## How Good Roads will benefit You.

**THEY BENEFIT THE FARMER**, because they increase the value of his farm; enable him to raise more profitable crops; his cost of hauling will be low; he can reach markets when prices are best; his children can get to school every day in the year, and he will have more social life and better conditions generally.

**THEY BENEFIT THE CONSUMER**, because they reduce the cost of living in proportion to what the farmer saves, and by bringing new industries to the community, enable a larger proportionate amount to be paid out in wages, and with increased population, more amusements and better stores.

Public roads are commercial feeders of the city, and every improvement of these roads means a greater prosperity through increased agricultural production and greater stimulus to all industries.

### Economical Good Roads

Concrete roads are best from the start and cheapest in the end. They are free from ruts, mud and dust. They give good footing to horses and easier traction to every class of vehicle, but most important is the fact that they require practically no expenditure for upkeep.

Complete information of concrete road construction is yours for the asking, without cost or obligation.
