GOSSIP

INNISFAIL STOCK SALE

The dispersion sale of Shorthorn and Hereford cattle held at Innisfail on July 16th, was not largely attended by stockmen in general. The Shorthorn offerings came from the herds of James Wilson, of Grand View Stock Farm, and John Robinson, of Eagle Ridge Farm. W. Hodge had in the sale 25 head of Herefords. While a number of the animals were sold, still the prices realized were not large. S. W. Paisley, of Lacombe, was the auctioneer, and most of the stock sold went to local buyers.

WHY HAY IS GRADED LOW

The rules of the National Hay Association recognizes 23 grades of hay, which seem to fall into 5 classes: Timothy, clover, mixed timothy and clover, wild grasses, and alfalfa. Choice timothy hay must be sound, properly cured, of bright natural color, not mixed with more than one-twentieth of other grasses, and well baled. Lower grades of timothy are Nos. 1, 2 and 3, and "no grade." Clover hay has two grades, No. 1 and No. 2. No. 1 clover must be medium clover, sound, properly cured, not mixed with more than one-twentieth of other grasses, and well baled. Choice alfalfa hay must be reasonably fine leafy alfalfa of bright green color, properly cured, sound, sweet, and well baled. Other grades of alfalfa are Nos. 1, 2 and 3, and "no grade." These rules are used by most cities that have official inspection.

A large percentage of the timothy on the market is graded below No. 1. The reasons are that many meadows are cut for years, until they become weedy and mixed with other grasses, and that the hay is often cut too late, so that it loses the bright natural color and palatability. If the farmer would send to market nothing but what the feeder considers good he would get a higher price. It might be necessary in some cases to educate the country buyer also.

Timothy has the lead, especially among city feeders, because it is not only nutritious but palatable and nonlaxative, and the horse is not likely to overfeed. Nevertheless, other kinds of hay would often prove better for the feeder. Alfalfa, for instance, has high muscle-building qualities and is especially valuable for draft horses. It is highly relished, however, and the horse may overfeed. Doubtless the feeder will in time learn that hay from legumes has great value when properly used.

Meantime the farmer is obliged to include clover and other legumes in his rotation in order to maintain the fertility of his land. The farmer who sells hay should seek to produce the highest grade by keeping his meadows pure and by proper methods of cutting, curing, and stacking. Further points may be found in Farmers' Bulletin 362, "Conditions Affecting the Value of Market Hay," which may be obtained free from the U. S. Department of Agriculture.

POULTRY AWARDS AT WINNIPEG

Oatmeal Scones. — When making scones, the chief point to remember is that they should be rolled as little as possible; over-rolling makes them of a totally wrong consistency, making them resemble puff pastry. One pound of fine oatmeal, 3 ounces butter, salt, $\frac{1}{2}$ ounce baking powder, one egg, a little milk. Mix together the oatmeal, baking powder, and a quarter of a teaspoonful of salt. Next rub in the butter; beat up one egg, add it to the other ingredients with enough milk to make a light dough. Roll it out on a floured board, shape it into mounds about three-quarters of an inch thick, put them on a greased baking-tin, and bake in a quick oven from 25 to 30 minutes.
