

To prevent fragile china and glasswa from breaking and becoming chipped while being washed, place a clean Turk-ish towel in the bottom of the dishpan. This also will save silver from much

scratching.

The casiest and quickest way to clean jewelry is in a suds of castile soap. Rinse in diluted alcohol with a few of ammonia added and dry with soft cloth.

Tea stains can be removed from the tablecloth quite easily, if the stained part is dipped at once into milk. To clean white and delicately colored plumes not badly soiled, rub them g

To brighten a carpet sweep it with broom dampened (not wet) in salt water. Care should be taken to shake broom well after each dipping.

To clean store stairs and halls boi one pound of pipeclay with a quart of water and a quart of small beer, and put in it a bit of stone-blue. Wash with stone with a flannel and a brush.

To prevent suet from becoming

stick: when chopping, sprinkle it with flour and chop it in a cold place. To remove lime deposit from a glass pitcher or water bottle, fill the vesse with good, strong vinegar or sour milk, and let stand over night, or until the lime is dissolved or loosened. Then wash in the usual way.

# WHERE MONEY IS TIGHT

Everybody suffers, when boots a tight your corn suffers, but they can painlessly cured by Putnam's Corn Extractor, Guaranteed in all cases. Use only Putnam's, 25c, at all dealers.

# HUMAN WINDMILLS.

## Man Swung Clubs for 107 Hours Without a Break.

The wonderful record of the world's champion ciubswinger, Tom Burrows, who some time ago accomplished the test of swinging Indian clubs weighing three pounds six ounces each for 107 hours without a break at the minimum rate of eighty revolutions a minute once more calls attention to his amazing stamina.

Burrows has turned forty years of age, and has been giving club-swinging exhibitions and setting up new records since he was fourteen. "The medical profession," he says, both in England and Australia, say that I helped my heart-during my exhibitions by working the clubs in unison with the heart-beats, and doctors tell me that my life has not been shortened by club-swinging. The champion, however, is an all-round athlete, and during an interview

with the writer some time ago he gave several interesting facts regarding his eareer. It was as a cricketer that first came into prominence in Australia, the land of his birth, and since then he has achieved much success in various parts of the world as a wrestler, boxer, sprinter, swimmer and evelist. His ser-vices have been much sought after as vices have been much song the boxing world, and among notable pugilists he prepared Frank Slavin and Tom Willians, the boxing champion of Australians, the boxing champion of

lians, the boxing champion of Australia, for many sensational contests.

Not less remarkable than his own record is that established by Col. H. E. Deane, of the Royal Army Medical Corps, who, in spite of his fifty-two years, finished a few days ago a twenty-four hour test at Aldershot, thus breakford an executed a Powings the ing an amateur record. Perhaps the most astonishing feature of Col. Deane's record is that he smoked cigars freely when swinging, and ate many hard-boiled eggs and Chelsea buns, drinking a little milk. He swing to the strains of and songs and at half-time began

While Burrows holds the club-swingin; championship of the world, it might be mentioned that the hammer-swinging record was established by Arthur Lan easter, who four years ago,, at the Crys tal Palace, swing a blacksmith's bam-mer weighing eight pounds for twelve hours continually. Lancaster is known as "the man with the iron hands," an setting up this remarkable record the hammer was swing in a complete circle each time, and not with the action of a pendulum. A striking illustration of a pendulum. A striking illustration of Lancaster's dexterity with the black smith's hammer is afforded by the fact that he can knock the stump of a cigar-ette, 1½ inches long, from the mouth of his assistant while the hammer-head is travelling in cir. circles at the rate of

# Minard's Liniment Cures Colds, Etc. Tiny Dynamo.

A lilliputian electric dynamo, perfect in every detail, but weighing only a quarter of an ounce, was shown at work-before the Paris Academy of Science. Its constructor is a French mechanician named Trevet. This dynamo is three-fifths of an inch long, half an inch wide and three-fittis of an inch high. The coil is a quarter of an inch in diameter, and is wired with 51; feet of silk insulated copper wire 1,500 inches in thickness. A tension in this poss. ness. A tension is indicated of 3-5 volts by a current of 0.2 ampher, but as to its power there is no instrument sensi-tive enough to record it. While at work toy machine made a sound like th humming of a bee. Tit-Bits.

# EVXTRADITION REFORM NEEDED

EVXTRADITION REFORM NEEDED

(Guelph Mercury)

A young man was taken from New
York on Thursday to Italy, to stand trin
on a charge of having murdered his bride
of three months in Italy in the summer of
1910. It is alleged that after the deed
he threw her body in a lake.

This man has successfully fought extradition ever since: If the evidence
proves him guilty of the crime, justice has
been cheated of its due for three years.

There seems to be no reason why, in
such a case the laws of the land would
not hand over the iman wanted, to stand
his trial. It can rendily be understood
that each country is prepared to extend
profection to its chizens, but in the case
cited it would seem that extradition has
simply had the effect of allowing liberty
to a man who should have had to face
the courts long ago and give an account
of his knowledge of the dastardly deed.

## BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during hot weather than at any other time of the year Diarrhoea, dysentry, cholera infantum and stomach disorders come without and stomach warning, and when a medicine is not at hand to give promptly the short de-lay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the home where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes sundenly the prompt use of the Tablets will cure the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine C., Brockville, Ont.

# A LIGHT TRUST.

How much do you pay for electric current? asks Walter V. Woehlke in September Technical World magazine.

If you live in a city of two hundred thousand inhabitants or more, you probably pay at least ten cents a kilowatt-hour; if you live in a small town, our rate is likely to be considerably lower. Strange, isn't it, that rates should be higner the larger the market? That is the fact, though

Pasadena, yith thirty-five thousand inhabitants and nine thousand five hundred electricity consumers, pays four and five cents per kilowatt-hour for lighting current; and all around Pasadena a score of little towns gtt their current for eight cents. Yet according to the latest available reports Chicago, Brooklyn, St. Paul, Philadelphia, Spokane, Pittsburg, Portland, Providence, Washington, D.C., Richmond, Reading, San Antonio, and a mond, Reading, San Antonio, and a number of other large cities are pay-ing a base rate of ten cents and more per kilowati-hour.

per kilowati-hour.

Electric light rates in the majority of American cities are unquestionably exorbitant. They are based, not on the cost of the service, but on the long-eared patience of the consumers. This world-renowned, unfathomable. patience of the American public rather than the value of the plants is the basis of the capitalization skillfully in flated by the corporation promoters It is their most valuable, asset. If it were not for this asinine endurance of Jones and Smith and Brown, the tencent rate would long ago have sough a safe refuge in the archives of his-

torical societies. An economically installed, honestly financed, efficiently managed electric plant can, hundreds of them do, deliver current for lighting purposes, pay all legitimate expenses, set aside adequate amounts for depreciation and amortization, and leave a handsom surplus for dividends-at a maximum rate of seven cents for killowatt-hour!

At a confectioner's I held parley music and songs, and at half-time began an exhibition of club-swinging in rag-time, finishing with 180 revolutions a minuta, twice the minimum rata pre-scribed, having made altogether 150,000 announced her willingness to attend counter was quickly responsive and announced her willingness to attend to my wants in this language:

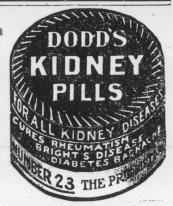

gottcha, Stevedore. You want to your dary girl a grand time by handing her a young trunk of yumyum tablets. Say, horning into this sweet-fang joint was the luckiest thing you ever did in your life. Our line of chocolate cheek-bulgers are the swellest that ever woke up a toothache or put a mustache effect under a lady's beak. Glom a coal-tar bullet just as a sample, mister, and sink it in your map. MY WORD!

# WHERE EUGENICS FAILS.

WHERE EUGENICS FAILS.

(Philadelphia Record);

Massachusetts was convulsed a month ago by a engenic marriage, and the couple have quarreled over serious matters and said nasty things about each other and saparated. The bride says: "I felt that he had no real love for me after we went to our flat to live." But what has love to do with an engenic marriage? Eugenfes are something thoughly scientific, and love is one if the least scientific things imaginable. Clergymen and physicians are now quoted solemnly as saying that the collapse of this scientific alliance "emphasizes the truth that man is something more than a mere animal; that he is a being with a mind, a soul and a temperament." Especially the temperament. But did the experiment of an eugenic marriage have to be tried with resulbing disaster inside of 30 days in order to impress this upon Massachusetts ninds? The secretary of a maritable society observes; "We are not dealing with horses, dogs or cows, but with a problem that has to do with spiritual beings." To most people there is nothing new in that, but the faddists may very well give some attention to the thought. (Philadelphia Record)

## SUMMER LAMPS.

## Their Care and Dangers to Be Avoided by Users.

In camp and country lamps are being used by those not entirery familiar with their care; therefore a few words re-garding them may be timely.

Lamps with metal reservoirs are safer than those of china or glass, as the former can be picked up, if upset, and re-placed before the oil can escape.

Good quality of oil is essential, for a bad quality of oil not only clogs the wick and burner, but gives off an unpleasant and dirty vapor.

Never turn down a wick. It is meant to burn with the flame at full height, and when it is allowed to smoulder it either smokes or smells, and it also has source of danger in it.

Place your alcohol lamp in a shallow dish, as the alcohol is liable to run on the table or dressing table and ignite, or ruin varnished surfaces. Never pour fresh alcohol into the tank if there is ourning char on it, for the entire contents may burst into flames. Do not keep the alcohol bottle near the lighted

# 'ALEXANDRA" AT TETE JUEAT.

Miss Isabel A R MacLean whose pen made is "Alexandra," contributed a lengthy article to the Vancouver Province, July 12, 1913, on Tete Jaune, which point she visited with one hundred and more members of the Woman's Canadian Press Club. Of conditions, as she found them, Alexandra" writes:

"Leaving the luxuriously appointed Grand Trunk Pacific train which had brought us through enchantingly lovely scenes, the writer met the superin-tendent of construction, Mr. Fetters. The official who introduced him de-The official who introduced him described him as "the man who built the road." He led the way " " We went through a store-house piled to the roof with supplies for the camps — food and raiment and "small hardware." Labels on boxes and barrels proclaimed the best flows to be found on the marthe best flour to be found on the mar-ket, the best oatmeal, the best hams, biscuits, tea, coffee and all sorts ot canned fruits and vegetables. We called on the cook, who presided over a kitch-en that glistened and shone and challenged comparison, in point of cleanli-ness and order, with any of your town kitchens. The mess room, where the ravenous five hundred men gather three times a day, was just as spotless. The cook had just completed a spice cake, a mile or so in length, topped by icing. This trifle reposed in the ice-house pending its appearance before the five hundred. Besides the cake the ice-house condred. Besides the cake the ice-house con-tained beef in quantity, dozens of eggs, butter and other perishables. It was very warm at Tete Jaune and I left the ice-cream freezer projected from a neigh-boring door. On Sundays, if the cook feels well disposed to his flock he gives them ice-cream for dessert. To supply the camps with beef, carloads of cattle are taken in and killed at Mile 53, or care that your come by way of the river. P. Burns & deep and regular.

Company have the contract to supply "2. As regare are taken in and killed at Mile 53, or Company have the contract to supply beef. The commissariat department althis division was met. He was an Edinburgh man.

This is to certify that I have used MINARD'S Liniment in my family for years, and consider it the best liniment on the market. I have found it excellent for horse flesh

(Signed) W. S. PINEO.

# Then Who Was Susie?

Mr. Lawrence Grossmith, who has "hit" in the part of Hubert in The Girl in the Taxi, told some amus ing stories the other day.

One of them was about a business man who attended his partner's wed ding. He had never met the bride be fore, but at the reception he was pre-sented to her, and gave her his very

best smile.
"I hardly feel like a stranger," he said pleasantly, "though I have never met you before. You see, my partner and I are on the most intimate terms apart from business, and he has occa sionally done me the honor to read ex tracts from his dear Susie's letters."

The bride glared at him so viciously

that he hastened to assume an expres-sion of apology.

"I hope you don't mind his having read your letters to me?" he asked anx

"My letters!" she repeated joily. "I fear there is some mistake. My name is Helen!"-Pearson's Weekly.

# AWFUL TORONTO GIRLS.

AWFUL TORONTO GIRLS.

(Toronto Star)

In at least two or three instances in the past month, Toronto business menwho have girl employes have sent girls home to put more crothes on. In one of the cases we have heard of the girl did not come back. A representative of The Star met one of these employers on a train the other day and he said that he did not know what the mischief the fashions in girls' clothes would lead to next. He had several girls in his shop, and the other morning he felt compelled to send one of them home, as he expressed it. "to get her clothes." He said he had to do it, as he was afraid of what rivalry would cause the others to do next day.

# **BLOOD SALT**

An excellent remedy for Dyspepsia, Sour stomach, Heartburn and constipa-tion. This is compounded to resemble in essence and effect the salty parts of the human blood.

Price 50c. Leading Druggists.

## THE SANOL MFG. CO., LIMITED. Winnipeg, Man. A BRAVE ESKIMO.

# Gave Up Everything for His Christian Faith.

The whole life of the primitive Eskimo The whole life of the primitive Eskimo is governed by precedent. Although outwardly the freest and most irresponsible being in the world, he is in reality the slave of public opinion and the numberless customs and superstitions of his ancestors. The ways of his fathers are good enough for him, and the world of the old men and witch doctors, who treasure up ancient precedent like the Pharisees of old, is the standard he lives and dies by.

For an Eskimo to break one of these unwritten laws is to render himself a social outcast. Although treated with kindness, he is no longer reckoned as a member of the tribe. A brother-in-law of an Eskimo chief had early embraced Christianity, being converted on a trip to Nome by one of the first mis-sionaries. Being a very conseientious man, he soon recognized the incompat-ibility of retaining his faith and con-forming to the worship of his people. The spirit of the Scotch Covenanters was in his veins. He refused to go through the usual rites of his people, and prayed to the God of the white stranger at home. As a result he was forbidden his place in the village kosan (or meeting place) where every man ga (or meeting place), where every man has his recognized station, carefully graded according to merit. His son was not allowed to dance with the young men or witness any of the councils or witch doctoring reserved for the men; his daughters could not take part in the annual dance of the women, not was any member of the tribe bold en-ough to ask them in marriage. They al married Siberian strangers and left the old man's house desolate, but he stuck to his faith to the last. Always cheerful, always ready to help, living daily the faith that was in him, he was one of the few of his race who was brave enough to withstand the witch-doctor.

# HEALTH RULES.

## Japanese Government's Advice to the People.

When Japan was engaged in conflict with Russia it was noted that the Japanese foss from disease was the smallest ever known in any wor. Investigation showed that this was due principally to the sanitary conditions maintained and to the sensible, as well as scientific rules strictly enforced in the care of the soldiers. Now the Japanese government has issued a list of rules for health for use not alone by soldiers, but by the entire population and in peace as well as war. The 10 rules in question follow:

"I. Spend as much time out of doors as possible. Bask much in the sun and take plenty of exercise. Take respiration is always

As regards meals eat meat Company have the contract to supply beef. The commissariat department allows three pounds of beef per day to every man. The chief medical officer contract to supply once a day and let be diet be lows three pounds of beef per day to every man. The chief medical officer contract to supply the contra named as much as possible. Masticate you rfood carefully. Take a hot bath every day

and a steam bath once or twice a week if the heart is strong enough "4. Early to bed and early to

to bear it

rise.

"5. Sleep in a very dark and quiet room, with windows open. Let the minimum of sleeping hours be six or six and one-half hours, in case woman eight and one-half hours is

advisable. "6. Take one day of absolute rest

each week in which you must refrain from even reading or writing. "7. Try to avoid any outbursts of passion and strong mental stimulations. Do not tax your bain at the occurrence of inevitable incidents or of coming events. Do not say unpleasant things nor listen, if possible to avoid it, to dis-

agreeable things.
8". Be married! Widows and widow ers should be married with thea the

least possible delay.
"9. Be moderate in the consump tion of even tea and coffee, not to say tobacco and alcoholic beverages. "10. Avoid places that are

warm, esepcially steam heated badly ventilated rooms." Minard's Liniment Cures Distemper

#### Whistling Jugs. It seems that the potters of ancient Peru manufactured se me ingenious mus-

ical instruments, "Whistling jugs" they are called when they are placed in a collection of antiquities ."Silvadoes" they named them in the old days. Specimens of them are obtained from century old ourial places in Peru

One of these consists of two vases, the bodies joined closely one to the other with a single narrow opening between. The neck of one of these vases is closed with the exception of a small opening, in which a clay pipe is inserted. The closed neck of this double vessel is mod

eled to represent a bird's head.

When a liquid is poured into the open necked wase the air is compressed into the other, and in escaping through the narrow ppening is forced into the whis-tle and the vibration produces sound. Many of these sounds represent the notes of birds; one in the collection of the British museum imitates the notes of the robin and some other members of the thrush tribe peculiar to Peru.

# SANOL'S USES FOR SAWDUST

# Former Waste Product Now Extensively Employed.

Not so very long ago about the only real use any one had for sawdust was for packing ice. That was when small local sawmills were more common, and the amount of this form of waste wood was, or at any rate appeared, compara Now, when the tendency tivery small is to consolidate these into large mins with a capacity of several nundred thousand teet of lumber per day, the daily waste in sawdust is seen to be enormous, and much experimenting is being done to discover new methods of

utilizing it. Perhaps the most promising venture in sawdust utilization in this country is treated with sulphuric acid, under suitthie conditions, resulting in the forma tion of sugar, which is then fermented alcohol. Several plants have ed to produce alcohol from been erected to produce alcohol from wood in this manner, and, though there are some difficulties still to be over-come, the ultimate success of the process on a commercial scale is assured

Sawdust has been successfully manufactured into briquets for feel for a considerable time in Europe by a very sim-ple process. The shavings and sawdust are first steam-dried, the water contained in the wood being thus evaporated and the resin almost liquified. The sawdust is then compressed under heat into briquets of the desired size, the contained resin acting as a binder. A firm in Vancouver is engaged in a similar line of manufacture, the sawdust being com-pressed into a cylindrical tube, where it it cut into short lengths by a revolving knife, emerging in the form of small, round briquets. These briquets are clean to handle, easy to kindle, and leave ery little ash

In England sugar is manufactured on a commercial scale by treating sawdust in closed retorts with weak sulphurous acid, under high pressure. In Austin, Texas, also a plant is being built to manufacture stock food from sawdust, by a somewhat similar process. The tar, pitch and turpentine are removed from the sawdust, leaving only sugar and fi-bre, to which is added forty per cent. of cottonseed meal. The mixture is sold for fattening cattle

Two and one-half parts of clean sawdust, mixed with two parts sand and one part cement, make a warm, long-wearing and sound-proof floor, to which carpets can be tacked with less injury than to a board floor, and which has the advantages over a cement floor in being more clastic. These qualities should win an extensive use for this form of floor ing, which has the additional advantage that it can be stained to harmonize with interior finishings by the addition of color to the mixture while in a semiliquid state.

The sawdust of certain kinds of wood used in considerable quantities menufacturers for metal polish, for packing, for meat curing, for making safety explosives, and composition novelties, and for fibre and pulp manufac-ture. Patent cleaning powders for use on carpets and rugs consist principally amos Aq panaisiom Aliußii isnipwes jo cheap mineral oil.—Department of the Interior, Forestry Branch.

# From the Journal of Mme. Leandre

Cynicism is a disease, caused by sour grapes. If it attacks you in youth, a few warm applications of affection and true love, diluted, will speedily cure. In later years it is incurable.

No one can lie as well as a woman for she will persuade even herself that she is speaking the truth.

Every womin carries hidden away within her a wild, weird elfin self—that leaps forth in the hour of crises and does the startling deed . . . then vanishes, leaving its everyday semblance to pay the price in plodding, patient, hopeless drudgery.

holeless drudgery.

After you have gone to the limits of suffering and sinning, you find that it is not moral conviction that makes you pure or worthless—but, quite independent of it, the inborn instinct of your

Sordid and commonplace as our lovmemories may be, we place a halo above them to glorify ourselves.

them to glorify ourselves.

While we love, we are as the enchanted princess—sleeping. The awakening will be rude. For, instead of a charming prince, it is the churl reality who rouses us from our dreams.

Home—the place where is faithfully kept green the memory of your every ed and mistake. Helen Woljeska in August Smart Set

# Cellulose From Asparagus.

Cellulose is now recovered from the Cellulose is now recovered from the waste of asparagus canning factories by the recently discovered process of Otto Reinke, of Hamburg. He also makes use of the stalks which mature after the edible crop is gathered. Heretofore these residues have been practically worthless except as fertilizers, as they have but little nutritive value when used as fodder, and attempts to utilize them in making course paper or packing material making coarse paper or packing material have not resulted satisfactorily. After undergoing a comparatively simple no chanical and chemical treatment the yield a beautiful pure cellulose, which may be used for bandages, blasting may terial, paper, tissues, fine felt, cardboard

### Minard's Liniment Cures Garget In Cows.

# THE UNBUSINESSLIKE FARMER

THE UNBUSINESSLIKE FARMER.

(Kingston Whig)

How many farmers are there who can take down the account book and tell just how much money thay have invested in land and stock, how much their income for the year should be in order to give a fair return on their investment and fair wages for the labor performed by themselves and how much they have actually made during the year? That is a hard question to answer offnand, but it is safe to say that there are more who can not than who can tell where they ought to stand and were they actually do stand. If they sould, many of them, it would seem, would take steps to make a better showing.

## PATH OF THE SUN.

## Its Relation to the Equinoxes and the Solstices.

The sun's path is called the ecliptic. It is a great circle of the celestial sphere, cutting the celestial equator at two points 180 degrees apart and makling with it an angle of 23½ degrees known as the obliquity of the ecliptic. The crossing points are called the equinoxes, because the days and nights are then equal, and the points midway be-tween the equinoxes are the solstices, because the sun then seems to stand

still for a few days.

The ecliptic is so called because eclipses occur only when the moon is crossing it or is near it, for the moon's orbit cuts the ecliptic in two points, called nodes or knots, and at other times is above or below it. If the moon, when in either node, is in line with the sun and the earth we have an eclipse, either total or anular. she is near her node we have a partial

eclipse.
The moon's nodes are not stationary, the moon's nodes are not stationary, but move backward on the moon's orbit, completing a revolution in about nineteen years, when the colleses of the period recur in the same order and at about the same intervals as before This period of eighteen years and eleven days is called the saros. It was known to the Chaldeans and the Greeks and them their data for computing gave

eclipses. An intelligent person can trace the sun's path in the heavens. If the sun rises exactly in the east and sets in the west it is the time of the equinoxes. If the sunrise and sunset points are farthest north and the sun at noonday is highest in the heavens it is the time of the summer solstice. If the sunrise and sunset points are farthest south and the sun is very low in the heavens at noonday it is the time of the winter solstice.—Harper's Wedkly.

# BETTER THAN SPANKING

Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions, Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine dif-ficulties by day or night.

# Forest Fires.

A forest fire is a calamity. Forest fires can be prevented. The chief cause of forest fires is

A burning match thoughtlessly thrown down does the mischlef.
