test was not so uneven but that both were sweating hard as, at the conclusion of the third set, they sought a breathing space on the terraced bank back of the court.

'That's certainly a good nerve sedative," said the artist breath-ing hard; "and not such rotten tennis for two aged relics of better days, like ourselves."

"Not so bad by any means," agreed his opponent cheerfully. 'If you had stuck to lobbing, I think you'd have had me, in the second set. Wonder how our spectator enjoyed it," he added, lowering his voice.

"What spectator? There's no one here, but ourselves.'

"Oh, I think there is. Don't be abrupt about it; but just take a look at that lilac copse on the crest of the hill."

'Can't sec anyone there," said Sedgwick.

No more can I."

"Then what makes you think there's any one.'

"The traditional little bird told

"Meaning, specifically?"

"Literally what I say. There's the bird on that young willow. You can see for yourself it's trying to impart some information."

'I see a grasshopper-sparrow in a state of some nervousness. But grasshopper-sparrows are always

"This particular one has reason to be. She has a nest in that lilac patch. A few minutes ago she went towards it with a worm in her beak; hastily dropped the worm, and came out in a great state of mind. Hence I judge there is some intruder near her home '

'Any guess who it is?"

"Why it might be Gansett Jim," replied Kent in a louder voice. "Though it's rather stupid of him to pick out a bird-inhabited bush as a hiding place.'

The lilac bush shook a little, and Gansett Jim came forth.

"He went to Carr's Junction." said the half-breed curtly. "You found his trail?" asked

Kent The other nodded.

morning," he said.

"Find anything else?"

'No. I kill him if I get him!" He turned and vanished over the rise of ground back of the court.
"Now what does that mean?"

demanded Sedgwick in amaze-

"That is Gansett Jim's apology for suspecting you," exclaimed Kent. "He is our ally now, and this is his first information. What a marvelous thing the bulldog strain in a race is! Nobody but an Indian would have kept to an almost hopeless trail as he has done.

"The trail of the real murderer?" cried Sedgwick.

# **GOPHERCIDE**

#### Certainly does "get" Gophers

Gophercide is different from any other gopher poison ever offered-and better! Its three great advantages are:

It is easy to prepare. Gophers eat it greedily. It is SURE to kill.

OPHERCIDE is a prepar-ation worked out by our own chemists. It has all strychnine's deadly killing power, without its tell-tale bitter taste or the difficulty of preparing it.

Gophercide is 80 times more soluble than strychnine, so there's no trouble at all in poisoning a batch of grain with it. Besides, Gophercide doesn't stay on the outside, but soaks right into the grain and stays there even after days of exposure.

The gophers don't notice any taste at all in Gophercide. They eat the grain greedily, where they

wouldn't touch wheat poisoned with ordinary strychnine. And Gopher-cide "gets" them every time.

Here is what Mr. Wm. Shears.

of Forward, Sask., writes about it:
"Re the "Gophercide" Poison,
I beg to say that I found it to give entire satisfaction and can recommend it as a Poison for the quick dispatch of Gophers."

One 50c. package of Gophercide will kill 350 to 400 gophers-7 or 8 put out of the way for a cent!

Get busy—get a package of Gophercide from your Druggist— try it out—and then tell your neighbors about it.
