Green Room

All Dal Students Can Participate &  
EVERY DAL STUDENT can VOTE!

Agenda will be made available before  
the meeting. For more information,  
please call 494 - 1106.

### A Career in Orthoptics/Ophthalmic Medical Technology

Orthoptics is the clinical science of ocular motility and binocular vision, and related disorders of the eyes. An Orthoptist is an allied health professional who works with ophthalmologists, (eye physicians and surgeons) analyzing and treating patients unable to use both eyes together because of an eye muscle or sensory abnormality. An Ophthalmic Medical Technologist assists the ophthalmologist with a wide range of diagnostic tests and procedures requiring a great deal of technical expertise.

In July 1993, the Izaak Walton Killam Children's Hospital will commence an accredited twenty-four (24) month training program leading to a Certificate of Orthoptics and Ophthalmic Medical Technology. Applications are now being accepted from individuals holding a baccalaureate degree with courses in any of the following areas: psychology, physiology, biology, anatomy, physics, statistics, research methodology. Work/volunteer experience in the health care field will be considered an asset. Candidates should possess good communication skills, sound judgement, emotional maturity and a demonstrated ability to relate well to small children and adults.

Financial assistance may be available to qualified students.  
Deadline for application is February 28, 1994

For further information regarding a challenging, interesting and rewarding career in the health care field, please write:
