

Keep the Land Productive

The constant cropping of the land must of necessity take all the life-giving properties out of the soil, and in time will leave it absolutely worthless.

Scattering of the barnyard manure over the land in a haphazard way by hand has heretofore been the only method of recompensing the land thus impoverished, but the work was such a back-breaking and tedious job that it was never satisfactorily done.

The Massey-Harris 20th Century Manure Spreader has changed all this, and with it the manure heap has doubled its value to the soil, the producing powers of the soil are doubled, and your labor is reduced to a minimum.

The Massey-Harris Manure Spreader spreads the manure systematically; it is thoroughly pulverized and spread so evenly that it is immediately available as plant food to the soil.

The first rain will reduce it to a liquid state and carry it into the soil.

The Massey-Harris Manure Spreader is a most important implement on the farm to-day.

MASSEY-HARRIS CO., LIMITED

Frost Wire Fence is Cattle-Proof

Frost Wire Fence is high carbon steel, coiled spring wire, tested to 2,000 pounds tensile strength. Each separate strand of wire can support 2,000 pounds weight. There are mighty few horses and cattle that weigh 2,000 pounds. "Frost" UPRIGHT WIRES are heavy. Each one supports its own share of the strain. This prevents sagging in the middle. Uprights are immovably locked to the running wires by the **Frost Lock**

It does away with bends and bows, crimps and kinks, soft tie wires and weak spots, and preserves the whole strength of the fence. Galvanized by electricity so the lock can't rust. FROST WIRE FENCES stand weight, strain and climate—as strong ten years after as the first day they are put up. Write for catalogue, which tells all about the Frost Fence and Frost Lock. It's free.
