The SUCCESS MANURE SPREADER

OLDEST
NICEST WORKING
BEST WORK
LIGHTEST DRAFT
MOST DURABLE

The "Success" has the largest rear axle and strongest drive-chain of any spreader made. It is the only machine with Bonser frosting-device and many other points covered by strong patents. Our catalogue tells all about it and gives much valuable information for farmers.

BALE YOUR HAY WITH I. H. C. PULL POWER HAY PASSES

UNQUESTIONABLY It pays any hay raiser to own an I. H. C. pull power hay pass. Well baled hay brings the best price.

To sell hay at all in some markets—or to reach a market where you can get the best price—in most cases your hay *must* be baled.

You can draw bigger loads of baled hay, thus saving in time, perhaps double time for teams and men.

Baled hay retains its nutrition and remains in first class condition longer than hay in the stack.

With your hay baled you can wait for the right market and get the best price because you can move it more quickly.

Other Advantages

Bale your own hay first, and also make extra profits baling your neighbor's hay. An I. H. C. one-horse press with two men and a boy will easily bale eight to ten tons per day under average conditions—uniform bales in size, neat and compact. The bale chamber is 14 by 18 inches.

The I. H. C. two-horse press under similar conditions, will bale ten to twelve tons a day. Bale chambers are 14 by 18, 16 by 18, or 17 by 22 inches in size. Both I. H. C. presses will bale any kind of hay or straw including timothy, clover, alfalfa, wild hay, shredded fodder, pea vines, etc., etc., the capacity varying of course with the material being baled.

Especially Desirable Features

I. H. C. hay presses do first class work rapidly—require a very small force of men—are most convenient and simple to operate—require no excruciating strain on the horse or horses, having no pounding or uneven draft to worry or chafe the team.

The I. H. C. pull plunger is a great improvement over the ordinary plunger. The presses have large feed openings—perfect working roller tuckers—are durable, simple and have efficient powers, operating on the compound lever principle, with no extra draft when pressure is greatest. Only 4-inch stopping or jerking.

There are two strokes of the plunger to one revolution of the wheel. I. H. C. presses are made principally of steel and iron—are compact and strong for long service—not at all flimsy or flimsy in design.

Write nearest office for catalog and other information. Call on the local International agent and inspect these presses.

\$1,500

Will be Paid to Any Person

Who within one year will send us 1,000 New Subscriptions to The Canadian Dairyman and Farming World at \$1.00 a year; or, we will pay the following sums to any person who within one year secures the number of New Subscriptions mentioned:—

\$1,200 for 850 new full year subscriptions	\$300 for 250 new full year subscriptions
\$1,000 for 750 new full year subscriptions	\$150 for 150 new full year subscriptions
\$900 for 700 new full year subscriptions	\$80 for 100 new full year subscriptions
\$700 for 550 new full year subscriptions	\$35 for 50 new full year subscriptions
\$500 for 400 new full year subscriptions	

Should you be unsuccessful in securing even a list of 50 New Subscriptions, we will pay you a liberal commission on all subscriptions that you do secure, from 1 up to 50. You therefore cannot lose on this proposition. We positively agree to pay this commission, and the prizes mentioned above, to any one who secures the new subscriptions to entitle him to the same. We require, however, that all subscriptions taken must be new, and secured at the full subscription price of \$1.00 a year.

Remember that The Canadian Dairyman and Farming World is the only Farm Paper in Canada, published weekly at One Dollar a year. It is a splendid canvassing proposition.
