

All side draft carried by rear wheel of plow.

This is the Attachment

Built circle shaped in order to be successful.

Perfectly flexible and oscillating and properly attached.

Cleans any soil but is easiest draft attachment made.

Angle steel frame and steel teeth shouldered up tight into square holes. Angle of teeth and draft changed at once by removing circle holes to draft bolt.

We gladly invite competition against every other attachment on the open field, but always insist that the farmer be the judge.

That is opening up such a tremendous demand in Western Canada

A Farm Bargain

A fully equipped farm containing 1,800 acres, of which nearly one-third is under cultivation; the farm is fenced and cross-fenced, and is traversed by a river; there is valuable growing timber upon it, also an excellent 12-roomed house, a large barn, capable of accommodating 100 head of stock; and other buildings. There can be sold also, with or without the farm, 14 head of horses, and a full complement of machinery and implements necessary to work the farm. It is situated only a mile and a half from the nearest station, church and school, and is one of the most picturesque farms in the Province of Manitoba. Exclusive of stock and implements, the farm can be had for the low price of \$20 per acre.

For full particulars apply to

The Standard Trusts Company

KEEWAYDEN BLOCK PORTAGE AVE. EAST, WINNIPEG

For Quick Sale

Four sections of the choicest wheat and mixed farming land in Manitoba, situated in township 11, range 1 west; 1,700 acres under cultivation and farm all fenced and close to market, church and school; valuable buildings and abundance of good spring water and wood on each section; 1,500 acres now in crop. To close out the estate we are prepared to sell the whole property, with the growing crop, at \$26.50 per acre. Immediate possession can be given. Will also sell Plow, Engine, Stock and Implements at a valuation.

PEDLAR ^{Nestable Corrugated Galvanized} CULVERT

Is The Strongest, Most Practical, Durable and Easiest Laid Culvert Made

YOU ought to show this advertisement to your township reeve or warden. Get him to write for the free book about Pedlar Culverts, or write for it yourself and tell him about this new Culvert—the quickest, most economical, strongest for any use any culvert can serve.

See How It Saves Farmers' Money, Better Roads, Lowers Taxes

This picture is from a photo of a wash-out fourteen feet deep in the Township of Darlington, caused by use of cement tile for drainage purposes. The township authorities have replaced that with Pedlar Perfect Culvert, forty feet in length by three feet in diameter; strongest, easiest laid and most durable they could get.

This picture of the Pedlar Perfect Culvert assembled and ready to lower into place, shows the immense strength and rigidity of these Culverts. Though forty feet long with a bearing of only a few feet at the center it does not give one-sixteenth of an inch. See how easily Pedlar Culvert can be lowered into place. No skill needed.

Here you see the Pedlar Culvert doing its work of drainage twenty-five minutes after being put in place. It would have taken three times as long and cost three times as much to have installed any other type of culvert. Yet this Pedlar Culvert will last far longer and give no further trouble of any kind.

This view shows the Pedlar Culvert after the fill-in was completed. The Culvert has to carry a dead weight of several hundred tons of earth, as well as the live weight of traffic passing overhead. But that can't strain Pedlar Culvert, which will neither give nor spring. It stands what no other culvert can.
