FRIDAY, JULY 15, 1890.

MINARD'S LINIMENT Lumberman's Friend. SCHOOL closes to-day for the summer holidays.

MISS R. A. MOSSBERY and Mrs. A. D. Munro and families returned on Friday last from a week's vacation across the mountain.

THE Tea Soiree given by the ladies of Belleisle last week was a grand success. About fifty dollars was raised towards paying for the new bell.

DAVID RECEPTION.—The Boat's excursion to Bear River was a financial success as nearly every ticket was sold. Their music at Bear River was highly appreciated.

BOAT "EDMUND," of St. John, N. B., C. W. Burns, of Digby, master, arrived at Annapolis on the 13th inst., with 130 M white pine, which sold at \$25.25 per M.

ELECTRIC SEMAPHORES.—The Nova Scotia Central, Western Counties, and Windsor and Annapolis Railways are adopting the electric semaphores.—Headlight.

A SOCIAL will be held at the Rectory, Granville Ferry, on Monday evening, July 21st. Music and refreshments. Cake and ice cream. 8 o'clock. 25 cents.

QUITE a large number from Annapolis and Granville attended the Greywood and Lake La Rose tea meetings. They reporting having a good time. At Lake La Rose \$100 was realized.

TOWN INCORPORATION.—The third election on the question of the incorporation of the town of Yarmouth, under the "Town" Incorporation Act, was held on the 15th, with the following result:—For Incorporation, 271; against, 247; majority for, 24.

EXCURSION.—Steamer "City of Montreal" runs an excursion to Bear River to-day from St. John, N. B. Digby the steamer "Evangeline" will take excursionists to Bear River where they will be able to spend three hours among the cherry orchard in that picturesque village.

REV. J. H. BOYD, of Toronto, is now in town and will visit the principal places in this county. He is passing for the sale of a book by Blaise Pascal entitled "The Provincial Letters," which deals with the moral teachings of the Jesuit Fathers as opposed to the church of Rome and the Latin Vulgate. Toronto price—\$1.50.

CYCLONE.—Quite a cyclone struck here about the middle of the afternoon on Wednesday, and for about five minutes made the dust fly and the windows rattle. It struck the "Evangeline" on her way down to Digby and there was quite a scare for a moment. One lady lost her hat, is the only casualty reported.

The Engineer of Public Works, J. C. M., is coming with Mr. J. B. Mills, to make a visit to this county to inspect the work being done on Port George pier. They also visited Round Hill where the Engineer will take soundings and make a survey preparatory to putting in the breakwater, for which the Dominion government made an appropriation last session.

The members of the Civilian Band are profuse in their praise of the reception given them during their visit to Annapolis. They were led and driven to all the points of interest in the old historic town, and speak in glowing terms of the attractions of our sister county, and many of them express the hope that on next Dominion day they will be permitted the opportunity to extend to the citizens of Annapolis a similar reception.—Lunenburg Argus.

PROFESSOR EDMUNDS, the great Australian wizard, gave an entertainment here on Friday, Saturday, and Monday evenings. His tricks were performed in a marvellously easy manner and his ventriloquist efforts were amusing. Quite a number of presents were given away, all of which was done in a perfectly fair and open manner. On Saturday evening Mrs. C. Sanford Bishop drew a gold watch, and on Monday evening Mrs. Alex. Blackie drew another.

NEW TIME TABLE.—The attention of travellers is called to the fact that a change of time table comes into operation on the Western Counties Railway on Monday, July 21st. The "Daily Express" leaves Yarmouth 7.15, Railway time, and arrives at Digby at 10.00, returning, leaves Digby at 2.45. The Passenger and Freight, daily, leaves Yarmouth at 2.30 p. m., arriving at Digby at 6.15. A. P. & F. daily leaves Digby at 6.30 a. m., table will appear next week.

OBITUARY.—We regret to announce to-day the death of a widely known and public spirited citizen of Yarmouth Mr. T. B. Dane. Mr. Dane's illness was a very short one but a crisis occurred two or three days ago which rendered recovery impossible and his death was hourly expected. He passed away early yesterday morning. Mr. Dane though but 67 years old was one of our oldest business men, and one who ever took an active part in forwarding the interests of his native town. He was especially enthusiastic in musical matters and in managing and conducting musical festivals of any kind and he was ever ready to sacrifice time and talents. There was no better known or more successful musical leader in the market provisions, though the deceased was never at any period a "professional," as he engaged in the work from pure love of music.—Yar. Times.

BEAUTIFUL PRESENTS.—Among the many presents received by Mrs. Harry Ruggles, was an elegant large silver salver and stand, beautifully designed and appropriately inscribed, from the Halifax Ontario Society, accompanied by a note in which the members of the society tendered congratulations to the recipient and expressed wishes for her future happiness and welfare; a beautiful tea-water pitcher with goblets and staff of elegant design, given by the congregation of St. Mark's; and many other numerous and costly presents from personal friends. The gift of the groom was a handsome horse and carriage (not a piano as stated in some of the city papers). A congratulatory telegram, largely signed by our leading citizens, was forwarded to the happy couple early in the afternoon, and received by them at a most opportune moment, viz., immediately after the luncheon hour.—Monitor.

MINARD'S LINIMENT Lumberman's Friend.

ROUND HILL.—A few days ago a party of 15 American young ladies with Mrs. Nelson, formerly Mrs. Gordon, as chaperone arrived at Round Hill. They have rented Mr. Norman Dargie's house and intend to have a good time. Round Hill society is in commission over the event, and lively social times for the next few weeks may be expected.—Our sporting reporter is absent at present and we should send him up to have an interview and take a few notes.

LOWER GRANVILLE.

HAYING has commenced in good earnest. The crop promises to be very good. Rain is very much needed and the growing crops are suffering as a consequence. From appearances the fruit crop will be very light.

The milk maid supper and strawberry festival at Granville Hall, on N. S. Friday, ended nearly \$21 to the funds of the Union Sabbath School. This Sabbath School has been very successful and the interest does not in the least diminish.

Up to this date no herring have been taken in the waters, and Digby chickens are a thing unknown. In former years thousands of herring were put up, but the failure which has been gradual since 1880.

The Grange Lodge at Winchester Hall is increasing in membership. Several summer visitors from the States have arrived and are enjoying our cool breezes and invigorating air.

THE BAND'S VISIT TO ANNAPOLIS.

(From the Lunenburg Argus.) The Civilian Band which played at Annapolis on the 1st inst., returned to Westport on the 10th inst. N. S. and reported having had a good time. The boys were very much interested in seeing the ancient capital, and especially the fortifications, of which they had heard so much, and greatly pleased with the beautiful scenery. From the top of the hill where the original fort was we got a full view of the surrounding country, and when the tide is nearly up the sign is simply grand, reminding one of the fairy land we read about.

The old magazine built by the French in 1642 or thereabouts, is still standing as well as the old fort which was used as the officers' quarters, as is also the old arch over which we passed on our way to the Magazine. All of these old landmarks are well preserved, even after stemming the years of 250 years. It was certainly very amusing to the boys as well as to the band-leader to listen to the remarks of the old soldier and Mr. Ritchie who so kindly accompanied us and furnished us with the information asked. We also visited the old dingy prison which was formerly used by the French but now by the tourists for a different purpose.

The celebration on the whole was a great success, and much credit is due to the A. A. Association, which with the kind assistance of some of the principal merchants and citizens were foremost in carrying out the programme.

During the latter part of the day we were treated to an exhibition by the men running the water works, and were very much pleased with performance given. A stream from the hydrant—through some 100 feet or more of hose—was thrown over the highest building on main street and with force sufficient to tear the shingles from a new building. The town is now supplied with water at a very moderate cost—some \$25,000 payable in 20, 40, and 60 years.

The day's celebration closed with a rendition of H. M. S. "Puffins" by Prof. Barnaby and club but the rank, the building was very tastefully arranged, the seating comfortable, the scenery good, and the character fairly well kept. Our large audience, with a fine programme of good music between acts I and II, and after the performance, all of which were vociferously cheered.

The morning following, the boys were treated to a carriage drive by the members of the A. A. Association which was very much enjoyed. After dinner our band gave another concert, and at 2.30 again took train for home, arriving in the evening and playing up to their room.

The leader and band, tender most hearty thanks to Mr. Hamilton, editor of Annapolis SPECTATOR; the members of A. A. Association; Mr. Carver, agent of International S. S. Co.; Mr. McLoughlin; town boys' ladies who furnished dinner at the grounds; hotel proprietors who kindly accommodated them; Mr. Ritchie, and who were so kind in giving them a hearty welcome, and who did all in their power to make it pleasant for them, and trust that this, which was the first time we had the pleasure of visiting your beautiful town, may not be the last. L. C. B.

C. C. RICHARDSON & CO. Sirs,—I was formerly a resident of Port La Tour and have always used MINARD'S LINIMENT in my household, and know it to be the best remedy for emergencies of ordinary character. JOSEPH A. SNOG, Norway, Me.

The Gracie.

At Lower Granville, July 13th, to Mr. and Mrs. George H. McCreae, a son.

The Gracie.

At Lower Granville, July 13th, Mrs. Lizzie Green, aged 19 years, daughter of Mr. Benjamin Woods.

TO OUR SUBSCRIBERS.

THE SPECIAL ANNOUNCEMENT which appeared in our columns some time since, announcing a special arrangement with Dr. B. J. KENDALL CO., of Kewborough Falls, Vt., publishers of "A Treatise on the Horse and his Diseases," whereby our subscribers were enabled to obtain a copy of that valuable work free by sending their address (and enclosing a two-cent stamp for mailing same) is renewed for a limited period. We trust all will avail themselves of the opportunity of obtaining this valuable work. To every lover of the Horse it is indispensable, as it treats in a simple manner all the ailments which afflict this noble animal. Its phenomenal sale throughout the United States and Canada, make it standard authority. Send for this paper when sending for "Fruitful."

It was expected that the new barquette would have been launched, but that will not take place until the 28th or 30th. She is a fine model and will register near 500 tons. She is being built by A. Marshall, John H. Bouson and others in Bear River, and parties in New York.

The day closed with a concert at Temperance Hall which was a grand success.

MINARD'S LINIMENT Cures Gout in Cows.

PROFESSOR ROBERTSON'S LECTURE.

Interesting and Practical Addresses in Nova Scotia by Prof. Robertson, of the Central Experimental Farm—What the Work is Doing.

(From the Monitor.) Professor Robertson, of the Dominion Experimental Farms, announced to lecture in the Court House, on Tuesday afternoon last, arrived in town somewhat after the appointed hour, in the company of Prof. Starratt, Esq., of Paradise, and immediately retired to the building, where he was welcomed, we are sorry to report, by a small, but much interested audience, who listened attentively to the interesting lecture.

The lecturer next referred to the chemical constituents of an animal's food. Nitrogen, Phosphoric Acid, and Potash are the principal. Nitrogenous food forms the least meat, makes the muscle. Potash is the peculiar substance in plant growth which produces gum starch etc. Manures containing large percentage of Potash would be found the fertilizer of fruit trees. A ton of horse manure contains 12 lbs. Nitrogen 11 lbs. Phosphoric Acid and 6 lbs. Potash 29 lbs. in all. Leached manure should not be used on orchards as the potash is soluble and disappears under the influence of water, and such manure would consequently be of little value in an orchard.

In regard to silos the lecturer said there were but few in the Maritime provinces. A silo cost \$200, most of which was in the silo 100 tons of ensilage can be built inside a barn for a total cost of \$75. The cost of ensilage may be put at \$1.75 per ton and two tons of it are equal in value to one ton of hay. Five acres of corn will keep 16 cows during winter.

Referring to cows the speaker mentioned the points which a good cow should have. The dairy cow he said is an artificial product. A "savage" or "barbarous" cow will produce but 2000 lbs. of milk in a year. An ordinarily civilized cow will produce 4000 lbs. and the professor believed could be developed as to produce 8000 lbs. The state of the skin of a cow is the best means of her condition. The skin which is the same within as without the animal is the organ of digestion. The skin should have a healthy lively, not sluggish, feeling and appearance. This is the philosophy of carrying cattle and horses, not only to keep them clean which is important, but to make the skin more active and "wholesome."

A cow, continued the speaker, does not get a chance if she has to rest six months of the year. She could give milk at least 100 weeks in a year.

though she be the best time for cows to calve. The calves made better calves if properly cared for, and the cows gave most milk at the time when it was profitable. The farmer's best mark who are making money faster than those of any other county, have adopted the principle that cows should calve during the month of Sept. Oct. and Nov. Besides supplying a large amount of dairy produce, that little county one-sixteenth as large as Ontario now sends to England more than any other county as sent from the whole of Canada.

The farmers of the Dominion, said the Professor, are beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm and similar institutions. They are awaking to the need of knowledge. Formerly the farmer's work was one mainly of destruction, of cutting down trees and applying the soil. Now the farmer is beginning to appreciate the advantages to be derived from this farm
