For Indigestion Try Magnesia Neutrate

Many people just now are complaining of indigestion, the most commonly met symptoms being a burning sensation in the pit of the stomach; the belching of gas or wind; acid saliva rising to the throat; flushed face and heartburn. Contrary to general belief these symptoms do not always indicate any constitutional fault in or weakness of the digestive apparatus. In fact, in nine cases out of ten it will be found that the trouble arises solely from an excessively acid condition of the stomach and consequent fermentation of the food contents. Medicines and artificial digestives are not only unsuitable in such cases, but they may do positive harm because they do not neutralize the acid, which is the root of the trouble. For this purpose the best thing to use is a simple, harmless neutrate, such as the plain magnesia neutrate now so easily obtainable of any good druggist. Readers who are troubled with any of the symptoms named above should get a supply of magnesia neutrate and take a teaspoonful in a little water after meals. It will instantly neutralize the trouble which appeared so serious was nothing more than an accumulation of acid in the stomach after all. IT'S SAFER THAN DRUGS.
