. The matter was laid over a week, as the parties may settle the matter out of court.

Suit Over Water. The Toronto Golf Club's suit against the Grand Trunk Railway Company stands for two weeks. In the meantime the company undertakes to allow to the club 60,000 gallons of water daily from the stream, which it is alleged is diverting from its natural channel.

A Preston Harbor Dispute. The injunction secured by St. G. Branch, contractor of Preston, restraining George Roth from interfering with his men, was continued until the trial in September at Berlin. Roth went into a house being built for Branch and told the workmen that the basement had been constructed by scab labor, whereupon they left the job. Chief Justice Meredith held that a union man has a right to impart such information to his fellow workmen, but as Roth was willing to undertake that he would not

interfere further with the contractor's business, the matter was enlarged.

City's Injunction Continued. At the examination of the Mayor before Special Examiner Bruce yesterday, an agreement was reached between counsel for the city and the Street Railway Company that nothing further should be done in the matter of the avenue road extension until September. The motion to continue the injunction was down for argument, but was formally enlarged.

Suit for Damages. The Toronto Railway Company is being sued for \$200 by Joseph Jacobs, who fell off a King street car near John street last May.

An Overholding Tenant. Judge Morison, in the County Court yesterday, made an order, under the Overholding Tenants' Act, directing Samuel Irvine of Toronto Junction to give up possession of the blacksmith shop leased by him from George E. Train, within five days, or the sheriff will take steps to evict him.

A Valuable Reference. A. Y. Blain, barrister of Osgoode Hall, has issued his half-yearly circuit guide, containing much information regarding court sittings, new rules and other matters of interest to the profession.

Fast Service to Detroit. The Grand Trunk is the most convenient service for those attending the Epworth League Convention, Detroit, July 16 to 19. Fast trains leave Toronto daily at 7:40 a.m., 8:00 a.m., 4:30 p.m., 11:20 p.m. Tickets good going July 16th and 17th, valid for return until July 20th. For details and all information apply to Grand Trunk City Ticket Office, northwest corner King and Yonge streets.

Japan's Premier Resumes Office. Yokohama, July 14.—The political crisis resulting from the resignation of Katsura has been settled, and the Premier has resumed office. It is understood that Premier Katsura's re-elected retirement was a protest against the interference of the irresponsible older statesmen in the government policy.

It is gratifying to note that the Manufacturers and Liberal Arts Building is now in such a state that it can be fairly pronounced complete, and very shortly will be fit for occupation by exhibitors. The re-arrangements and construction of the other buildings are also making rapid progress, and by the first week in August everything will be ready for exhibitors to enter into possession. Many people are even now visiting the grounds daily and inspecting the great changes that are being made.

Speaking of the consent of His Majesty the King to have the jubilee presents received by his august mother, the late Queen Victoria, exhibited, the "Keystone," the principal jeweler's paper in the United States, says: "Considering the unique character and priceless value of the presents, and the risk attending the long journey, the King's friendly action merits exceptional appreciation. The late Queen was held in highest esteem by all people and the King has given truly royal recognition of this feeling by sending them the opportunity to view her magnificent jubilee gifts. It was our own privilege and pleasure to see the presents when exhibited in Glasgow, and we know in advance what a treat is in store for the Exhibition visitors. We might add that the gifts have a special interest for the jeweler, who will find among them some of the greatest achievements of his craft."

Jubilee Presents Ready to Ship. Manager J. O. Orr of the Dominion Exhibition yesterday received a telegram from the Minister of Agriculture, Hon. Sydney Fisher, stating that the jubilee presents would be ready for shipment from London in a few days. Mr. Fisher asked to whom they are to be consigned, and of course Manager Orr replied to himself.

Czar Asked to Name. Washington, July 14.—Secretary Hay has invited the Czar of Russia to name and appoint from the members of the permanent court of the Hague three arbitrators, to constitute the tribunal which is to determine and settle the questions submitted to it under the Venezuelan claims treaty.

PROCESSES OF MANUFACTURE.

A Series of Twenty-Seven at Dominion Exhibition.

One of the most interesting features of the new Manufactures and Liberal Arts Building at the Dominion Exhibition, Aug. 27, to Sept. 12, will be the process section in which 27 different processes of manufacture will be shown in active operation. All these manufactures will include the very latest inventions in the different fields, and on that account will be of the greatest interest, not only to the Canadian visitors, but also to visitors from the United States.

A few of the processes that will be on view are: Printing vast numbers of tickets by multiple press, book binding and box making, all by the same firm; spectacle making, diamond cutting, glass blowing, die striking, coat and shoe making, umbrella making, paint mixing, the manufacture of cotton and canvas bags, cotton spinning, elastic stocking making, chain making, electric light bulb blowing, button making, binder-twine making, electric welding, needle and pin making, flax spinning, soap making, metal spinning, carpet weaving, cloth making, broom making, and a variety of others, including the process of photography.

These processes will be in constant operation, and are expected to lend greatly to the attraction of the building.

It is gratifying to note that the Manufactures and Liberal Arts Building is now in such a state that it can be fairly pronounced complete, and very shortly will be fit for occupation by exhibitors. The re-arrangements and construction of the other buildings are also making rapid progress, and by the first week in August everything will be ready for exhibitors to enter into possession. Many people are even now visiting the grounds daily and inspecting the great changes that are being made.

Grape-Nuts
CLIMBED TO TOP

GRAPE-NUTS FOOD GAVE THE STRENGTH.

IT is a good thing to know of food that will add volumes to one's strength, for the strong can do things and accomplish work in this world while the weak must stand to one side.

A woman in Toronto writes: "I was in very poor health a long time and got so weak and run down that I would often stop at the foot of the stairs and wonder how I could get to the top."

"I began using Grape-Nuts and in a very short time that weak, broken-down feeling entirely disappeared. I had formerly been forced to give up my breakfasts in order to give my stomach a rest, but when I got hold of Grape-Nuts I could eat breakfast, for the food seemed to help digest other foods, and soon I began to gain in weight and strength."

"I regularly use fruit and Grape-Nuts for breakfast and can work harder and for a longer time than ever before." Name given by Postum Co., Battle Creek, Mich.
