

# . N. CURRIE & CO'S STORE

Heavily Stocked With All New Merchandise of the Better Class, Marked at the New Low Level Prices.

Economy!

The cry today is for "ECONOMY." Everybody is practicing it. Not that people are looking for "inferior" goods at low prices, but they are demanding "Honest Quality" and "Workmanship" at a reasonable price.

#### The Most Acceptable Presents

are the USEFUL PRESENTS. Give a useless present and your judgment is criticised in many cases. Avoid this danger by

#### Buying Useful Gitts at this, Glencoe's Family Supply Store.

MILD WEATHER AIDS FARMERS Farmers throughout the whole province, according to the weekly report issued by the Ontario Department of Agriculture, are taking advantage of every warm day to get more fall plowing done. The acreage to date is much greater than normal owing to the remarkably open weather of the present season. Autumn-sown wheat is looking well, but the thawing and freezing of the last fortnight has been rather trying, and a general snowfall to supply a protecting blanket would be welcome.

miss deep back sticks, stones, etc., that might clog the pump valves. The specific diameter of the pump cylinder, the greater the horizontal distance water is drawn the larger the pipe. The type of pump used may vary considerably. The ordinary out-of-doors pump may be used. In this case the pump would be located in the wood-shed, for instance, and installed over a dry well. This consists of a shallow pit cribbed up securely in which the pump cylinder is located, and it has a tight top like an ordinary well. It would be a much easier matter to repair the pump cylinder than when pump is over the well, and much easier to protect the pump from frost in severe winter water. A single or double acting low down

A single or double acting low on the single or double acting low on the single o and better designed than the cheaper ones of this class. Another type would be the semi-rotary pump which is fastened securely to the wall of the kitchen or pantry at one side of sink. It is operated by a short handle moved back and forth in a semi-circular manner. The same pump at the kitchen sink may be used also for pumping up the water from the cistern by having a three-way valve installed in the pipe line at a point just below the sink. When the valve is set one way, the well water can be pumped into the house, when opposite the cistern or soft water can be pumped.

In this short article an endeavor has been made to explain a few

In this short article an endeavor has been made to explain a few simple and inexpensive means of reducing the labor of getting the water into the farm home, in others to follow more up-to-date systems will be dealt with. Our Department at the College solicits inquiries regarding the problems of equipping the farm home with water systems, plumbing, sewage disposal, lighting systems, etc. Write for a copy of Bulletin No. 267; it is free.—R. R. Graham, O. A. College, Guelph.

Aunt Ada's Axioms: Someone has said that a farm is a business with a home attached; but the best farms are homes with a business attached. Elm, maple, or even nut trees and
